ENVIRONMENTAL COURSE
MARCH 31-MAY 28
AT U OF MONTANA

MISSOULA--

A course entitled "Man's Environmental Challenge" will be offered without charge at night during spring quarter at the University of Montana.

Classes for the 10-week program will meet Tuesdays and Thursdays each week from March 31 to May 28. Classes meet at 7:30 p.m.

Gordon Malin, a UM graduate student from Florence who is helping to organize the program, said the classes will be open to anyone in Missoula and vicinity of high school age and up. Classes will meet in room 11 of the Liberal Arts Building (LA) on the Missoula campus.

Either graduate or undergraduate credit will be offered to those taking the two-credit multi-discipline course, Malin said.

Dr. Richard E. Solberg, dean of the UM College of Arts and Sciences, will give the first lecture March 31. His topic is to be named. Dr. Solberg's office, LA 101, is information center for the program. He may be reached by phoning 243-2682.

Malin said the educational committee of the UM Environmentalists established the course "to more thoroughly inform the general public about the various aspects of the environmental crises as we see them."

On Mondays and Wednesdays during the quarter, the course participants may meet at the homes of faculty members teaching the course. Malin said the alternate-night meetings during the 10-week program are optional, however.

A term paper will be one of the requirements for those taking the course for University credit.

Two UM faculty members, Dr. James W. Cox, associate professor of chemistry and education, and Richard W. Behan, associate professor of forestry, were advisers for setting up the course.
