$21,800 NSF Grant Awarded to Professor at U-Of Montana

MISSOULA--

Dr. George W. Woodbury Jr., an assistant professor of chemistry at the University of Montana, Missoula, recently received a $21,800 grant from the National Science Foundation.

The grant, which becomes effective July 1, will support Dr. Woodbury's research on "Surface Tension Calculations for Lattice Models of Liquids" for two years.

The research involves a study of the surface properties of a theoretical model for fluids. The surface tension and the change in density through the surface will be calculated at various temperatures.
