**Writing Assignments**

The following writing assignments are to be 3-4 pages in length, typed, and double-spaced. They require you to choose a small organization or organizational unit in a large organization with which you are familiar and which has a relatively clear and distinct mission (e.g., a school, nonprofit agency, government agency or bureau) and to apply your analysis to this organization. Some advice:

1. Your goal is to pack as much analysis as possible into relatively few pages. This requires you to walk a fine line between succinctness on the one hand and depth of analysis on the other.

2. Write a brief introduction that introduces the literature, the relevant theory of excellence, and the purpose of the paper. Introduce the theory under study as follows: Theory such-and-such holds that organizational excellence is achieved by [doing] x, y, and z.

3. Create subheadings and subsections for each core concept in the relevant theory of excellence. Begin each subsection by defining the core concept at issue.

4. Make sure the body of the paper provides no analysis of, or judgment about your organization. Just describe how your organization would look and operate under that particular theory of excellence.

5. Where appropriate make specific references to the readings so that the professor can tell that you have read and understood them (no footnotes required). Example: “Taylor believed, for example, that . . .”

**Note:** Rewrites will be allowed only on assignment #1.
Writing Assignment #1 – Scientific Management Theory

Write an essay analyzing scientific management as a theory of organizational effectiveness by identifying its core concepts and describing what your organization would look like (how it would be structured, managed and/or operated) if it were organized strictly in accordance with scientific management theory. As you will say in your introduction, the purpose of your paper is to explore the relevance of scientific management theory to your organization as it continues its pursuit of excellence.

Close with an assessment of the relevance of this theory to your organization, assuming you are committed to the pursuit of excellence (i.e., what elements of this theory are relevant to your organization and which would you incorporate into your theory for achieving organizational excellence?) Your final subheading might be “Relevance for Organization X”.

Writing Assignment #2 – Human Relations Theory

Repeat Assignment #1, but this time utilizing human relations theory (Mayo/Roethlisberger).

Writing Assignment #3 – Human Resources Theory

Repeat Assignment #1, but this time utilizing human resources theory (Likert/McGregor/Argyris).

Writing Assignment #4 – Total Quality Management Theory

Repeat Assignment #1, but this time utilizing total quality management theory (Deming/Juran).

Writing Assignment #5 – Symbolic Management and Leadership Theory

Repeat Assignment #1, but this time utilizing symbolic management and leadership theory (Ouchi/Peters/Stone).

Final Exam Question

Write on the following question, using proper essay style and providing enough explanation and analysis to demonstrate that you have mastered course content well (3-4 typed, double-spaced pages)

Outline your “general theory” of organizational excellence as drawn from the schools of thought studied this semester (not necessarily all of them). Introduce the core concepts that comprise your theory in the introduction, and then explain how each core concept contributes to organizational excellence as part of an integrated theory. (Do not apply your theory to a specific organization as you did in earlier assignments).
CRITERIA FOR GRADING ANALYTICAL ESSAYS

Thoroughness of answer 1 2 3 4 5 x6 =
Sophistication of analysis 1 2 3 4 5 x6 =
Organization and logical development 1 2 3 4 5 x5 =
Clarity of expression 1 2 3 4 5 x3 =

GUIDES TO UNDERSTANDING THE CRITERIA

1. Thoroughness of Answer

The best essays respond to each question thoroughly and with sufficient detail to demonstrate that the subject is fully understood.

2. Sophistication of Analysis

In the best essays, the author does much more than just explain or describe. He or she shows evidence of having thought about the subject in depth. The subject is analyzed from many angles and assessed critically.

3. Organization and Logical Development

The best essays show evidence of prior planning as if they had been outlined in advance. They have a purpose and/or theme which is introduced in the introduction, developed in the body of the paper, and returned to in the conclusion.

Paragraphs are well constructed and linked to each other in a logical sequence using transitional sentences and subheadings as needed. Arguments, examples, facts, opinions, and details explain the main point and lend credibility to each point being developed.

4. Clarity of Expression

In the best essays, words are chosen carefully and sentences are constructed purposefully so that each point the author makes is expressed as exactly, precisely, and clearly as possible.

5. Grammar, Punctuation, and Spelling

The best essays are characterized by consistently correct grammar, punctuation, and spelling. Verbs agree with subjects. There are no single-sentence paragraphs or sentence fragments.

One point will be subtracted for each single-sentence paragraph, verb-subject disagreement, sentence fragment (incomplete sentence
