The Course: IS 371 introduces Visual Basic 6.0 as an applications development tool. Students will learn structured programming concepts and will develop attractive and effective user interfaces.

Objectives: By the end of the course, students should be able to:

- Create forms for input and output
- Create common forms of user interfaces such as list boxes, check boxes and option boxes
- Program sequences, loops, and decisions
- Use Visual Basic built-in functions
- Debug projects
- Utilize arrays in programs
- Manage files and data
- Create moderately difficult applications

Text: *Programming Business Applications with Visual Basic 6.0* by Burrows and Langford

Evaluation: Exams will be in the lab and require that the student complete projects during the exam period. Make-up exams will be given for students who can document illness or extenuating circumstances. **Please notify the instructor immediately if you must miss an exam.**

Homework projects will be collected and graded and are expected to be the individual's own work. You may drop your lowest homework score. **No homework will be accepted late.**

Partial credit will be given for incomplete homework.
