# Geo 595 – Special Topics: Geophysical Theory and Methods

## Instructor information

Instructor: Dr. Hilary Martens  
Office: CHCB 329/330  
Email: hilary.martens@umontana.edu  
Phone: 406.243.6855  
Lecture hours: MWF 2pm-2:50pm  
Office hours: Tuesday 11am-12noon; Thursday 10am-11am; By appointment

## Course description:

We will explore modern topics in geophysics, with a focus on seismology and geodesy. The course will begin with an overview of important concepts, discoveries, methods, and applications in geophysics. More detailed lectures and discussions will cover selected topics, including continuum mechanics, inverse theory, seismic wave propagation, earthquake location, tidal analysis and prediction, GNSS theory and analysis, spheroidal Earth deformation, and surface mass loading. Students will have the opportunity to engage directly with real seismic and geodetic datasets using computational tools, as well as to investigate problems of personal interest through individual research projects.

## Learning Outcomes:

By the end of the course, students should be able to:

1. \* Describe the causes and consequences of plate tectonics
2. \* Visualize and explain how the solid Earth responds to loading and gravitational forcing
3. \* Solve basic geophysical inverse problems
4. \* Quantify stress and strain relationships in solids
5. \* Assess the advantages and disadvantages of various geophysical methods used to probe Earth structure and dynamics
6. \* Acquire, process, visualize, and interpret seismic and geodetic data using computational tools
7. \* Apply geophysical theory and methods to problems in their own research areas
8. \* Appreciate the importance and relevance of geophysics to society

## Required textbooks:

*No textbooks are specifically required for the course.* Applicable reading materials may be provided throughout the semester.

Suggestions for further reading include:

- Lowrie, W. (2007), *Fundamentals of Geophysics*, 2<sup>nd</sup> Ed., Cambridge University Press.
- Stacey, F.D., and P.M. Davis (2008), *Physics of the Earth*, 4<sup>th</sup> Ed., Cambridge University Press.
- Turcotte, D.L., and G. Schubert (2002), *Geodynamics*, 2<sup>nd</sup> Ed., Cambridge University Press.
- Mussett, A.E., and M.A. Khan (2000), *Looking into the Earth: An Introduction to Geological Geophysics*, Cambridge University Press
- Lai, W.M., D. Rubin, and E. Krempf (2010), *Introduction to Continuum Mechanics*, 4<sup>th</sup> Ed., Elsevier Ltd.
- Shearer, P.M. (2009), *Introduction to Seismology*, 2<sup>nd</sup> Ed., Cambridge University Press.
- Aster, R.C., B. Borchers, and C.H. Thurber (2013), *Parameter Estimation and Inverse Problems*, 2<sup>nd</sup> Ed., Academic Press.
- Jaeger, J.C., N.G.W. Cook, and R. Zimmerman (2007), *Fundamentals of Rock Mechanics*, 4<sup>th</sup> Ed., Wiley.

## Course Calendar:

Dates	Topic	Assignment	Due Date
23 January	Welcome and pre-quiz		
25 January	Earth Structure and Dynamics 1		
27 January	Earth Structure and Dynamics 2		
30 January	Earth Structure and Dynamics 3	Problem Set 1 (Structure)	Thurs., 9 February, 3pm
1 February	Linux Lab (and homework demo)		
3 February	Rock Mechanics 1		
6 February	Rock Mechanics 2		
8 February	Rock Mechanics 3	Problem Set 2 (Stress/Strain/Heat)	Thurs., 16 February, 3pm
10 February	GMT Lab 1		
13 February	Seismology 1		
15 February	Seismology 2	Problem Set 3 (Earthquakes)	Thurs., 23 February, 3pm
17 February	GMT Lab 2		

Dates	Topic	Assignment	Due Date
20 February	<b>Presidents' Day (no class)</b>		
22 February	Seismology 3		
24 February	Earthquake Presentations and Iceland/Montana Seismicity	Project 1 (Seismological Method)	Topic by Mon. 27 Feb. beginning of class; Report by Mon. 13 March, 2pm
27 February	Seismic Data Acquisition and Analysis 1: Instrumentation, Deployment, Data		
1 March	Seismic Data Acquisition and Analysis 2: Tools for Data Analysis		
3 March	SAC Lab 1		
6 March	SAC Lab 2		
8 March	HypoInverse / ObsPy Lab		
10 March	Gravity, Geodesy and the Geoid	Project 2 (Geophysical Method)	Topic by Friday, 17 March, 2pm; Introduction by Thurs. 6 April at 3pm; Final report by Thurs. 27 April at 3pm
13 March	Seismological Methods Presentations 1		
15 March	Seismological Methods Presentations 2		
17 March	Seismological Methods Presentations 3		
20-24 March	<b>Spring Break (no classes)</b>		
27 March	Fundamentals of Inverse Theory 1		
29 March	Fundamentals of Inverse Theory 2		
31 March	Tidal Analysis and Prediction 1		
3 April	Tidal Analysis and Prediction 2		
5 April	Tidal Analysis and Prediction 3	Problem Set 4 (Tides/Inversions)	Thurs., 13 April, 3pm
7 April	Fundamentals of GNSS 1		
10 April	Fundamentals of GNSS 2		
12 April	GIPSY Lab 1	Problem Set 5 (GNSS/Deformation)	Thurs., 20 April, 3pm
14 April	GIPSY Lab 2		
17 April	Loading and Earth Deformation 1		
19 April	Loading and Earth Deformation 2		
21 April	Loading and Earth Deformation 3		
24 April	Earth and Planetary Paper Discussions 1		
26 April	Earth and Planetary Paper Discussions 2		
28 April	Earth and Planetary Paper Discussions 3		
1 May	Geophysical Methods Presentations 1		
3 May	Geophysical Methods Presentations 2		
5 May	Geophysical Methods Presentations 3		
8-12 May	Finals Week		

#### Required assignments and tests:

1. Problem Set 1: Earth structure, hydrostatic equilibrium, and the Adams-Williamson equation
2. Problem Set 2: Stress and strain in solids
3. Problem Set 3: "Adopt an earthquake"; USGS earthquake plotting and analysis; focal mechanism worksheet
4. Problem Set 4: Tidal harmonic analysis; basic inverse problems
5. Problem Set 5: GNSS analysis; Earth deformation
6. Project 1: Seismological methods and applications
7. Project 2: Geophysical methods and applications
8. Tutorials: Linux, shell scripting, Vi text editor, Python, GMT, SAC, HypoInverse, GIPSY

## **Course guidelines and policies:**

### **Student Conduct Code**

All students are expected to abide by The University of Montana's Student Conduct Code:  
[https://www.umt.edu/vpsa/policies/student\\_conduct.php](https://www.umt.edu/vpsa/policies/student_conduct.php)

### **Attendance**

Regular attendance is encouraged and expected. If you need to miss a class, please inform the instructor in advance.

### **Course withdrawal**

Please refer to Institute policy on adding, dropping, and withdrawing from courses:  
<https://www.umt.edu/registrar/students/dropadd.php>

### **Disability modifications**

The University of Montana assures equal access to instruction through collaboration between students with disabilities, instructors, and [Disability Services for Students](#). If you think you may have a disability adversely affecting your academic performance, and you have not already registered with Disability Services, please contact Disability Services in Lommasson Center 154 or call 406.243.2243. I will work with you and Disability Services to provide an appropriate modification.

### **Assignment expectations**

Assignments are expected to be completed thoughtfully and on-time.

Honor code (borrowed from Caltech): "No member of the community shall take unfair advantage of any other member of the community."

Plagiarism: Reproducing the work of someone else, and representing the work as your own, without appropriate citation and attribution is forbidden. Plagiarism extends beyond tangible material to also include ideas. When in doubt, cite.

Collaboration: Collaboration on problem sets, projects, and tutorials is encouraged. You may consult external references (e.g., internet, books, journal papers, etc.) with appropriate citations and attributions. You may also work with other students and consult with the instructor provided that all solutions that you submit are your own work (written up individually and reflecting your own understanding of the material). As a general guideline, you should be able to reproduce solutions from your submitted problem sets without help from anyone else.

More information on UM's academic policies and procedures:  
[http://archive.umt.edu/catalog/14\\_15/academics/academic-policy-procedure.php](http://archive.umt.edu/catalog/14_15/academics/academic-policy-procedure.php)

### **Grading policy**

Project 1: 15% (written report and oral presentation) \*

Project 2: 25% (written report and oral presentation) \*

Problem sets: 40% \*

Tutorials/Labs: 20% (all labs and Moodle tutorials must be completed and submitted by 8 May at 5pm to avoid penalties) \*

Late assignments: \*

Assignments submitted within 24 hours of due date: 10% reduction in credit \*

Assignments submitted within 48 hours of due date: 50% reduction in credit \*

Assignments submitted more than 48 hours past due date: No credit for the assignment \*

Saturday and Sunday do not count toward the calculated hours past due (for example, if the assignment is due at 3pm on Thursday, 48 hours past due would be at 3pm the following Monday) \*

## **Additional Information and resources:**

### Student Academic Resources
