# Speaker: American impression of Islam wrong

By JIM BRUGGERS  
Montana Kaimin Reporter

The United States has gotten the wrong impression of the Islamic world.

That's what Sayyed Hossein Nasr told about 75 people at the University of Montana last night.

Nasr, an Iranian who is considered an expert on the world of Islam, said Moslems are not "the completely fanatical mass of shouting people begging for a unified Islamic state," as many people believe.

Moslems are not out to conquer the world, he emphasized.

And Nasr added that some people in the United States are using this false Islamic impression for political advancement.

Nasr delivered a lecture to a Religious Studies class yesterday morning, talked to a group of people in the afternoon about Islam and nature and gave a speech in the Science Complex last night on "Islam in the context of a modern world."

(See related story, p.8)

In his speech last night, Nasr, a professor at Temple University, traced centuries of Islamic history in an attempt to help people understand the religion.

Many misconceptions of Islam stem from a small group of Moslems who were educated in the

West during the 1800s, he said. These "modernists" wrote about changes of the Islamic people resulting from modernization, but did not write about traditional Islam—the philosophy of Islam, he added.

To this day, he said, "most

understanding of Islam is wrong and actually downright idiotic."

Nasr said English-speaking people have not read an accurate account of history. In fact, he said, much of Islamic history has been left out of history books.

He likened the role of Islam in world history, as reported by English-speaking historians, to that of a water boy in a basketball game.

During the first half of the game, Islam is selling beans on mats while the Greek and Roman philosophers were playing, he said.

Then, at half time, the Moslems came out on the floor and did some math, chemistry and astronomy, he added. But when the second half started, Islam went back to selling beans, he said.

This is not a fair assessment of Islamic contributions to the world, he said.

The Islamic world has, according to Nasr:

- converted 400 million people to Islam.
- written beautiful poetry that has gone relatively unnoticed.
- created beautiful art.
- contributed to innovative and

## Proposal would cut one tenured position

By DENNIS REYNOLDS  
Montana Kaimin Reporter

Only one of 16.44 proposed faculty cuts is to be accomplished by retrenchment, according to the compromise proposal agreed upon by the administration and the retrenchment review committee.

The proposal recommends that one of the positions in the business education program be cut through retrenchment.

Retrenchment is the termination of tenured faculty positions for financial or programmatic reasons.

Donald Koeppen, professor of business education, said yesterday that he had not been told which of the three faculty members in the program would be cut.

The proposal makes the deans of the areas targeted for reduction responsible for deciding which faculty members are to be cut.

Albert Yee, dean of the School of Education, was out of town and so could not say which business education position is to be eliminated.

Other means of cutting faculty suggested in the proposal are reassignment of faculty to administrative positions, attrition and program discontinuance.

Attrition is the cutting of positions vacated through retirement, resignation or death.

Copies of the proposal, which is a compromise agreement between

University of Montana President Richard Bowers and the student-faculty committee that reviewed his original retrenchment proposal, were made public for the first time yesterday.

The reductions and the areas in which they are to occur are as follows:

- College of Arts and Sciences—7.05 positions through attrition, two positions through reassignment and one position through discontinuance of the Italian program.
- School of Education—two positions through attrition and one through retrenchment of a business education position.
- School of Forestry—.89 positions through attrition.
- School of Fine Arts—.5 positions through reassignment.
- Summer program—two positions through undisclosed means.

Domenico Ortisi, professor of foreign languages, said the Italian program is being discontinued by dropping the bachelor of arts degree in Italian.

He said, however, that he would continue teaching Italian until he retires sometime within the next three or four years.

In an interview yesterday, Bowers said the 16.44 faculty reductions probably will be confirmed by the Board of Regents.

The regents are to make the final decision on the reductions at their meeting in Helena Monday.

Walsh also said he was pleased with student support for the UTU's position. He said informational pickets set up Friday and yesterday in front of Main Hall drew large numbers of students. He added that "only two out of 200" had not been supportive of the UTU.

Walsh said the UTU negotiating team would press for a 13 percent cost-of-living wage increase in the negotiations, but he acknowledged that compromise also would be involved.

"However, we think that 13 percent is pretty darn important," Walsh said.

Members of the UTU bargaining team are: Richard Barrett, professor of economics; Charles Bryan, professor of mathematics; William Derrick, professor of mathematics and leader of the team; Karen Driessen, assistant professor/librarian, and Richard Withycombe, professor of business management.

Walsh said the UTU is urging faculty members to picket Main Hall at 2 p.m. today in a "demonstration of concern" for the negotiating session.

## UTU, regents to meet; strike being considered

By RICH STRIPP  
Montana Kaimin Reporter

A bargaining session set for today between the state Board of Regents and the University Teachers' Union will be "a very pivotal meeting," according to UTU president James Walsh.

The bargaining session is to begin at 2:30 p.m. in Main Hall.

Walsh, professor of psychology, said yesterday that the UTU, which represents University of Montana faculty, is considering six courses of action if the meeting is not settled to its satisfaction.

The options include: a strike; a boycott of graduation ceremonies; ending Spring Quarter classes on May 23; refusing to issue Spring Quarter grades; refusing to teach summer school; and urging the Faculty Senate not to approve graduation lists.

Walsh would not disclose the results of polls taken over the weekend asking faculty members which course of action the UTU should take.

However, he did say Friday that faculty support was "excellent."

## Bad habits help the Grim Reaper

By STEVE VANDYKE  
Montana Kaimin Reporter

According to a computer that figured out my health risk, my age is 27. According to my mother, I am 20.

Two weeks ago I filled out a questionnaire, had my blood pressure checked and gave samples of blood for a cholesterol test at the University of Montana Student Health Service. The results were plugged into a computer and last Wednesday I received my Health Risk Appraisal.

I received two computer printouts. One assessed my health risk now and another projected my health risk 25 years into the future.

Mark Twain once said reports of his death were greatly exaggerated. So is my health risk.

On my current health risk, my four biggest chances of death are a motor vehicle accident, suicide, homicide and poisoning.

Car wrecks are violent. I have had nightmares of violent car wrecks. Why must I die in a violent car wreck?

According to the Health Risk Appraisal, I have three contributing factors. I travel by vehicle 10,000 miles a year. I often do not wear a seat belt. I drink alcohol.

Good Lord! My home is in eastern Montana. Of course I travel at least 10,000 miles a year. That figures out to one or two trips home a year.

I refute the seat belt charge for two reasons. One, no one buckles up to drive to school at 7 a.m. and to go home at midnight. Two, I had to put seat covers in my car and was too lazy to cut out slots for my seat belts.

Gee whiz, at least I did not lie on the questionnaire. That is how the computer caught me on the alcohol charge. Too bad, silly computer, I never drive after I have been drinking. Do not assume anything.

As far as I am concerned, the only reason why I have a chance of being in a car wreck is because I do not smoke. If I smoked, the computer could have killed me off with lung cancer.

But no, I do not smoke. So the computer has to dig into its memory bank to snuff me out in a violent car wreck.

If a car wreck is not blatant enough, the next three

health risks do not even have contributing factors listed.

I have 26 more days left before graduation. I am certainly not going to commit suicide now.

How can I be murdered when I do not have an enemy in the world? That alleviates homicide.

As far as being poisoned, this might be a definite possibility if I were living on campus and still eating at the food service, but I am not.

The computer also says that if I work real hard my "achievable" age is 12, that is, I could attain the robust vitality of a 12-year-old. Who wants to be 12 and have to go through the "three P's" again: Pimples, Puberty and Proms.

My projected health risk is no better than the first one. Now it says I am 45 years old, but the computer thinks I am 47. If I tried, I could be 39.

Instead of dying in a violent car accident, I shall die from arteriosclerosis—hardening of the arteries. At 45, I may be able to pronounce it.

• Cont. on p. 8.

# Boycott least harmful of UTU power plays

While an early end to the quarter might sound inviting for a minute or two, few people would seriously consider it much longer than those few minutes.

Yet members of the University Teachers' Union are considering it as one of six ways—all of which would hurt students—to protest ongoing salary negotiations.

Somehow, that just doesn't seem right.

Sure, one of the benefits of a union is greater bargaining power, but that power should not come at the expense of the students.

The actions being considered by the union are:

- calling a strike.
- ending classes May 23.
- refusing to issue grades until a

settlement is made.

- urging the Faculty Senate not to approve graduation requests.

- refusing to teach summer session classes.

- boycotting graduation ceremonies.

The list should make students more than a little angry.

The union manned informational pickets in front of Main Hall last week and yesterday to protest, and rightfully so, ongoing salary negotiations. Not only have the negotiations made slow progress, but offers made by the Board of Regents' representatives are pathetically low in comparison to the increase of the cost of living. UTU representatives have termed the offers "ludicrous and insulting."

But have they thought to ask

themselves if students might not find their actions ludicrous and insulting?

Faculty members have every right to be outraged about their salaries.

Yet they do not have the right to let that anger affect fulfillment of the purpose for which they were hired—to provide an education to people who are paying for and expect to get one.

Five of the proposed courses of action—a strike, an early end to classes, non-approval of graduation lists, not issuing grades and not teaching this summer—show a disregard of the students, who are the main reason any faculty members are here at all.

The least harmful, and still quite effective, alternative would be a boycott of the graduation ceremonies.

It would allow completion of this quarter's classes and, at the same time, make a strong statement to all the friends and relatives of graduates about how unrealistic salary offers have been.

Approving any of the other alternatives would be a dangerous power play—one that would draw more criticism than support from regents, students and taxpayers alike.

If the faculty is going to use its bargaining power, it must do so judiciously.

While a graduation boycott would be about the mildest action the UTU could take, it would also be the wisest.

## letters

### Extremely poor taste

**Editor:** This is in regard to a political statement that was printed Friday, May 2. It appeared on page 10 and concerned joining one of the branches of the armed forces. It stated: "Join the Army; Travel to exotic distant lands; Meet exciting, unusual people and kill them," a picture of an ROTC cadet accompanied this statement.

I personally believe that this was done in extremely poor taste. My first objection was that a political statement was printed someplace other than the editorial page. I proceeded over to the Kaimin office first to find out why they would even print this and secondly why in the section they did.

At the Kaimin business office I was told by one of the people that it was an "advertisement" and it had been paid for and run by the paper. This infuriated me even more. The newspaper we fund through ASUM was paying for an advertisement out of their funds. There are laws that state student funds may not be used for these purposes.

I then sought out Ms. O'Connell to discover the rationale behind publishing this statement. She responded by saying she did not see it till after it was printed because she does not proofread the paper. She then directed me back to the business office and said the paper was not responsible for this ad.

When I spoke to the people in the business office they refused to say who purchased this ad, but stated that it was done "as a joke" and was just "satire." I fail to see why anyone would pay \$75 to \$100 for an advertisement to be viewed solely as a joke.

I also do not understand why I am unable to discover who made this political statement. The Kaimin demands signatures on all other opinions and correspondence,

why not here? Why in the lower right corner of the "advertisement" did the words "This is a paid vacation" appear? The Kaimin can't have anything to hide can they?

I understand the First Amendment and rights of the individual, but this is a student newspaper. Funding comes from the students, we should have the right to know.

I will not feel satisfied with just printing this letter, I would like a few questions answered:

- 1) Who authorized the printing of this statement?
- 2) Who paid for it?
- 3) Were student funds directly or indirectly involved?

Greg Brooks

senior, political science

**Editor's note:** All pages of the Kaimin are proofread by either the editor or the managing editor. The Kaimin does not censor its advertisements.

### Student gardens

**Editor:** A student gardens committee has formed with the goal of finding an area where students staying in Missoula for the summer will be able to grow some of their own food.

Petitions in support of acquiring land for gardens are being circulated on campus and are posted at the ASUM office and the University Family Housing office. If you support student gardens please sign a petition by Thursday, May 15.

Mike Kadas

member, student gardens committee  
132 University Ave.

### Psycho-Pharm

**Editor:** The "New Science Building," slated for occupancy by the psychology department and the School of Pharmacy sometime next year, needs a name worthy of its occupants and users. The established bureaucratic process for naming buildings entails discussions, debates, motions, counter motions, and eventually some disgruntled agreement on the part of psychology, pharmacy, at least two Faculty Senate committees, the Faculty Senate itself, the College Executive Committee, the deans, the administration, and the Board of Regents. In this election year, even our illustrious politicians may be tempted into the fray. . . . Forget it!

Instead, I suggest that we adopt the unimaginative, yet functional name: THE PSYCHO-PHARM. Those steeped in tradition should remember that a precedent for such a name does exist: The Chem-Pharm. Imagine the benefits of a name like THE PSYCHO PHARM: my colleagues in psychology and pharmacy could claim that they work "in the Pharm." University of Montana administrators can then go to the

state and argue that we have "Pharm programs." The Board of Regents, in its infinite wisdom, may decide to review the agriculture programs at MSU with an eye to eliminating them because they duplicate UM's Pharm programs.

On a more serious note though, THE PSYCHO PHARM would be the only logical place for certain meetings. We could extend an open invitation to the Board of Regents' bargaining team to use our seminar rooms for its meetings.

Nabil Haddad

assistant professor, psychology

### Obnoxious onions

**Editor:** I can't believe how unconcerned everyone at this school is with the problems that beset us and threaten to make our lives a living hell. Every letter, every public forum, every opinion deals with silly, idealistic flights of fancy like imminent nuclear annihilation, federal suppression of students who want to go picnicking on nuclear bases, draft registration, dissolution of extraneous programs (what the hell do you need liberal arts programs like humanities at a liberal arts college for anyway?) and other such foolish nonsense. But no one has bothered with anything that truly touches our daily lives.

I'm talking about the fact that the Food Service slices its onions sideways. You can rant about the Women's Resource Center until you turn blue in the face, but you can't get away from the fact that the onions in the cafeteria are sliced wrong. A properly sliced onion is cut side to side so that each slice consists of a series of concentric rings, not sliced top to bottom into rows of stringy fiber. If you people weren't always so busy trying to halt The Downfall of Western Civilization and The Free World (that's a great title for a class, if anyone

wants it) you would be able to devote more time to matters that truly affect our daily lives. Consider it, and I'm sure you'll come to agree with me.

In the meantime, see what you can do about those onions.

Mark Allen Peterson  
freshman, English

### Suggestions, please

**Editor:** To administrators, faculty and staff: I would like to thank you for your help and support during the recent UM Days program. On April 10-12, 572 high school students and 78 educators from 89 high schools visited our campus. The cooperation of the entire university community was evident throughout the program and we have received many compliments on this from students and educators.

All the students were given an opportunity to receive academic advising from a faculty member, meet with department representatives at the Departmental Fair, and take part in other academic and social activities. Educators accompanying the students could attend credit and noncredit workshops especially designed for them.

We would like to ask for your written suggestions or comments on this year's program so that we can improve upon UM Days 1981. Please send them to Deanna Sheriff, executive director of the Alumni Center, who was the coordinator of this year's UM Days program. If you are interested in helping with the 1981 program, please notify the Alumni Center staff. The date has been rescheduled for April 9-11 due to campus requests.

Thank you so much for all your efforts on behalf of the University.

# Adventurous learn rock climbing in center course this quarter

By DWIGHT McDANIEL  
Montana Kaimin Reporter

"On belay?" Jennifer Thompson yelled up the rock wall where the climbing rope, which was attached to the harness around her waist, disappeared.

The sound of Kootenai Creek, rushing through the canyon a hundred yards below, almost swallowed the reply from above. "Belay on!"

"Climbing," Thompson yelled. She waited for the final word from Kathleen Coyne, who was securing her from the top of the 50-foot outcrop. "Climb!"

Thompson stepped to the cliff, placing a boot on the ledge, her hand around a small rocky knob and started up.

Thompson and Coyne, both working for the Women's Resource Center along with eight other people, were starting the last day of the University of Montana's center course on basic rock climbing.

On two Sundays this month, the class met at the cliffs of lower Kootenai Canyon, which is on the edge of the Bitterroot Mountains seven miles south of Florence and just north of St. Mary Peak.

Dudley Improt, instructor for the course, said that the two days of supervised climbing are designed to provide an introduction to "Technical Mountaineering and Rock Climbing."

But, according to Improt, the purpose of the climbing course is not to simply teach the mechanics of climbing.

He said that relying on a "belayer" for their safety, as well as on themselves, promotes a "greater self-confidence" in the participants.

Improt said that the people who

have completed the two-day course should be able to safely set up and use a top-roped belay.

He said that the course covered:

- Rope handling, which includes the tying of fundamental climbing knots such as the bowline and the figure eight.

- Belaying, which is using the climbing rope for protection in case of a fall. For a top-roped belay, the rope passes from the

(Photo by Susan Kerns.)

climber up and around the waist of the belayer. When a fall occurs, the belayer wraps the rope across the front of his waist, completing the circle of the rope around his body. The climber's fall should then be stopped by the rope within a few feet.

- Rappelling, which is using the rope to lower one's self down cliffs that cannot be climbed down safely.

- Climbing signals, which allow clear and standardized communication between climbing partners even in cases where they

cannot see each other.

The consensus of the people taking the course was that it was not only interesting but also worthwhile.

To some of the class members, the course is an introduction to more climbing.

Linda Mutch, sophomore in botany, said that she did some climbing in Glacier Park last summer without a rope. She added that after almost falling a few times, she decided to learn how to climb properly, and the center course provided that opportunity.

Mike DeNeve, from Florence, who has also spent some time scrambling around in the mountains, said that he decided he should learn something about how to climb before he "killed himself."

And there are those who took the course simply for the experience of it. Barbara Leech, sophomore in general studies, said she doubts that she will ever climb again. But, she added, "I was glad I was there."

Thompson said that although she probably will not continue climbing, she intends to apply the climbing skills that she learned to hiking situations.

Looking back on the two days of climbing, Thompson said she feels "proud of myself and real enthusiastic about the sport." But she added she was not in a hurry to do it again — at least not right away.

Improt said that the center course in basic rock climbing is offered three times a year. He said that the next class will start May 25.

He added that besides the basic rock climbing course, the Adventure Education program, which is the outdoor component of campus recreation, offers courses in canoeing, cross-country skiing and basic ice climbing.

## Mount St. Helens keeps scientists wary

VANCOUVER, Wash. (AP) — The bulging on the north flank of Mount St. Helens has slowed some, but not enough to cause wary scientists to relax their technical vigil of the 9,677-foot volcano.

A one-mile by one-half-mile area on the slope had expanded at a regular rate of five feet to six feet a day for several days, but the bulging slowed over the weekend to about three feet a day.

Clear skies Sunday allowed the peak to show off with intermittent belches of steam and ash, while scientists were busy trying to guess its next move.

One geologist has gone so far as to predict that the changing gravitational pull of the sun and the moon could trigger a lava eruption on May 21.

Al Eggers of the University of Puget Sound at Tacoma said the pushing magma and resisting rock within the volcano are delicately balanced. Strong gravitational pull could break that balance, he said.

Scientists for the U.S. Geological Survey placed no significance on the slowdown of the bulge—that it continued to move concerns them enough. However, if the bulging were to increase it could precede a major slide or eruption, scientists have said.

Geologists don't know the strength of the material on the bulging flank and they are not sure of the consistency of the magma

below. Both frustrate efforts to guess a breaking point.

Eggers said gravitational pull, the force that causes ocean tides and also affects earth, could act as the proverbial straw on the straining mountainside.

Earth tides will be at their minimum May 21 and "there frequently have been lava eruptions during such periods on other volcanos," he said last week.

Eggers and his students have monitored the mountain since

earthquakes began a week before the March 27 eruption. Steam and ash have been blown into the air around the mountain in southwestern Washington, but no lava has been seen.

Don Mullineaux, a survey geologist and volcano hazards expert, said Sunday the earth tide theory has applied to some other volcanos.

"But on Mount St. Helens nobody has come up with any results we could go with," he said.

## week in preview

### TUESDAY

#### Meetings

Montanians for Public Power, 7:30 p.m., UC

Montana Room 361 E.

Brown Bag discussion: "Women and the Environmental Movement in the 1980s," noon, UC

Montana Rooms 360 F.G.

Miscellaneous

Forest Service display of proposed Lolo National

Forest plan including proposals for management of the Rattlesnake, 10 a.m. to 4 p.m., UC Mall.

Arts and Entertainment

Student competitive art show, through May 24,

Gallery of Visual Arts, Turner Hall.

Arts and Society Lecture: "Ordering Violence, the

Two Faces of Entropy," Henry Harrington,

associate professor of English, 8 p.m., Missoula

Museum of the Arts, 335 N. Pattee St.

UM Little Symphony Orchestra concert, con-

ducted by Jean-Paul Penin, assistant professor of

music, 8 p.m., Music Recital Hall, free.

# Hmong refugees face adjustment problems

By DEB DAVIS  
Montana Kaimin Reporter

Shopping for your dinner at the local supermarket sounds like a simple task, but what if you could not read the labels on the cans of food, or did not understand which

coin or bill to use when paying the clerk. Perhaps when you left the store you asked for directions to your home but no one understood what you were saying.

Would you feel confused? Frustrated? Frightened?

If the answer is yes, you may understand the problems that nearly 700 Indochinese refugees from Laos and Vietnam now living in Missoula face every day because they cannot speak, read or write English.

Pam Roberts, the local director of the International Relief Committee that is aiding in the resettlement effort, said most of the refugees are illiterate in English. In addition, she said, 95 percent are Hmong, a tribal people from Laos who have no formal written language of their own, and therefore often cannot read or write in any language.

The Hmong migrated from Southern China more than 100 years ago and settled in the mountains of Northern Laos. Many fought with U.S. troops in Southeast Asia against the Communists, who eventually took over Laos and Vietnam in 1975.

Before 1975, Roberts said, several Hmong settled in Missoula when local families and churches sponsored them while they adjusted to American society.

Since the Communist takeover, more than 318,000 Indochinese refugees have fled to the United States, including many Hmong who came to Missoula to join their families.

Several Hmong have attended the University of Montana during their stay in Missoula, Midge

McGuire, UM foreign student adviser, said. At present there are no more than four or five Hmong at UM, she said. They receive some help such as with writing term papers, but there is no program at the university to help them with their English, she said.

Many Hmong have moved on to other cities and states to find work, Roberts said. But Montana, which ranks fifth among all 50 states in the total number of refugees absorbed, still has to deal with those who remain.

"The bottom line to resettling is knowing the language," Roberts said, adding that there have been several efforts to bring the language to the refugees.

There are 50 Hmong at the Trapper Creek Job Corps camp at Darby learning both English and a vocation, she said.

The federal Department of Education has financed classes at the Missoula Vocational Technical Center to teach the refugees English, she said, but this effort is reaching only 129 male Hmong family heads and may not continue indefinitely.

The resources that are available to Montana and Missoula to resettle and train the refugees in English and skills are limited because Montana lacks a comprehensive plan for dealing with the influx of refugees, Roberts said.

She said she is working to get Gov. Tom Judge's "stamp of approval" on a plan so her agency and others can receive federal funds under the Indochinese Refugee Assistance Act for resettlement.

Until the state recognizes the need for refugee assistance, she said, the local agencies are heavily dependent on volunteer help.

It was in response to this need for volunteers that several Missoulians formed the Indo-Chinese Support Group, Bonnie Lee, a group member, said in an interview.

The group recognized the need not only for volunteers to tutor the Indochinese in English but also the tutoring method had to be simple, Lee said.

As a result, she said, the group brought to Missoula a team from the Washington State Literacy Council, which handles that state's literacy programs for foreigners and American natives who cannot read or write English.

This team held a workshop last Monday through Wednesday to train volunteer lay people as tutors in English as a second language, Lee said.

In addition to individuals from Bozeman, Corvallis, Stevensville and Hamilton, there were 28 Missoulians who completed the course and they now form the core of the newly-created Literacy Council of Greater Missoula, Lee said.

Lee said the council is still in the embryonic stage and looking for members. The group will meet May 20 at 7:30 p.m. at the Immanuel Lutheran Church, 830 South Ave. W., preceding an orientation session on Indochinese culture and traditions.

More information on the Indochinese Support Group and the Literacy Council can be obtained by calling Bonnie Lee at 728-1837 and Sara Busey at 543-8037.

## FRIDAY THE 13TH

R

## 'Rolf' claims to heal injured muscles

By STEVE STUEBNER  
Montana Kaimin Contributing Reporter

Got a stiff neck, a sore shoulder, an aching back? Do you feel hunched over? Do you favor one leg over the other? If so, you may need to visit a "rolfer," certified rolfer, Dick Larson, said recently. Larson, the only rolfer in Montana, said "rolfing" is the art of redistributing human muscle tissue in its proper place to provide one with a "center of gravity."

The rolfer, Larson said, can restore muscle shape by massaging the problem areas of the body. The rolfer can discover and heal these areas, he said, by kneading the body with his knuckles, elbows and fingers. The area is healed, Larson said, as the rolfer massages and frees the fascia, allowing the muscle tissue to return to its proper place.

Fascia is the supporting tissue of the body that wraps around and shapes every muscle.

Larson spoke to about 25 people at the Missoula City-County Library. He gave the presentation to educate citizens on rolfing and to let them know that his services are available in Missoula and throughout the state.

Larson said he got interested in rolfing after a rolfer healed his separated shoulder. He then attended the National Institute of Rolfing in Boulder, Colo., where he became a certified rolfer.

Once the fascia and muscle tissue are in their proper places, Larson said, and notice that he has more energy than before. The patient will feel "lighter and feel himself standing tall," he added.

Larson said the displacement of muscle tissue can result from injury or emotional stress. For example,

he said, someone twists his knee, which causes him to limp for a few weeks. The shifting of weight to the strong leg, he said, restructures the muscles not only in the legs but also through the pelvis, up the spine and eventually the entire body. Thus the fascia becomes shortened or lengthened, he said, and throws off the person's gravitational center.

One can also lose his muscle shape from emotional stress in the early years of childhood, Larson said. For example, one might develop the habit of bringing his shoulders forward to defend himself from danger or out of fear, once again throwing off his gravitational center.

Through the use of "before and after" photos of his past patients, Larson explained one's gravitational center is attained when the body's muscles are all in the right place and provide a "central balance." Before, the

patient may have had a neck that stretched out in front of his frame. After his neck was repositioned by rolfing, it rested directly above his frame.

One must complete 10 one-hour rolfing sessions, Larson said, to regain his gravitational center. The program costs \$450, he added.

An American woman named Ida Rolf originated the practice of rolfing. Rolf realized the importance of manipulating the muscles to put them in harmony with the rest of the body. One's emotions cannot be healthy if one's body is not, Rolf said in a movie shown at Larson's presentation.

Larson said there is a difference between rolfing and other massage techniques, because the rolfer actually manipulates muscle tissue and restores one's center of gravity. An ordinary masseur, he said, simply releases tension in the body and does not actually change the muscle structure.

## Mannequin found near murder site

ELKRIDGE, Md. (AP)—A few days after 70-year-old Rebecca Davis was found murdered in the yard of her rural home, a passerby in the area found the mauled torso of a mannequin, stabbed and splashed with red paint, hanging from a tree.

Now other mannequins and pieces of mannequins are turning up in the back roads of this rural community, and residents wonder fearfully if they are a grisly omen of murders yet to come.

Police, interviewed recently, admit they are baffled by the case, dubbed "the mannequin murder."

"It's the mannequins that have gotten the attention and made it unusual but it's a connection we have not been able to verify," said

Lt. Frank Woods of the Howard County Police Department.

"We've discovered nothing that connects them," Woods added.

But even without a definite link between the slaying of Davis, whose body was discovered Feb. 22 at her rural home about 12 miles from Baltimore, and the mysterious appearance of the mannequins, authorities have not ruled out a connection. An autopsy showed she died late Feb. 15 or early Feb. 16.

"There's a good possibility that the first mannequin may have been connected," theorized police information officer Randall Roby.

Roby notes that the appearance of the mannequins has made residents in the area extremely nervous.

## Women's tennis qualifies for nationals with close win

By SCOTT TWADDELL  
Montana Kaimin Sports Editor

The rain "changed everything" at the regional tennis finals of the Association for Intercollegiate Athletics for Women played in Bozeman Friday and Saturday, University of Montana coach Paul Larson said.

UM was favored to win the tournament, and the University of Oregon and Oregon State University were considered to be the next closest contenders, Larson said.

But foul weather forced the games inside where MSU had the advantage, he said. As it turned out, UM won the tournament with 66 points to the Bobcats' 63 and the Oregon schools far behind, he said.

The win qualifies the UM team to compete in the National Finals of the Association for Intercollegiate Athletics for Women to be held in Baton Rouge, La., June 7 to 11.

It is the first time the UM women's tennis team has won the regionals, Athletic Director Harley Lewis said. And it will be the first time the UM team has competed in national finals, he said.

"I don't want to take anything away from them," Larson said of the MSU squad. "They played a good tournament, but I don't think the results would have been the same if the matches had been played outdoors."

The tournament started outdoors on Friday and UM "looked strong," Larson said. Five UM players out of six qualified for the finals in singles competition. "And then the rain changed everything," Larson said. The rain began just as the singles competition was ending, he said.

"The indoor courts were foreign to everyone but the Bozeman players," he said. "They played on them for five months during the winter. The courts were extremely fast, the lighting was poor and it was impossible to hear anything over the noise of the fans."

UM's best doubles team of Birgitte Giaever and Diane Wortman nearly lost to the University of Oregon team, but managed to win the third set 6-3, Larson said. "And that was the bright side of moving indoors," he added.

Cathy McDonnell and Lynanne Otto, UM's number-two doubles team, lost to Mary McDonough and Donna Friedt of MSU 7-6, 7-6.

And MSU scored a major upset in the number-three division when Laronne Davis and Cathy Burke defeated UM's Jane Heintzman and Colleen McNamara 6-3, 6-2, Larson said.

Heintzman and McNamara were seeded first in the division, and had beaten the MSU team easily earlier in the season, Larson said. It was the first loss the pair suffered all season.

By the end of the competition Friday, MSU and UM were even, with six players each competing in the finals.

A few team members said Larson was quite upset with the situation Friday night, and Larson said "I was so frustrated and angered over the doubles losses that I did yell, but I managed to regain my composure and impress upon them that we were going to have to win almost all the remaining matches to win the tournament."

Larson watched every match during the finals Saturday. He was at the courts from 8 a.m. Saturday until 2 a.m. Sunday.

McNamara said that Larson

"couldn't understand why the tide had turned. We had such a good year, and Paul saw it all fading."

In the finals, Giaever, UM's number-one singles player, lost in three sets to MSU's Jeanne Rogers 6-1, 3-6, 6-4.

Giaever said she had trouble adjusting to the indoor courts. "I couldn't see where the ball was coming from," she said.

But not taking anything away from Rogers, Giaever said that

said. "We started with the score at 5-4, and I broke her serve to win it 6-4."

Lynanne Otto won at number three 6-3, 6-4, to remain undefeated for the year at 23-0. And at number four Heintzman won by default.

McDonnell won 6-4, 5-7, 6-2 at the number-five spot. McDonnell played the best she has all season, Larson said.

Larson said that a consolation

THE UM WOMEN'S tennis team is going to Baton Rouge, La., to compete in the national finals of the Association for Intercollegiate Athletics for Women this June. Left to right are Lynanne Otto, Judy Harner, Paul Larson, Diane Wortman, Birgitte Giaever, Juli Eckmann, Colleen McNamara and Jane Heintzman. (Photo by Gordon Lemon.)

Rogers' forehand "was working well, and she had a really good serve."

UM also lost the number-one doubles final. But Larson said that despite the loss, Giaever and Wortman both played well. Rogers and Karen Eggen, MSU's number-one doubles team, won in regionals last year, he said.

"They played more together than we did," Giaever said.

"The no-ad scoring really screwed us up," said Wortman. "We lost at least five games that went to 3-3."

Normally a game goes four points and the winner must win by two, Larson said. Because the match was scheduled to be played on six courts and then had to be changed to two, the coaches decided to use no-ad scoring to speed things up, he said.

In no-ad scoring, the game can go to 3-3, and whoever wins the next point wins the game, Larson explained.

The UM players did make a strong showing in the finals singles matches with Wortman winning a controversial match over the University of Oregon's Carolyn Moseley in the number-two division 6-3, 6-7, 6-4.

Moseley hit a shot that angled out, Wortman returned it and Moseley "put it away," Larson said. But Wortman called the ball out after Moseley's first shot, he said.

The rules state that a call must be made immediately, Larson said, and there was some question as to whether Wortman called it immediately.

She said she did. "I called it out as I returned it," she said. No one could hear her over the noise of the fans, Larson said.

After the game, all the coaches ended up arguing in the middle of the court, Wortman said.

Both Wortman and Larson agreed that, in the interest of sportsmanship, Wortman should give Moseley another chance.

"So I gave her the point, and we played the match over," Wortman

game won by McNamara was the real turning point in the tournament that led UM back for the win.

McNamara soundly defeated a player who had beaten her easily earlier in the season, Larson said.

She showed the other players on the team how they were going to have to play to win the tournament, Larson said.

After UM lost the number-one doubles match, the score was such that if both remaining MSU doubles teams won their matches in the finals, and both UM's doubles teams won their consolation matches, UM would win the tournament by one point, Larson said.

Both UM teams won and one of the MSU teams lost making the final score 66-63.

# Capture Springtime with Mountain Fresh Beer Arrangements

## Traditional

The style of arranging known as Traditional comes from the oldest brewing houses of Europe. These are usually composed of large groupings of mixed containers: a profusion of cans, long-necks, stubbies, half-quarts and returnables. In this particular bouquet, the dogtails, pepperonia twigs, chipsanthiums, and pretzeltunias are accented by the addition of a few sprigs of popcorn willow and pickle-lily.

## American Contemporary

The American Contemporary style stresses originality of composition and line, as well as the use of more unorthodox components. Note how the arrangement above makes full use of popcorn willow, pickle-lillies, and crushed cans — elements that are usually left out of traditional bouquets. The dogs and burgers theme in front is a perfect foil for the hefty quarts in the middle area. Also important is the use of an unusual container, in this case, a sawed-off barbecue grill.

## Oriental

Oriental arrangements are more than just aesthetic groupings of beeraphernalia. They are symbolic presentations of the ideal harmony that exists between man and beer. Skillful use of bonsai pepperonia and popcorn willow blossoms imparts an air of light, mountain freshness to this arrangement. The three different levels, which are created by the quart, half-quart and pickled egg, represent the three incarnations of a Mountain Fresh Rainier: creation, consumption, and recycling.

## The Mountain Fresh Beer Arranging Competition Rules and Information

1. The theme is "The Thirsty Month of May," or "Beer Arranging Hath Charms to Soothe the Savage Thirst!"
2. The competition is open to students of all member colleges and universities of the A.A.B.A. (Association

of Amateur Beer Arranging) Pac Six division.

3. Do not send actual arrangements. Photographic documentation of your entry must be sent to Tommy Pickworth, Department of Beer Arranging, Rainier Brewery, 3100 Airport Way South, Seattle, Washington 98134, on or before July 31st, 1980.

4. Winners will be published in the fall, with full credit, honors and possible consideration for late-night television programming, given to the arrangers and their schools. Decision of the judges shall be final and judges may withhold any award, if in their opinion an arrangement is just too ugly to believe.

Rainier Brewing Company, Seattle, Washington

## lost and found

LOST: SET of keys on a plastic, braided yellow & white cord. If found, please call Susan at 721-3029. 100-4

LOST: SMALL, black, identifiable friendly tape recorder — doesn't bite but eats some tapes. Contains important (to me) tape. Battery will soon die w/out my recharger. Last seen in SC 131. REWARD! I need my music to survive the rest of the school year! 100-4

FOUND: IN THE ORC after the bike sale, 24 lbs. of instant dehydrated applesauce (back pack food!) 1 cup free to all takers! The ORC wants you to get out in the outdoors and so we'll provide dessert! ORC rm. 119, UC. Bring your own container. 100-4

FOUND: 10-speed bicycle in University area. To identify call 4-6 p.m., 243-5300. 100-4

LOST: ONE National Semi-Conductor calculator — please turn in at UC lounge information desk, or call 721-5343 — thank you. 100-4

FOUND: ON Sunday afternoon, a kitten hit by a car — it is doing fine! If it is yours, please call 721-5343 (S. 3rd St. W.). 100-4

LOST: GLASSES with silver wire 1/2 frames. Green case. Call 721-3415 or 243-6172. 99-4

LOST: Blue Schwinn Traveller III 10-speed bike — 19" frame. Last seen in front of Jesse Hall. Call 243-2669. 99-1

FOUND: BLUE VW — obviously stolen from an auto repair class. 99-1

TAKEN FROM Fine Arts building between 4 and 8 p.m., Tuesday. Painting of a Mountain Man on a coyote pelt. Return to where taken from or call with any info. 9539.

LOST: IRISH Setter named "Brandy." She is wearing studded collar with a rabies tag numbered 20007. She was lost from the 2300 block of Highland (in the South Hills). \$25 reward. If found please call 251-3464 and ask for Becki or Randy. 98-4

FOUND: GOLD chain, at Greek Street dance. Call and identify at 543-3692 — Bill. 98-4

LOST: AT the Spring Spectacular — girls' eyeglasses. Brand name — Oscar De La Renta — if found please call 243-5127. 97-4

LOST: SOFTBALL mit with the name "Cherry" written on it. Lost at Brantley Beach. If found please call 243-5176. 97-4

LOST OR STOLEN?: One National Semi-Conductor calculator — useless without the instructions! Reward for return — call 721-5343 — Ann or Jim. 97-4

LOST: BLACK hardback — "Teaching Children With Learning Disabilities" and a yellow notebook for the same class. Lost in LA 204 on Wed., April 30th. Reward offered. Call 243-4140 anytime. 97-4

LOST: SET of eyeglasses between Business building and Field House Friday. Black wirrims. Call 243-5331, ask for Paul or leave message. 97-4

FOUND: NIFTY DRUGSTORE within walking distance of UM. STICK DRUG, 1407 S. Higgins — open 9-9 and Sundays. 74-45

LOST: AT spring spectacular. Jean bibbed overalls. Please Return. License in front pocket. 243-4020. 96-5

An appreciation of nature is more deeply imbedded in the Islamic religion than it is in religions of Western civilization, Seyyed Hossein Nasr, professor of Islamic Studies at Temple University, said yesterday.

The view that "nature is not important for man's salvation" is wrong, Nasr told about 50 people in the forestry building.

Nasr, who was born in Iran, has taught at universities throughout the world and is considered an expert on the Islamic religion.

Islam and the Western world had a lot in common for a long time, Nasr said.

For example, Islamic people were very advanced in the sciences and mathematics, he said, adding that both Islam and Western civilization inherited Greek and Roman philosophy.

But much of the Islamic world remained nomadic while the scientific revolution in the 1500s swept

through Italy, he said.

"In order for modern science to be developed, nature had to be defeated," he said.

There was a choice between a greater domination of nature or a greater ability to live with nature, he said, adding that the Islamic religion and nature are inseparable.

It takes a "spiritual dimension" to stay in tune with nature as well as a realization that "nature is not a prostitute, but it is more like one's wife," he said.

For example, Islamic law says "man is given custody over nature as long as he fulfills the functions of man," Nasr said.

One of man's functions is to be a servant of god, Nasr said. The greatest ecological disasters in the world are caused when man "plays the role of the divinity," he added.

There are two types of people—sedentary urbanites and nomads, he said, adding that, historically, nomadic people have had a greater appreciation for nature. Nomads

also have had closer ties with religion, Nasr said.

Nasr said there are striking similarities between nomadic American Indians and the people of Islam. Both groups could not separate their existence from the earth, he said.

"There have never been any nomadic atheists," he said.

In Islamic countries, where many people are still nomadic, nature has been treated in such a way that man's touch upon earth was light, he said.

An urban environment, on the other hand, is an artificial environment—a place where nature is separated from religion, Nasr said.

Nasr sees many of the world's environmental problems resulting from urban civilization.

Many pieces of art from the Renaissance pictured nature in the background while emphasizing shining cities in the foreground, he said. For example, nature would be shown as a dark forest, he said.

## Reaper . . .

• Cont. from p. 1.

The computer says lack of exercise is the contributing factor to my heart disease. I would walk more, but I have good reasons for not doing so. The air in Missoula smells too bad to walk to school in the winter time, and Montana weather in the spring time is too unpredictable. I walked to school one morning and ran home in the afternoon in a cloudburst.

The next two diseases I risk encountering at 45 are

cancer of the lung and cirrhosis of the liver.

Hey, wait a minute, Mr. Computer. Lung cancer is for smokers, and cirrhosis is for alcoholics. I do not smoke, and I classify myself as the proverbial social drinker.

According to Dr. Steve Van Dyke, doctor of junk-food journalism, I shall die in my sleep, peacefully and without knowing it.

## Nasr . . .

• Cont. from p. 1.

functional architecture, including the Taj Mahal.

"A great work of art cannot be produced without an intellectual current," he said referring to the Taj Mahal.

Nasr said there are now three broad foundations of thought in the Islamic world:

First, there is the fundamentalist way of thought. Groups of people who follow this way of thought often use terrorism to express their views to the world, he said.

Referring to the crisis in Iran, he said an "army of people are being paid to misrepresent subjects of crucial concern." He termed this "unbelievable" and said he could not speak about the hostage situation any further.

Second, he said there has been

an intrusion of Communist Marxism into Islam.

For example, he said that before the recent revolution in Iran, censorship was "completely lifted." The following week, he said, more than 400 books in Arabic about the history of Islam as seen through a Marxist eye were on bookshelves.

So many books appearing in one week must have been the "result of very long preparation," he said.

And finally, a group of people who have studied Islam and the Western World is emerging, he said. They have studied the modern West and do not want Islam to repeat its mistakes.

"The world cannot have two civilizations using the same amount of natural resources" as the Western world, he said, adding

that "there must be another model to follow."

These Moslems know that the world has to cooperate to survive, he said.

"We're all in this boat together."

## New Miranda ruling hazy

WASHINGTON (AP)—The Supreme Court offered new guidelines to its controversial Miranda decision of 1966 as it reinstated a Rhode Island man's murder conviction yesterday.

But whether those guidelines represent an expansion or narrowing of criminal suspects so-called Miranda rights remained cloudy.

Chief Justice Warren Burger, in a concurring opinion, said, "Trial judges have enough difficulty discerning the boundaries and

nuances flowing from post-Miranda opinions, and we do not clarify that situation today."

The Miranda doctrine requires police to tell suspects about their rights to remain silent and to have a lawyer's help while answering police questions.

If a suspect invokes those rights, police must stop all interrogations. Until yesterday, however, the Supreme Court had never defined "interrogation."

## Weather or not

About all I remember of that morning was the stink of lilacs. The whole town was purple as a bruise with them. It made me nauseous. There hadn't been any work in two weeks.

About noon, a guy from the insurance company down the hall dropped by to ask me some questions he already knew the answers to and dribble boring details about the weather. There was a welt on his left ring finger that his wedding band would have covered if he hadn't slipped it off five minutes ago.

"So then Channel 5 said partly cloudy through Wednesday with highs of 68 and a low of 38. But to tell you the truth Ms. . ."

"Jane Steel."

"To tell the truth Ms. Steel. . ."

"Wrong again. Jane Steel, Jane like in the first grade readers. You made it to first grade, didn't you?"

He reared back like I'd canceled his subscription to *Hustler*. "Are all private detectives as tough as you, Jane Steel?"

"No," I told him, "only the good ones."

# Coors NIGHT

"Lowest Drinking Prices in Town!"

PIZZA & BEER \$1.99

25¢ Schooners

\$1.50 Pitchers
