Required Material:

1. Financial Markets & Institutions: A Modern Perspective, Anthony Saunders and Marcia Cornett. McGraw-Hill Irwin. 2001. Students are expected to have read the assigned materials PRIOR to class.
2. Notes that are available on Sentinel in the Fin424 folder and should be obtained by the student prior to class. I recommend that you print the notes, 3 hole punch them and interleave blank sheets of paper with them. The notes are also available from my web page (see above). The username and password are both "finance" (all lower case).

Course Objective:

This course provides an integrated introduction to the capital markets and portfolio theory as applied to financial institutions. Major emphasis will be placed on understanding how institutions analyze and manage risk in today's financial markets. The course will provide a background for further study in the areas of macroeconomic policy and financial institution management in a domestic and a global environment.

Prerequisites:

At a minimum, all students must have successfully completed Fin 322 and must have achieved junior, senior or graduate standing. The specific prerequisites are listed in the catalog. If you do not have the prerequisites you will receive a final grade of F, regardless of your test scores. All students MUST show me a transcript or other official record showing you have previously completed Fin 322 by the end of February.

Grading:

There will be up to three tests, none of which are cumulative except for basic concepts. Grades will be assigned as follows:

Test I, II and III (time permitting)	90% (equal weighted)
Class Participation	10%

Class attendance is required. If you have more than four unexcused absences I will drop your final grade by one letter. When you don't attend class, you miss out and others miss out on your contributions, regardless of your other scores. Moreover, each succeeding three absences will result in a drop of one additional letter grade. Work, transportation and vacation will not normally result in an excused absence. Documented emergency situations will normally be excused, but they must be cleared as soon as possible. Don't use up your absences on frivolous reasons! I may count leaving class early without permission or not having the assigned notes with you as an unexcused absence.

If you absolutely must miss an exam, you must notify me prior to the exam and provide a written justification for your absence. In the event of an excused absence, either the remaining tests will be weighted more heavily, or you will take a make-up exam. Make-ups are generally more difficult since the obvious questions are used on the original. Make-ups may be oral. No student may miss more than one exam and pass the course; all students must take Test III. Any work turned in late will either be not accepted or subject to a 10 point a day penalty at my option. Class

participation is generally left up to the student, but is encouraged and expected from all students in order to receive the full 10%. Class participation consists of not only coming to class but asking and answering questions and contributing constructive (not disruptive) comments.

Each student is expected to do his/her own work. Cheating or copying will result in a grade of zero for that assignment. There are no exceptions to this rule. Each student is expected to be familiar with and adhere to the student conduct code. You may use a cheat sheet, 1 page, 8 ½ x 11, both sides on all tests.

Highly Tentative Course Outline Spring 2003

Assignments and Dates Are Subject to Changes Announced in Class

- 
- Jan 28 Syllabus, LRQ, obtain File 1 from Sentinel.
30 Ch 1 Introduction, File 1
- Feb 4 continued
