This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.
Psychology 632 – Introduction to Clinical Neuropsychology

Spring 2017

Course Location and Time
CPC 121
Monday: 10-11:50
Wednesday 11:00 – 11:50

Instructor Information
Instructor: Craig McFarland, Ph.D.
Office: Skaggs 202
Phone: 406.243.6845
Email: craig.mcfarland@umontana.edu
Office hours: T/R: 1:00-2:00; and by appointment

Course Objectives
The first objective of this class is to develop an understanding of human functional neuroanatomy and the major domains of cognition. Students will then learn about common neurological disorders and the neurological syndromes that characterize those disorders. Throughout, students will become familiar with approaches to neuropsychological assessment.

Learning Outcomes
1. Students will demonstrate an understanding of human functional neuroanatomy, cognitive function, neurological disorders, and neuropsychological assessment, as evidenced by exam performance and class discussions.

2. Students will gain skills in delivering case presentations of neuropsychological evaluations.

Course Requirements

Attendance
Due to the small, seminar style of this class, it is imperative that you attend class each week. Each of you possesses unique strengths and perspectives that will contribute to the learning experience of the entire group. Conversely, your absence will detract from the experience of others. One unexcused absence will be permitted. Please email me prior to class regarding your absence. Any additional unexcused absences will negatively impact your grade.

Class Participation
This class will be taught in seminar format. It is expected that all students will contribute to each week’s discussion. You will be evaluated on the quality of your contributions, based on the following:

Do the student’s contributions demonstrate knowledge of the reading assignments? Are they insightful?

Course Materials

Required Text:

Additional readings will be taken from the following texts:

Blumenfeld (2010). Neuroanatomy through Clinical Cases, 2nd ed.

Student Evaluation

Grades will be based on 3 exams, 2 topic presentations, and class participation.

Each exam is worth 20 points
Topic presentations are worth 15 points each
Class participation is worth 10 points

Important Dates

February 1st: No Class (INS)
February 20th: No Class (President’s Day)
March 20th: Spring Break
March 22nd: Spring Break

Course Guidelines and Policies

Academic Integrity

All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or a sanction by the University. All students need to be familiar with the Student Conduct Code.

Disability Modifications

The University of Montana assures equal access to instruction through collaboration between students with disabilities, instructors, and Disability Services for Students. If you think you may have a disability adversely affecting your academic performance, and you have not already registered with Disability Services, please contact Disability Services in Lommasson Center 154 or call 406.243.2243. I will work you and Disability Services to provide an appropriate modification.

Add/Drop Deadline

Please take note of important registration dates listed in the Spring academic calendar. April 6th is the last day to drop classes without the Dean’s signature. After that date, no petitions to drop the course will be signed and no Incompletes will be given except in documentable emergency situations.

Student Feedback

As with any graduate level course, your feedback and constructive comments for improving the course are always welcome. Because each of you has unique interests and training goals, I will actively seek your feedback at various points throughout the semester, but want you to feel free to share any thoughts you may have at any time.
Tentative Course Schedule

January

23rd: Orientation/ Overview of Neuroanatomy (Ch. 3)

25th: Occipital Lobe (Ch. 13)

30th: Parietal Lobe (Ch. 14)

Cerebellum (Ch. 15 Blumenfeld pp. 698-702; bottom of 711-720)

February

1st: NO CLASS – INS

6th: Temporal Lobe (Ch. 15)

8th: Frontal Lobe (Ch. 16)

*Take home exam #1 – Submit by email no later than 10:00 on 2/15

13th: Memory (Ch. 18 pp. 488-493) - Morgan 37

15th: Neuropsych Assessment – Lezak Ch. 5

20th: NO CLASS - President’s Day

22nd: Neuropsych Assessment – Grant Ch. 2, 3 (pp. 42-46)

27th: TBI – Morgan 21; Grant 25

March

1st: TBI – Case

6th: Vascular - Morgan 18, 20

8th: Vascular – Case

13th: Toxic Exposure – Morgan 30

15th: Infections (HIV) - Grant 17

20th: SPRING BREAK!!!

22nd: SPRING BREAK!!!
27th: Infections (Herpes) – Grant 17

*Take home exam #2 – Submit by email no later than 10:00 on 4/3

29th: Tumors – Morgan 29

April

3rd: Seizure Disorders – Morgan 23, 25

5th: Degenerative Disorders (PD, Huntington’s, MS) Grant 9, 10; Morgan 31

10th: Degenerative Disorders (Alzheimer’s and Lewy Body) Morgan 39 (Martina)

12th: Degenerative Disorders (Alzheimer’s and Lewy Body) DLB Ch

17th: Degenerative Disorders – Case - Ogden

19th: Depression

24th: PTSD

26th: Schizophrenia

May

1st: Personality Disorders

3rd: CATCH UP

*Take home exam #3 – Submit by email no later than 5:00 on 5/10
