COURSE TEXT:  

COURSE DESCRIPTION:  
This course will focus on the historical underpinnings of scholarly work as well as current and future trends in curriculum. This knowledge will provide students with a foundation to guide their actions in the area of curriculum leadership.

COURSE OBJECTIVES:  
As a result of the successful completion of this course, students will be able to:  
1. Address contemporary curriculum issues from a historical perspective;  
2. Articulate their individual curriculum philosophy;  
3. Understand the development process of curriculum;  
4. Evaluate the strengths and weaknesses of various curriculum plans;  
5. Articulate responses to interview questions regarding curriculum leadership.

EXPECTATIONS:  
Students enrolled in this course are expected to demonstrate regular and consistent class attendance and participate in all activities and discussions in a manner that adheres to the Professional Standards for Student Performance (see page 4) and promotes a scholarly environment where diverse ideas are tolerated and discussion is supported by informed opinion.

Students are required to be current in the assigned reading for the course and to submit required assignments in a timely manner. Late assignments will be accepted only by prior consent of the instructor.
Written assignments will reflect the individual’s original work and follow the American Psychological Association (APA) style. All references to works by other authors must be properly cited.

ASSIGNMENTS:
In addition to the assigned reading and expectations of class participation there will be 4 required assignments for this course.

Each student will:
1. Complete a Historical Perspective Paper by reading a seminal piece of writing (book, report, or book chapter) from a scholar in the field of curriculum [See Wiles (1999), pp. 6-25]. Summarize the selected scholarly work and comment on its appropriateness or lack of appropriateness to a contemporary curriculum issue;
2. Present a written summary of their Historical Perspective Paper to the class (3-5 pages);
3. Articulate their philosophy of curriculum and curriculum development in a written philosophy statement; and
4. Articulate the process they will use to analyze and develop curricula by completing a Curriculum Improvement Position Paper.

GRADING:
Grading for the written assignments is explained below.

An “A” is an indication of excellence. Excellent work is complete, original, technically sound, and fully supported with scholarly citations. Excellent research examines the “known” and takes it into the realm of the unknown. It takes known ideas or concepts and develops them or gives them new meaning through novel applications.

A “B” is an indication of good work. It is complete, technically sound, has some scholarly citations and adequately addresses the subject of the assignment. The main missing ingredient is the development of original ideas.

A “C” is an indication of average work. It covers the assignment and little else and lacks adequate scholarly citations.

Unacceptable papers are those that do not meet the requirements of the class assignment. They are often papers or parts of papers from other classes or consist of research that the writer finds more interesting than the class assignment. Papers that are plagiarized, either by direct copying or a lack of adequate citation are unacceptable and will be graded accordingly.

Grades will be determined by the following weighted formula:

| Assignment                                | Weight (%)
