This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.

G580 - X-ray Diffraction Techniques in Mineral and Rock
Analysis
Fall, 2000 - Gray Thompson

Week	Topic	Readings/References
1.	Principles and practice of X-ray diffraction	Moore & Reynolds, 1997. X-ray diffraction ... of Clay Minerals 2 nd Ed. Reynolds, 1989. Principles of Powder Diffraction, MSA Reviews in Mineralogy V. 20, pp 1 - 17
2.	X-ray diffraction analysis and identification of a single mineral: sample preparation methods for analysis of a random powder sample	Moore & Reynolds, 1997. X-ray diffraction ... of Clay Minerals 2 nd Ed. Bish & Reynolds, 1989. Sample Preparation for X-ray diffraction. MSA Reviews in Mineralogy V. 20, pp 73 - 97
3.	Indexing and interpreting X-ray diffraction data for a single mineral	Fink Index & Search Manual
4 & 5	X-ray diffraction analysis and identification of a mixture of two or more minerals. Quantitative analysis	Fink Index & Search Manual Snyder & Bish, 1989, Quantitative Analysis. MSA Reviews in Mineralogy V 20; pp 101 -142
6, 7, & 8.	X-ray diffraction as a tool for compositional analysis of carbonate minerals	Chave, K.E., 1952. A solid solution between calcite and dolomite, J. Geol. V. 60, pp 190-192. Pilkey, O. H. 1959. The effect of environment on the concentration of Mg and Sr in certain recent echinoid tests. MS Thesis, The University of Montana. Reeder, R.J. & Shepard, C.E., 1983, Variation of lattice parameters in some sedimentary dolomites. Am Min.

9.	X-ray diffraction as a tool for compositional analysis of the olivine group minerals.	Yoder, H.S. & Sahama, Th.G., 1957, Olivine X-ray determinative curve. <i>Am. Min. V.</i> 42, p. 475
10, 11, & 12	X-ray diffraction as a tool for compositional analysis of a mineral: Pyroxene group minerals	Zwaan, On the determination of pyroxene by powder XRD, <i>Leidse Geol. Mededelingen</i> v19, p 167 (in Deer, Howie, & Zussman, <i>Rock Forming Minerals</i> v2, p12ff and pp 110-112 Kuno, 1954, Opx in volc. rocks, <i>Am. Min.</i> v39 p30 Hess, 1952, Opx...unit cell dimensions, <i>Am. Jour. Sci.</i> Bowen vol p 173.
13, 14, & 15	X-ray diffraction analyses for structural details of the sheet silicates: polytype determinations for micas, kaolin group minerals, and chlorites	Moore & Reynolds, 1997. <i>X-ray diffraction ... of Clay Minerals</i> 2 nd Ed., pp 112 – 116, 246 – 247 Bailey, S.W, 1984. Classification and structures of the micas. <i>MSA Reviews in Mineralogy</i> V.13, pp 1 – 12 Srodon, J. and Eberl, D.D., 1984. Illite. <i>MSA Reviews in Mineralogy</i> V.13, pp 506 -510
