This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.
PT 563 - Fall 2001
Pathophysiology of Exercise

Course Coordinator:

James Laskin, M.S., P.T., Ph.D. (candidate)
Office: Skaggs Building, room 105
Phone: 243 - 4757
Email: jlaskin@selway.umt.edu
Office Hours: by appointment (individual or groups)

• Credits: PT 563 (3 units)
• Lecture Times: Monday and Wednesday - 10:10 AM to 12:00 PM
• Laboratory Times: - TBA

Required Textbooks:

American College of Sports Medicine, *ACSM’s Exercise Management for Persons with Chronic Disease and Disabilities*. Human Kinetics, 1997

Supplemental Readings:

Selected readings will either be available in required text from another course, a master copy will be placed in a binder in the student area, or online at Network Neighborhood/Skaggs-03/PTherapy/Pt2/PT 563.

Unit Description:
This course is designed to assist you in synthesizing your knowledge and practical experiences in designing and implementing exercise programs as a physical therapist. It is the next logical step in the path you have followed from basic physiology to exercise physiology, through pathology and therapeutic exercise. Now that you have had a structured clinical experience you are ready to put all of this information and experience together and fine tune your skills. During this course we will review basic adaptations to an exercise stimulus, review, explore, and practice the principles of exercise prescription and assessment, be exposed to a health promotion model for people with physical limitations, and ultimately help you develop a model of practice - critical pathway. The course will cover cardiac rehabilitation, which will use as an example to work through the process of assessment, planning, implementation, reassessment, plan modification, and evaluation. In addition we will take the opportunity to identify the basic principles of motor learning and apply them to practice. This is a new course full of new ideas and concepts. It will require your full participation, patience, and feedback to be successful.

Unit Objectives:
To be handed out separately.

Unit Evaluation:

<table>
<thead>
<tr>
<th>Exercise Evaluation Lab Report</th>
<th>25 points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Motor Learning Lab Report</td>
<td>25 points</td>
</tr>
<tr>
<td>Group Presentation</td>
<td>100 points</td>
</tr>
<tr>
<td>Final Exam</td>
<td>100 points</td>
</tr>
</tbody>
</table>

Proposed Unit Schedule:

<table>
<thead>
<tr>
<th>W-Sep 6</th>
<th>Course Introduction, Discussion of Clinical Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>M-Sep 11</td>
<td>Adaptations to Exercise Review</td>
</tr>
<tr>
<td>W-Sep 13</td>
<td>Adaptations to Exercise Review</td>
</tr>
</tbody>
</table>
