MORE THAN 1,900 MATHEMATICIANS EXPECTED
FOR MEETINGS AT UM IN AUGUST 1973

MISSOULA---

More than 1,900 mathematicians from across the nation are expected to stream into Missoula during August 1973 for their annual summer meeting, which will be held on the University of Montana campus.

Last month in San Antonio, Texas, the American Mathematics Society and the Mathematical Association of America voted in favor of holding their annual summer meeting in Missoula from August 27-31, 1973.

During their five-day conference, the organizations will make use of many UM facilities. According to Dr. Howard E. Reinhardt, professor and chairman of the UM department of mathematics, the conference will necessitate reserving space in the University Center, all dormitories, numerous classrooms and the conference room in Main Hall.

The UM Library is also making arrangements to accomodate the mathematicians.

Previous meetings of the mathematical associations have been massive. Last year in Eugene, Ore., nearly 1,500 members were in attendance. This year, the conference in Laramie, Wyo., expects to host as many as 1,900.
