This Syllabus is brought to you for free and open access by the Open Educational Resources (OER) at ScholarWorks at University of Montana. It has been accepted for inclusion in University of Montana Course Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.

MATH 341 INTRODUCTION TO PROBABILITY & STATISTICS
SYLLABUS

Instructor: Rudy Gideon

Coverage

1. Discrete sample spaces, probability, conditional probability, independence, counting techniques (combinations and permutations).
2. Discrete random variables, distribution function, expectation, variance, Binomial Theorem and distribution.
3. Introduction to statistical consideration, hypothesis testing and confidence intervals for a Binomial parameter.
4. Hypergeometric, geometric and Poisson Distributions.
5. Continuous random variables; general concepts, distribution function, expectation, variance.
6. Uniform, exponential and normal random variables.
7. Central limit theorem and weak law of large numbers.
8. Sums of random variables.
9. Computer Language Mathematica is used to illustrate some of the concepts.
