Attendance policy:
You are expected to come to class, on time. You are not required to attend the labs, but it's a good idea.

Late assignment policy:
Late assignments will not be accepted (answers will be posted). All assignments are due at the beginning of class. Cutting class to finish a homework assignment won't help.

Collaborative work:
You are encouraged to discuss the assignments with the other students. However, all work handed in must be your own.

Homework assignments copied from published sources (including the Internet) or other students will receive zero credit.
