UTILITY CONSTRUCTION  
FOR SCIENCE COMPLEX  
TO START MONDAY AT UM

MISSOULA--

Construction of utility facilities for the New Science Complex at the University of Montana gets under way on the east side of Old Dornblaser Field Monday (Oct. 27).

J. A. Parker, director of the UM Physical Plant, said the construction project will include extension of major service lines, including water, sanitary sewer and storm sewer, from the University Center to the construction site of the Science Complex south of the UM Forestry Building, a distance of about 1,200 feet.

The eastern 40 per cent of Old Dornblaser will be out of commission insofar as athletic activities are concerned until next spring.

"By starting now on the utility construction project," Parker said, "the track and field on Old Dornblaser hopefully will be back in shape for sports activities by next spring."

Parker estimates that total construction time will be about six months. He said the contractor has indicated the project should be finished by spring.

First phase of the project will include stripping the sod from a portion of the old gridiron surface. Parker said the sod will be salvaged now for replacement in the spring.

Second phase of construction is slated to start Nov. 3. This phase will include digging the trenches and laying the three pipe lines,
