INTERACTIVE MEDIA PROJECTS
MART491 (02)
SPRING 2016

professor: michael r. murphy
michael.murphy@mso.umt.edu
Office hours: M 2-3:30 TR 11-12

The purpose of this class is to explore the nature of working as an interdisciplinary artist and to create several small projects as part of that research and experimentation.

Though the investigations have technical and technological components, along with the performative and live elements, the assembly of these leads to broader philosophical topics based in the ontology of film, art, theatre, live performance and technology. To put it simply the question might be, "What is it that occurs when these elements are asked to work together?"

Your areas of exploration will come from the following:

- Image—Still/Moving
- Sound—Live/Recorded/Synthetic
- Physical Performance—Live/Recorded/Synthetic
- Language—Written (Visual text)/Spoken/Synthetic
- Objects—Found/Created/Virtual

We will follow a basic pattern of creation:

Collection/Research-Exploration/Assembly-Editing

There will be 3 projects due for the class:

- Project 1: The Self-Portrait or Portrait
- Project 2: Group Installation on a Common Theme
- Project 3: Individual Location Specific Installation

For purposes of the class you will need to have a **Sketch Book or Visual Diary**, which will contain all of your thoughts, drawings and mind-mappings. You will also need a **loose-leaf binder** for the collecting and storage of research materials, schedules, articles from the class, etc.

Though we will have access to some presentational equipment—video projectors/monitors/speakers—equipment for shooting, capturing and editing is not always easy to check out given the demand of the student numbers in Media Arts. Any personal equipment you can find to work with will give you more freedom to work, given the constraints of the check-out system.

We will have access to the production space from 9 until noon on Fridays, but the space is also available to check out for classroom projects. All check-out goes through our main office, but there will be an online system in place shortly. The document with the process for checking out equipment is available in the Media Arts office.

From *Conversations with Beckett and Bram van Velde*, Charles Juliet, 1973

van Velde: "Cautiously, I explain that I believe an artist's work is inconceivable without a strict ethical sense."

A long silence.

Beckett: "What you say is true. But moral values are inaccessible. And they cannot be defined. In order to define them, you would have to pass a value judgment, which is impossible. That's why I could never agree with the notion of a theater of the absurd. It involves a value judgment. You cannot even speak about truth. That's what's so distressful. Paradoxically, it is through form that the artist may find some kind of a way out. By giving form to formlessness. It is only in that way, perhaps, that some underlying affirmation may be found.
