TEXTS: Public Budgeting Systems, 8th ed. by Lee, Johnson, and Joyce (Required)

The New Politics of the Budgetary Process, 5th ed., by Aaron Wildavsky and Naomi Caiden (Required)

COURSE DESCRIPTION

PSc 505 is designed to allow graduate students to develop an understanding of public budgeting and financial management. A wide variety of topics will be covered including a survey of the major literature, theories of public finance, major figures, and the politics of budgeting. The class will include a survey of the historical development of budgeting in the United States, beginning with the classical period of PA through the contemporary era. A special emphasis will be given to comparing differences between public and private sector budgeting and financial management. The political context in which budgeting occurs will also receive special attention. Although PSc 505 is a "survey course", the course will blend theory and practice. Students will be exposed to the dynamics of the budgetary process (i.e. budget development, budget execution, etc.) and will develop skills that can be taken directly to a job. The course requirements (described below) include analyzing a government budget. Please note that the focus of this class is NOT on writing budgets; the course focuses more on general public budgeting and the politics of budgeting. The main textbook, Public Budgeting Systems, is an extensive text and a number of chapters are omitted for this class.

PSc 505 seeks to achieve three primary objectives. The first objective is to provide students with a general understanding of public budgeting by reading and discussing classic and contemporary literature. Students will be exposed to the basic theories, concepts, and terms associated with the budgetary process. Students’ proficiency will be assessed via a comprehensive exam. The second objective is to enhance students’ ability to write concise reports about budget subjects. This objective will be accomplished by having students write article critiques. The final objective involves analyzing a real government budget, writing a report. Students’ proficiency will be assessed via the written report.

Upon completion of PSc 505, students should be able to:
1). Demonstrate knowledge of the history, evolution, and development of public budgeting in the United States

2). Demonstrate knowledge of the fundamental terms and concepts associated with public budgeting

3). Demonstrate proficiency at writing concise reports that deal with complex material

4). Demonstrate the ability to analyze a public budget

COURSE REQUIREMENTS

The general requirements include one exam, a research project, and participation (which includes the article summaries). The grade weights are specified below. All work is due July 28 -- the last day of class.

Book Report ............... 20% (Due July 23. This is a five page book report on the Wildavsky and Caiden budgeting book -- *The New Politics of the Budgetary Process*)

Research Project........ 40% (July 23) *This grade is a written report that analyzes a public budget*

Participation ............... 20% (Based on five, written *Article Summaries from the Hyde book* or other sources, such as *Governing Magazine*, especially the February edition. You may use other outside sources for articles so long as they relate to budgeting or public finance) *Due July 23*

Discussion Board ......20% (This is based on your participation in the weekly *Discussion Board*. All students must respond to three questions)

Exam (There is not an exam in this version of PSc 505)

Article Critique Guidelines

Each student must complete five (5) article critiques or summaries. *They are due July 23.* [Click here for a sample article summary.]

1. What is the major subject and theme of the article?

2. What is the major question the author addresses?

3. What techniques, tools of analysis, or methods are employed to answer the question?

4. What major points does the author make?

5. What do the author conclude? What suggestions are made?

6. What is the relevance of the article to theory or practice? (What does it mean?)

Budget Analysis Paper

This project involves selecting a budget and writing a 10-12-page analysis. The purpose of the project is to provide an opportunity for students to analyze a "real" government budget. *Examples of past budget analysis papers can be placed on reserve in the library for students that are near Missoula.* Students should select a government budget of personal interest and perform an analysis using some of the tools and methods covered in the class. Typically, papers contain an analysis of sources of funding (revenues) and expenditures. Additionally, papers often contain a description of the politics of the budget. *Do not pick a budget that is too large.* Often students select a single department of a city rather than the whole city budget because the budgets of cities the size of Missoula are simply too large to effectively analyze in such a short paper. The budget can be a nonprofit agency.

This year there is a sample budget paper from the last class to use as a sample. [Click here to view the document, which is in Word. This is a sample paper from the last time PSc 505 was taught online and is not intended to be template that everyone has to follow. In the traditional version of this class, there is also a budget presentation where students typically*}
use PowerPoint or similar software for a 30-minute presentation. The purpose of this project is to produce a document that you would present to a city council, city manager, etc. With the online version, we do not have a presentation; just the written document.

There is also one of my own papers that I do each year on the Montana state budget for a roundtable at the Annual Meeting of the Western Political Science Association. You will note that it is short and covers a whole state. For those of you looking for a "model" or "format" to follow, click the link below. Please note that this is NOT the only format and it may not be applicable to the budget that you select.

The National Debt and some important statistics

One of the most widely discussed topics in government budgeting and finance is the size of the national debt, which was $9 trillion (September 2007). For a comparison, the debt of the nation -- public and private -- is show below. Please note that the size of the private sector's debt is much larger than the national public debt. There is a national public debt clock that shows updated figures at http://www.brillig.com/debt_clock

Public Sector Debt (2006)
Federal Government Sector debt - $9 Trillion
State & Local Government Sector debt - $2 Trillion

Private Sector Debt (2006)
Household Sector debt $12 Trillion
Business Sector debt - $9 Trillion
Financial Sector debt (domestic) - $14 Trillion

* The figures shown above exclude some types of debt; the figures have been rounded

Source: Various government reports summarized and cited at http://mwhodges.home.att.net/debt-summary-table.htm

The United States' Gross National Product ranks first among the nations of the world at slightly more than $14 trillion in 2006; the United States also ranks first using Gross Domestic Product ($13 trillion). Japan ranks second with a GDP of $4.5 trillion.
