Course Description & Objectives

The course introduces students to the legal and institutional setting of the U.S. public-administration system and to organizational dynamics and processes of public management. The instructor emphasizes the case-analysis approach as an aid to learning about administrative practice. Most cases highlight actual challenges of public administration that call for perceptive and skilled management responses. In addition to enhanced understanding of the fundamental concepts and issues of public administration (including the evolution of public administration as a field of study, major organizational theories, private/public administration interfaces and dichotomies, budget preparation, ethical dilemmas, approaches to public service, the role of career officials in the policy process and political context, challenges to effective management, and the comparative/global perspective), students should develop the ability to apply theoretical insights, personal values, and social-science findings to challenging organizational and ethical situations.

Required Texts

(2) Fac pac available at UC bookstore

Course Requirements

In addition to leading class discussion of selected cases, each student is responsible for individual writing projects that apply useful approaches and research findings to challenging situations in public administration.

20% Budget cuts analysis (*6 July)
10% Short written case analysis (*13 July or *25 July)
30% Student’s own case (23 July) & case analysis (31 July)
20% Debate
20% Class participation
