**Course Description:**

This is a one-semester course in the basic principles of macroeconomics. The course focuses on the causes and solutions for the instability inherent in market economies, especially the problems of inflation and unemployment. In so doing we have to look at the interactions between workers and consumers, business firms, government, and the financial institutions. The course will also focus on the economic effects of money, government fiscal policies, and trade balances.

**Textbook**

Principles of Macroeconomics, by K. Case and R. Fair, 6<sup>th</sup> ed., Prentice Hall  
Study Guide for Principles of Macroeconomics, T. Beveridge (Optional)

**Course Objectives:**

- To understand the interactions between macroeconomic variables within a capitalistic market economy.
- To understand the dynamic changes happening over time within a country's economy.
- To understand the effects of government monetary and fiscal policies on the economy as a whole.
- To understand the effects of globalization on a domestic economy.
- And to prepare students for further study in the field of economics or any academic discipline.

**Course Workload:**

- Students are expected to attend class regularly and keep up with assigned readings.
- There will be no assigned homework. In lieu of graded homework, quizzes will be given in accordance with the material covered. Dates of quizzes are indicated on the attached schedule. Only one missed quiz can be made up, and that will be immediately after the final exam.
- Two mid-term examinations and a final exam will be given on the dates indicated on the schedule. No make up exams will be given. Instead, if the first exam is missed, the second will be doubled, if the second exam is missed, the final will be weighted more. The final exam is mandatory.
- A simple four-function calculator is required.

**Grading:**

10 quizzes	15%
First mid-term exam	25%
Second mid-term exam	25%
Final exam	<u>35%</u>

**SCHEDULE**
