This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.
Course Description and Objectives: This three-credit course examines the moral dimensions of health care as they are manifest in select issues, including the doctor-patient relationship, medical decisionmaking, the definition of death, the right to refuse treatment, euthanasia and assisted suicide, abortion, procreation, assisted reproduction, genetic technologies, medical research, and medical resource allocation. Numerous cases will be used to highlight moral issues. The purpose of the course is to:

1. Provide students with a basic understanding of moral dimensions of health care and medical decisionmaking generally
2. Provide students with an understanding of the moral dimensions of issues in medical ethics
3. Advance students' skills in critical thinking and writing in ethics through the consideration of medical ethics issues and cases

Prerequisites: A lower-level ethics course, or permission of instructor

Requirements

1. Mid-term examination, Thursday, October 26 (30 percent of grade)
2. Ethical analysis paper, due November 30 (30 percent of grade)
3. Participation in case discussions (10 percent of grade)
4. Final examination, Tuesday, December 19 (30 percent of grade)

- Examinations will likely be a combination of a choice among short answer questions and a longer essay and/or case analysis. The final examination will not be comprehensive but may be longer than the mid-term.
- The required paper should analyze central arguments of a particular medical ethical issue and put forward your normative position on the issue. It should utilize at least two outside sources. Students are encouraged to discuss topics and ideas with the instructor in advance. Graduate students taking the course for graduate credit should see the instructor for additional requirements.

Required Reading

John D. Arras and Bonnie Steinbock, eds., Ethical Issues in Modern Medicine, 5th edition, 1999 (paper). Used copies may be available.
Aldous Huxley, Brave New World (pb). Used copies may be available.
Other articles and cases as assigned (electronic reserve at Mansfield Library)

Format

Typically, lectures will be given on Tuesday and the first 20-30 minutes of the Thursday session. Discussion of cases given in writing or occasionally in film will occur during the latter part of the Thursday sessions.
