AMERICAN CHEMICAL SOCIETY
TO MEET AT UNIVERSITY OF MONTANA,
CALIF. MAN TO SPEAK

MISSOULA--

The biochemical effects of air pollution will be discussed during a public meeting. Thursday (Feb. 12) at the University of Montana by Dr. J. Brian Mudd, biochemist at the University of California at Riverside.

A meeting of the Montana section of the American Chemical Society will host the speaker at 8 p.m. in room 109 of the UM Chemistry Building.

Dr. Mudd will discuss experiments which determine the basis for toxicity, air pollution in California, the primary sources of air pollution, chemical reactions leading to secondary pollutants, and the characteristic symptoms of plant damage.

Dr. Mudd has a joint appointment in the Department of Biochemistry at the University of California and in the Statewide Air Pollution Research Center. His research interests include the biochemical effects of air pollutant oxidants and the importance of lipids in biological membranes.
