**The University of Montana**  
**Department of Health and Human Performance**  
**Dr. Brent Ruby (and others)**  
**HHP 594 Seminar: HHP Graduate Research - 1 credit**

**Course Description :**

The Department of Health and Human Performance includes a diverse group of students and faculty. Current research includes metabolic studies in Exercise Science, Aids awareness in Health Promotion, and the use of Imagery in Exercise and Performance Psychology. Traditionally, our Departments involvement with graduate student research increased during the spring semester. Therefore, the purpose of this seminar is to provide a forum for faculty and students to discuss ongoing, present or perspective research.

**Format :**

One 50 minute discussion each week. Each week we will establish a new topic and/or review of previous research. Although some students may register for the course, it is an open forum and all graduate students and faculty are encouraged to attend. Because of the time, please feel free to bring lunch.

**Course Expectations:**

The expectations associated with this course include participation in discussions and presentations of new ideas. Although you may not be registered for the course, you are encouraged to volunteer as a presenter. This is especially true if you are a planning to collect data this semester.

**HHP 594 - Graduate Seminar - All are welcome**  
**Semester Schedule - McGill 114**  
**Fall 2001**

<b>September</b>	<b>Topic(s)</b>	<b>Presenter(s)</b>
