Montana Kaimin, September 29, 1981

Associated Students of the University of Montana
Pam Newbern

A former University of Montana student, characterized by his associates as a "great guy and a bright person," has been arrested near Los Angeles on a charge of attempted murder of a policeman.

Jacob Naung Ting, 35, a former graduate student in microbiology, was arrested in Angeles Forest near Pasadena, Calif.

Ting was arrested while fixing his car in the forest. A deputy who stopped to help him found that license plates on Ting's car had been stolen from another vehicle. When he asked Ting for his vehicle registration, Ting allegedly pulled a gun on him. A passing motorist helped the deputy subdue Ting, who was taken to

Creekside Valley and booked on charges of attempted homicide and assault with a deadly weapon.

Ting is also under investigation in an alleged kidnapping plot. Papers found in his truck supposedly outline a plot to kidnap a young child.

Reports that Ting was seen in early August in Yellowstone National Park received a terse "no comment" from microbiology Chairman Mitsuru Nakamura.

Friends and colleagues of Ting's in Missoula expressed shock and disbelief at Ting's arrest.

"I can't hardly believe it," said Diane Stanch, a secretary in the microbiology department. "He was a great guy, kind and gentle, without a violent bone in his body. I never saw him depressed."

Jose Ferraroni, a close friend of Ting, said Ting had left the university at the end of spring term to return to his home in Hong Kong because his father was ill. Ferraroni said Ting returned to this country about two months ago.

"He bought a car here this summer, and was going to drive around and see the country before returning to Hong Kong," Ferraroni said. "He was going to science and biology at a college there. He came by my house about a month ago, and I saw him for about 15 minutes. He seemed happy. I just don't understand it. It sounds like a different person."

According to Clarence Speer, professor of microbiology, Ting was "a very considerate person. He was interested in everyone. He had a very good sense of humor, and really carried things at parties."

Ting had been in the Los Angeles area for about two days before his arrest, according to Los Angeles area officials. "We assume he was here for a purpose," said one official, "and that purpose was kidnapping."

"I watched two guys get blown up in a hand grenade pit," he said, remembering his basic training. "It really wakes you up to things when you're wiping pieces of a guy's brain off your face."

**Former UM student charged with attempted murder, assault**

Greg Gadberry

Verm Deering's job is to tell people about the draft. Never mind that no draft exists in the United States today. Never mind that President Ronald Reagan said he didn't want one. Deering — ASUM's new draft counselor — speaks as though the draft could return tomorrow. And he thinks that more people should think that way.

"Everybody is being myopic, thinking the draft won't be coming up," he said. "When it comes, they're going to take people from UM and from the streets of Missoula. It's not going to be the people next door. It's going to be you."

As a counselor, Deering hopes not only to keep abreast of current draft legislation, but also to help people prepare for conscription. And, maybe, he can help some of them legally avoid military service.

New legislation, Deering said, points to a draft that may come soon.

"There are five bills (on conscription) pending before Congress this year," he said. And congressional opinion is apparently favorable toward conscription. "It's an evolving thing that's rapidly changing," he said. "Especially with the stance that the government is taking, militarily and politically. They seem to be looking for a confrontation."

Considering the number of new draft bills, Deering said that people should start gathering information soon.

Such information — both on the draft and on their personal lives — might help them legally avoid conscription should a law pass.

For example, Deering has compiled a questionnaire which asks whether people have had medical problems; whether they are studying to be a doctor or minister; whether they had parents or siblings killed in combat; whether they are gay; and other possible deferments exist. Yet Deering said that just knowing about a possible deferment won't help someone who goes before a draft board.

"I just met with some kids at a church here," Deering said, "and I said, "Where we set up a mock draft board. And even before their own peer group, people were tongue-tied. They just hadn't thought anything out.""

Deering recommends that people check with doctors to get possible medical problems documented, or attempt to show that other possible deferments exist. And he also recommends that students, with or without deferments, come in for a talk. In fact, he said, some people may actually do well in the service.

And Deering is careful not to recommend avoiding the draft illegally. "I'm not going to tell people to commit a felony," he said. "Often, the things people did to avoid the service were worse than the military." And if a person left the country to avoid service, he said, chances are they could never come back. But why does Deering do it? Why give up his time on some other project? On some other cause?

"I went because I thought it was patriotic duty these days," Deering said. "I went through it," he said. "I want to help.

Yet Deering wasn't drafted. He enlisted for two tours of duty on a Navy patrol boat in Vietnam. "I went because I thought it was a patriotic duty," he said. "I signed to the best of my knowledge."

opinions

So you’re new . . .

Many things have happened this summer in Montana, and quite a few events rocked the normally sleepy University of Montana campus.

Most notably, we (students, faculty, staff and Montana residents) find a new face on campus — President Neil Bucklew, who assumed his administrative duties in late August. His credentials are impeccable and his manner refreshing.

Bucklew conveys a seemingly deeply felt attitude for higher education. His optimism is welcome and needed, particularly now, when higher education seems to be of least concern to anyone on Capitol Hill.

Furthermore, UM can now shake the seven-year itch, which it has endured since 1972.

George Mitchell was confirmed as auxiliary director by the Board of Regents this summer. The auxiliary director probably touches more students’ lives through the direct control of student services — such as the food service, the dormitories, the golf course, etc. — than any other position on campus.

When Mitchell was chosen as a finalist by the search committee, a great cry was heard from students who charged that Mitchell is the very antithesis of what we need or desire.

So far the auxiliary services office has been quiet. Whether this is good or bad has yet to be determined, but a student watch has evidently been posted.

ASUM did not go out to lunch for the summer and actually accomplished quite a bit. A new job referral service for students was created, a student was placed on the Blue Cross insurance negotiations committee for better student coverage and officers lobbied hard for $12,000 to enable the student garden committee to get it’s project underway after years of delays.

A surprise announcement was Commission of Higher Education John Richardson’s resignation. Richardson served barely three years.

Although his term was marked by an odd paranoia of the press and openness in general, Richardson worked hard this past legislative session to secure the biggest increase the university system has seen in its funding for years. We wish Richardson luck, and we hope that he will have exactly the opposite problem.

I have decided to let you in on a secret Mitchell has told me. He has decided to shake up the University of Montana a few years ago, and now am a senior at Whitman College in Walla Walla, Washington. Because of my past connections with your university, I have decided to let you in on a good deal.

I know that one of the major problems you have had there is the drop in enrollment, which lowers the amount of money you can get from the state. Well, here we have exactly the opposite problem. We’ve got too many freshmen. Normally our enrollment is limited to 1100 students, but this year 1250 showed up. This is causing us no end of problems, as we do not have enough dorm rooms, mail boxes, closet space, or pencil sharpeners to accommodate this many freshmen. They are causing problems for all of us, depriving upperclassmen of choice residence hall space and swelling the cafeteria lines to unheard of lengths.

Because of this, I, as a member of student congress, am prepared to promote a special deal for you, should you decide to accept it. We will sell you 150 freshmen at a fair market value. There are some limitations, however. We would have to insist that all of the freshmen we sell you are ones who pledge fraternities or sororities (for they are an embarrassment to us), and will not sell any pretty girls, because you already have more than we do.

If you are interested in this offer, let me know and I will arrange it. You must act quickly, however, because otherwise we will have to offer them to Oregon State.

Environmental drivel?

Editor: While I walked to my first class of the year I noticed a poster announcing that The Great Earth First Traveling Road Show is coming to the university. I wonder. Will this liberal obstructionist environmental drivel ever stop? And why is the university allowing the show to come to campus?

I read a couple articles that were written about Earth First. The people behind the organization are the biggest lunks this side of the moon, which incidentally they want to declare as a wilderness area. They want to make wilderness out of every acre of roadless land, as well as stop energy projects that we need (like Glen Canyon Dam, which they supposedly cracked).

What I really object to is how they’re trying to undermine the public’s respect for our national leaders, especially Ronald Reagan and James Watt. If we can’t look up to the President and his appointees, where do we turn? You have to have a little faith in government, even if you don’t agree with them.

I hope everyone stays away from this so-called “road show.” It’s obviously a bunch of nuts spreading environmental propaganda.

Severn Lefebvre
Sophomore, general studies

The Montana Kaimin, a student-run newspaper, derives its name from the traditional Salish word for “written message.” Published four times a week, the Kaimin attempts to bring students, faculty and staff of the University of Montana important campus news and events.

Our editorial page is open to everyone, and we welcome all questions, complaints and suggestions. If you feel like bitching or want to plug your favorite cause, write us a letter. Preferably typed, doublespaced and under 200 words.

Trivia and KYLT-FM help pay college expenses

Kipp Bassett

Before she became Mrs. Wil­liam Shakespeare in 1562, what was her name? If you answered, "Ann Hathaway," you're pretty good. Or, how about, in the 1962 verse "Sonnet on the Bounty," who played Captain Jack Sparrow?..."Trevor Howard." If you got either of those, you're into trivia. Noelle Paige of Kappa Alpha Theta is an expert in the field — she just won KYLT-FM's 100's Questionaire — $400 for tuition/fees and $100 to help pay for books.

The contest, sponsored by KYLT-FM 100, was open for three months and drew more than 500 entries. Of those prospective students who entered the contest, nearly 20 percent had the correct answers to all 30 trivia questions. The winner was drawn from among those with the correct entries.

Trivia requires lots of memory space, and KYLT-FM's contest questions required more space than usual. For example, try answering this one off the top of your head: "Aces & Eights" was the famous poker hand held by Wild Bill Hickock when he was shot and killed. Who

Awarded the $100 to the person who correctly identified the song: "Four Winds of the World," St. Louis Blues. If you answered, "The Who," you're a bit off the mark.

KYLT-FM plans to continue such contests as "Wintuition" and to help students in other areas of their lives. A new talk show called "Rock Line," a live chat between listeners and performers, is in the works. Then there's the bus journey to Seattle for the Rolling Stones concert and the constant addition of ever better album rock to the station's repertoire. Altogether, Argo says, KYLT-FM is gearing up for a good Autumn Quarter.

Panel on MX missile kicks off SAC's Fall Quarter schedule

A three-day informational ses­ sions on the Hiromg population of the Missoula Valley will be among the many activities the Student Action Center has planned for the year. Director Mike Kadas announced last week.

Though no date has been set for the event, Kadas said SAC plans to examine the culture and the political situation the Hiroms face here, and in Laos, through lectures and art shows. Demonstrations of artwork and dance will be held. The dates for the event will be announced later, though they are tentatively set for mid-October, Kadas said.

SAC, a student organization that is both with environmental and consumer research and advocacy, will kick-off the year's events with a preview of the MX Roadshow — a panel discus­ sion on the future of the MX Missile system in Montana. The two-day event will feature pane­lists Cecil Garland, a former Montanan and now a rancher near a proposed MX site in Utah; Janet Gordon, who has worked with radiation victims from atomic weapons testing in southern Nevada, and Major Gen. W.T. Fairbairn, former senior Strategic Planner and now the associate director of the Center for Defense Information.

The Paper SAC, a newspaper published by SAC, will undergo some changes this year, which may include a new name, but none has been suggested yet, Kadas said. Issues of the news­paper will be shortened to eight to 10 pages and published every other week, instead of monthly as before.

AP plans for later in the year which shall Wilderness Alliance on and the MGs? What did "MG" stand for? These are just some of the "Whodunit" contest questions that SAC will be holding this year. Upon examination of the repertoire. Altogether, Argo says, KYLT-FM is gearing up for a good Autumn Quarter.

The U.S. Environmental Protection Agency plans to grant Allied a 177,000 tons of hydrochloric acid for the Missoula Valley. The MX Roadshow — a panel discus­ sion on the future of the MX Missile system in Montana. The three-year permit would be needed to allow Allied's chemical works plant in Elizabeth to continue dumping acid wastes in the ocean, according to Peter stew, 15 miles into the Atlantic Ocean 15 miles off the New Jersey shore, agency officials said yesterday.

It would be one of such permits in the country for dumping acid wastes in the ocean, according to Peter stew, 15 miles into the Atlantic Ocean 15 miles off the New Jersey shore, agency officials said yesterday.

The three-year permit would allow Allied's chemical works plant in Elizabeth to continue dumping acid wastes in the ocean for three years. Allied needed the determination that its dumping did not harm the environment, because a ban on dumping harmful substances at sea takes effect at the end of the year.

According to EPA, the agency determined that the hydrochloric acid would be neutralized by ocean salt water. He said it was better to dump

the acid into the ocean than to neutralize it at a toxic waste processing facility, since the neutralizing process would create a residue that would have to be deposited in a toxic waste landfill.

A public hearing will be held if objections are filed within 30 days.

Search committee selects semifinalists

The University of Montana Foundation Director Search Committee has selected nine applicants from 56 applications as semifinalists for the position of foundation director, committee chairwoman Patricia Douglas announced Monday.

The 12-person committee, Douglas said, will review and check the references and recommendations of the semifinalist applicants and then select the finalist.

The director should be selected by the end of November.

"The process is very competitive," Douglas said. "The committee is being very careful in selecting the best candidate for the job."
The University of Montana — including ASUM — has been under audit since spring, but the state legislative auditor's office may not be able to complete its work until winter, according to Jim Gillett, acting legislative auditor.

The audit is being done in compliance with a state law which says that any agency using state money must be audited at least once every two years. The purpose of the audit is to determine whether the university is complying with state and federal regulations regarding financial matters. Gillett said he is "not at liberty to say" whether any significant findings or irregularities have been noted.

The last audit was done in 1979, covering the fiscal years 1978 and 1979. The auditors, who arrived in the spring, remained on campus until August. They will return to the university "the sooner the better," Gillett said in a telephone interview Friday, but only after the university has completed its financial statement.

The statement is usually finished "about Dec. 1," according to internal auditor Sylvia Wettenburger. The internal audit department acts as a liaison between the university and outside auditors, Wettenburger said, but does not actually work with the legislative auditors on the audit.

ASUM Business Manager Carl Burgdorfer said Friday that he expects ASUM to have to pay $2,500 toward the cost of the audit. Burgdorfer received a letter this summer from Jack Noble, deputy commissioner for financial affairs for the Montana University System, which stated that ASUM should reserve $2,500 for audit costs.

The Legislature appropriated $85,000 to pay for the audit. If the audit finds no problems, Gillett said, the cost of the audit should run well under $85,000. If, however, there are problems that must be investigated, or if the university administration makes a special request that a certain area be audited, the audit will cost more, Gillett said.

Once the audit is completed, but before the legislative auditors write their final report, they will meet with UM officials for a final interview. This will allow university officials to answer any questions that may have been raised in the audit, and will give the university administration advance notice of what will appear in the report.

Environmental lectures begin

Denis Hayes, a solar energy expert, will be a guest lecturer of an environmental studies lecture series at the University of Montana on Wednesday. The former director of the Solar Energy Research Institute in Golden, Colorado will speak at 7 p.m. in the Lecture Hall in the new Science Complex. Hayes recently lost his job as a result of President Reagan's budget cutting policies. His lecture is titled "Smart Energy: Moving Beyond Ideology in National Energy Pol-

Environm ental

Denis Hayes, a solar energy expert, will be a guest lecturer of an environmental studies lecture series at the University of Montana on Wednesday. Hayes helped coordinate Earth Day in 1970 and is the author of the book "Rays of Hope: The Transition to a Post-Petroleum World." He is currently a member of the National Petroleum Council and serves on the board of the Federation of American Scientists.

The lecture series, which consists of 10 lectures, is funded by the S&H Foundation. The series is offered by the environmental studies department for one credit.

UM audit may not be completed until winter

While the legislative audit committee cannot actually enforce its recommendations, copies of the report do go to the federal government and the state legislature.

Montana Kaimin • Tuesday, September 29, 1981—5
Off-campus rental tips offered

Editor's Note: Returning University of Montana students are moving off-campus for the first time. Bruce Barrett, ASUM Legal Services manager, has outlined in a six-part series the pitfalls and problems that students must most often face. Part two will appear tomorrow.

There are two ways to enter into an agreement with a landlord for the renting of a place. The parties can enter into an oral agreement, in which the agreement is spoken, or they can have a written agreement, usually called a lease. Oral agreements almost always offer for rental of a place on a month-to-month basis. Written agreements can provide also for month-to-month rental but more often are used to rent for longer periods of time.

One of the big problems encountered by students is what procedure to follow when they want to move out of the place they have rented. When renting on a month-to-month basis, the tenant can move by giving 30 days notice to the landlord, and then he would have the right to the place for 30 days. Generally the 30 days notice does not have to be given at the beginning of the month. It can be given at any time. If for example, a tenant pays rent on the 1st that tenant could still give his 30 day notice on the 15th of the month, and he would have to pay for 15 days into the next month. Generally in Montana, rent is uniformly apportionable from day-to-day.

It is important that students think carefully before they enter into a rental agreement. They must receive a written lease for a fixed period of time. Tenants who enter into written leases will find that different rules apply when it comes time to move. A tenant must realize that a 6-month rental agreement is just that — a commitment to stay in the rented place and pay rent for 6 months. If a tenant moves out in spite of his signed agreement, he can be sued by the landlord. Tenants should realize that when they sign a fixed-period lease they are obligated themselves legally for a certain period of time. Landlords often require 12-month leases to avoid the vacancies that plague Missoula during the summer months when thousands of students leave.

So, is it better to enter into a signed lease, or stick to a simple month-to-month agreement? It really depends on the circumstances and needs of the parties. While it is true that a month-to-month agreement allows a tenant to move with only 30 days notice, the rule works the other way as well. The tenant can be required to move with only 30 days notice from the landlord. With a written lease, the tenant is guaranteed his right to property for a certain length of time and doesn't have to worry about the landlord casually kicking him out because of some minor disregard or because the landlord wants to rent to someone else.

Another problem with the month-to-month agreement is that the landlord can usually raise the rent with only 30 days notice. In a written lease, a tenant can be guaranteed a certain rent for a certain time, and it may not be raised without a written agreement. A landlord may raise the rent any number of times, and may raise it by any amount he chooses as long as the tenant is given 30 days notice.

Rhodes scholars apply Oct. 4

Students at the University of Montana who are interested in applying for Rhodes Scholarships for study at Oxford University in England are urged to contact Dr. Thomas Huff of the department of philosophy, room 441 in the Liberal Arts Building, before Oct. 4.

In order to be considered for a Rhodes Scholarship, students must be able to demonstrate academic excellence, personal qualities, such as truthfulness, courage, and kindliness, leadership and moral force or character, and physical vigor," Huff said.

Students who want more information about the Rhodes Scholarship program may phone Huff at his office, 543-0491.

UM students identified as drowning victims

Two University of Montana students and two other students drowned during a 500-kilometer trip in mid-September through Rapid City, South Dakota, to Minneapolis, Minnesota.

The bodies of these three men have been recovered and a search for a fourth continues, according to the Montana Mounted Police in Minneapolis.

According to the Associated Press, the two other men were identified as...
ruled that the Lobbyist Disclo­
ident for the University of Maine.

The Montana Supreme Court
ruled that Montana's 30
percent coal severance tax is
constitutioal. The court, which
ruled 6-3 on the issue, said the tax
does not interfere with interstate
commerce. Opponents of the tax
had wanted to put a 12 1/2 percent
celling on coal severance taxes.
The tax yielded about $60 million
to Montana in 1979.

John Lemnitzer, pastor at the
Prince of Peace Lutheran Church,
resigned his position. Lemnitzer
completed a jail sent­
ence this summer at the Leaven­
worth Federal Penitentiary in
Kansas for participating in a
demonstration against nuclear
arms at the Malmstrom Air Force
base in Great Falls last Easter.

A federal judge overruled
Washington state's voter-passed
law that bans depositing all but
low-level nuclear wastes in the
state. Montana has a similar ban
and Missoula has an ordinance
that seeks to ban all but low-level
wastes from being transported
through the city. The decision in
Washington may have an effect
on Montana's ban.

Alderman Bill Boggs re­
signed his seat after serving on
the city council for four years. The
War 3 Democrat said the coun­
cil's probe into his residency
status and his private life were
the reasons for his resignation.

UM zoology professor E. W.
"Bert" Pfieffer and three other
authors of a book on chemical
warfare in Vietnam have filed a
$5 million lawsuit against the
Macmillan Publishing Company
for failing to market their book
"Heritage of Death." The suit also
alleges that Macmillan "may
have collaborated with the Uni­
ted States government to sup­
press the facts in the book re­
garding the use of Agent Orange
and anti-personnel chemicals by
the military in Vietnam."

Clancy Gordon, UM botany
professor died. (See related story
page 12).

The UM School of Forestry
received a gift of $204,000 from
the M. J. Murdock Charitable
Trust of Vancouver, Wash., to
construct a research center in the
Lubrecht Experimental Forest
east of Missoula. It is the second
largest award ever given to the
university. The largest was a
$500,000 grant for the Yellow Bay
Fresh Water Research Laborato­
y at Flathead Lake.

A tribal vote to allow the
Northern Tier Pipeline to run
through the Flathead Indian
Reservation passed. The 42-inch
diameter pipeline could run
cross 62 miles of the reservation.
Tribal members will receive $27.7
million over the next 30 years as
payment. Exactly where the pipe­
line will run has not been decided.

Elsa Redlin of Lambert was
appointed by Gov. Ted
Schwinden as a new regent. She
replaces Lois Hansen of Sidney.

A special legislative session
will be held this fall. The session,
which will convene Nov. 16, will
be held for discussions on how
state government will deal with
major changes it faces because of
cuts in federal assistance.

The longest teachers' strike in
Montana history ended after 91
days. About 700 workers will be affect­
ced by the shutdown, which is said
to be due to a slow demand for
linerboard, a cardboard product
the plant produces.

Commissioner of Higher Ed­
ucation John Richardson has
resigned the post in Montana to
accept a similar one in North
Dakota.
There are three important things every graduating engineer should know about Martin Marietta Aerospace:

1. Our unique corporate structure gives you unusual flexibility in determining your career path and accomplishing your personal goals. Unlike most other aerospace firms, Martin Marietta uses a matrix organizational system that gives you a "technical home" rather than placing you in a single program or product area.

2. Martin Marietta will provide you with a stimulating environment through challenging assignments. We have hundreds of long-term contracts that require imagination and creativity. And we have some of the world's most sophisticated equipment and facilities to assist you in your efforts.

3. And finally, we want to talk to YOU. We will be holding on-campus interviews very soon. Arrange to talk with us and we'll give you more information about Martin Marietta Aerospace and its opportunities. We'll also give you a full-color poster/calendar of the artwork in this ad. And remember, if you enjoy reaching for the challenges of tomorrow, look into a career with Martin Marietta today.

Martin Marietta Aerospace has many new opportunities awaiting college graduates. Major facilities are located in Denver, Colorado, New Orleans, Louisiana, and at Vandenberg AFB, California.

Interested graduates please contact Martin Marietta Denver Aerospace, College Relations Department, PO. Box 179, Mail #D1311, Denver, CO 80201.

See our representative on campus
October 7

Martin Marietta is an Affirmative Action Employer actively seeking the Handicapped and Veteran. U.S. Citizenship is required.
President Bucklew: another UM freshman

Editor's Note: The following interview was conducted Sept. 22 in President Neil Bucklew's very neat office in Main Hall. He was interviewed by Montana Kaimin Editor Stephanie Hanson and News Editors Doug O'Hara and C. L. Gilbert.

**Who did you support in the last presidential election?**

You start right off with the surprise question. I don't think I am going to answer that. It might not be active in politics in the sense of being involved in any particular party—either of the political parties in an active way. I grew up in West Virginia in a Democratic family and, like many individuals, have had a tendency to just adopt the party of your parents as an official designation. But I think from the college days on I started to try and form my own opinion and I have been very round and have not been active in a particular party.

**You don't want to say if you voted for Carter or Reagan?**

Not wanting to answer the question and closed the curtain and got to have my secret ballot and I am going to keep that in on the, I mean, definitely keep that in.

**What do you think of Reagan's presidency?**

To be candid I was one of the surprised people at Reagan's victory. I wasn't particularly set on broad-band feelings that must have underlay Reagan's victory. But I have come to realize that he is not going to be stuck to the task harder than many of us might have thought. I think that he had a sense that there was a certain approach and that it involved sort of a common sense approach to budget balancing. I think that he really worried about and took in the understanding that we have to use the resources that as a society we are going to be some unique places that are so special for what they represent to the future that we can forego what natural resources they might provide. I don't know the question of whether the Bob Marshall meets all those criteria. I think it sure is a beautiful place.

---

**"I don't know the question of whether the Bob Marshall meets all those criteria (for continued protection as a wilderness area). It sure is a beautiful place."**

---

that his goal is to really give some leadership to how we develop our resources with a really sensitive concern for the environment, then I feel that his rhetoric sounds fine. What most people seem to criticize him for is that they think that the actions often belie the rhetoric. I don't have enough insight into all of the specific issues, but it seems to me that there is nothing wrong with trying to understand how to develop some of the natural resources that as a society we need and use to be more self-reliant. I would think that with enough attention to the issue we can indeed do that in a way that is responsible; that assures that it isn't every place that a resource exists that has to be used, used that fully, that we have to use the easiest one to get rather than the hardest one to get. I guess I think I am where most people are — I think I am in the middle on that issue. I believe that indeed it's not a question of development at any cost or no development — I want it just like it's always been. I don't think that is where the great majority of people are and in fact the university has done some research recently to show that's not where the people of Montana are. I think the majority of them are for reasonable, controlled development. Does Secretary Watt represent that? I believe he would say he does. I know that there are a lot that would say he doesn't.

**How about the Bob Marshall Wilderness Area? Is that one of the places where you might support not going in even though there may be resources?**

I would like to believe that there are going to be some unique places that are so special for what they represent to the future that we can forego what natural resources they might provide. I don't know the question of whether the Bob Marshall meets all those criteria. It sure is a beautiful place.

**Do you support the legislation of marijuana?**

No, that's from my own individual assessment. In fact after reading the recent series of articles by the Missoulian, which I thought were pretty straightforward and factual, I think they continue to raise questions that I personally have about its effect and its impact. I guess I am again where a number of people are. I think some of the first questions to marijuanas and its use were a factor — because it was such an unknown feature — and there were a lot of people who were not convinced of just what it was — a new kind of phenomenon. Some of the reaction is associated with the context in which it is used, guilt by association. I don't think I am a person who believes that to be one of the most critical issues that must be addressed by the society, but I would not go so far as to say that I think that its legalization is important or effective or would

Cont. on p. 10
Bucklew... provide some service to the citizens of this society.

• How you feel about alcohol? At Ohio State they have bars in their student union buildings. I think there has been a lot of information in recent years which would indicate that alcohol is abused in society in general, and universities have had some pretty bad experiences. Some of the people who work in counseling with students say that it is an alarming number of students for whom that's a problem. I am not trying to say that they all are alcoholics but the fact that alcohol is used in a number of very wrong ways. It is a very serious problem. I think that we represent a community which has a responsibility for relating the institution to the society and the campus. It may be reasonably common in the West, but it is not back East. They seem to work in a more public way. I think that it would be fine. ASUM is sort of an effort to reach out—to know—what is happening in the dormitory system. I have had an opportunity to meet with some representatives of the fraternity and the campus or liquor sales on the union buildings.

I think it was often ignored as a problem. That's my sense; I don't have a report or a fact of that, but my sense is that indeed alcohol is becoming a growing problem. But I think it is one that has been recognized and I think people and institutions have started to react. I think that there has been a reaction to it.

• How much contact do you plan on having with the students? How visible on campus do you plan to be?

As much as I can humanly do. The very nature of the position means that I have a key responsibility for relating the institution externally to the legislature, to the state government, to the Board of Regents. That's something that no one can substitute for me and I need to be very much involved in that. But, I can only do that as effectively as I know the campus and have a sense of what's important to the campus community. And that requires a lot of time as well. I shared with the faculty at the faculty meeting (Sept. 21) that in fact I will be trying in a structured way to see that I learn about the academic programs of the university. I have talked with Steve Spaulding and we have got a session coming up where I will be meeting with the ASUM officers in the near future. I will be meeting with some representatives of the fraternity and sorority system. I will be making every effort I can to reach out—to know—what is on students' minds.

• Do you ever think you will drop on in a Central Board meeting?

If they would want that, that would be fine. ASUM is sort of a reaction to student government and involvement in student programs. These fine California wines have been selected exclusively for the campus. It is a lot different than any other wine... over 1 lb. of thick and juicy pork chops that are absolutely outstanding! A delightful flavor! Boneless breast of chicken with our own sweet sour sauce.

Bucklew is an avid jogger and enjoys fly fishing.
Bucklew...

- Will ASUM officers be able to come in and advise you? I don't want to be the only way the students can communicate. That may not be the most effective way. It is important for me to hear things directly, but it is also very important that we structure our role. I would rely on the college of public administration to help me out. That is the reason students came to see if there is a need to be more than just the president. But, indeed, I am interested in student opinion.

It seems to me that this campus has a fairly progressive way of structuring student involvement. I don't know how effective students use that and in fact during the interview process when I asked the question, not of students, but when I asked it of others — to what extent do students participate effectively through the committee structure of the university. I was told that that was a very mixed kind of experience. That some students took that very seriously, worked hard at those tasks and sometimes, although they have the opportunity to be represented and have places on those bodies, that the committees did not always get the kind of support.

That's the only way the place works — by the hard work of a number of knowledgeable committees and organizations. It is not as if I sit here each day and make monarchical judgements and if you can just get to me I will make the right one. Most decisions on a daily basis I don't make. So in answer to your question will I listen to students — as much as I can. But I am saying that that's only one way that students need to be involved in the institution, and I think they have got a structured involvement that is pretty progressive.

- Is a lack of student participation unusual? No. In fact it's not, but often because it's only symbolic in many places. But again I'll repeat that the extent of student involvement in a structured way is very extensive at this university, and so the opportunity is greater than at many other universities that I have been associated with or seen. I think the opportunity to be involved is really great and I do know that being on committees is not the reason students came to the university, but good committee appointments — finding out who really has the time or will take the time and has the interest in that area — could be extremely important for the student community.

- How about student political activism. Do you find them more or less active than in the past? I think there are some clear limitations that a university should place on (defense department) research. If it was clear to me that its application or use was in fact a form of defense that was aggressive or inhuman, I think there is room for value judgment.

“I think that there are some clear limitations that a university should place on (defense department) research. If it was clear to me that its application or use was in fact a form of defense that was aggressive or inhuman, I think there is room for value judgment.”

- Is a lack of student participation unusual? No. In fact it’s not, but often because it’s only symbolic in many places. But again I’ll repeat that the extent of student involvement in a structured way is very extensive at this university, and so the opportunity is greater than at many other universities that I have been associated with or seen. I think the opportunity to be involved is really great and I do know that being on committees is not the reason students came to the university, but good committee appointments — finding out who really has the time or will take the time and has the interest in that area — could be extremely important for the student community.

- How about student political activism. Do you find them more or less active than in the past? I think that the university should encourage student interest in the full range of issues that affect not only the university but society. Can’t we be more active? My initial assessment is that they are pretty active at this university. I know that the student interest in (environmental) resource questions that are being wrestled with over in Helena seem to get pretty serious student attention. I have met several students who were very knowledgeable, I mean extremely knowledgeable, about the governmental process at the state and how it affects higher education. There is a pretty knowledgeable group of students here. I have been on a number of campuses where there was no student who would have had that kind of insight, who worked that organization but in fact should it be a voluntary kind of thing or should it be something or the other, where, if you will, the taxing power of the state is applied to all students. I think that tends to be the issue. However, I feel that it is a highly questionable that there be a mandatory fee raised by the institution and collected by the university. That is sort of falling into a Book of War — student-club mentality. If you don’t say no, you are going to get this book and teach economics at UM. What kind of economics do you teach?

The areas that have been of most interest to me have been questions that relate to public sector of economy and governmental relations, with a real special interest in public sector collective bargaining. That’s been an area that I have found most interesting and I have been impressed with the way students have wrestled with over in Helena.

- Few students are heard by more than the president. But, indeed, I am interested in student opinion.

It seems to me that this campus has a fairly progressive way of structuring student involvement. I don't know how effective students use that and in fact during the interview process when I asked the question, not of students, but when I asked it of others — to what extent do students participate effectively through the committee structure of the university. The number of bad checks received by the U.C. Bookstore has been increasing rapidly. We wish to continue our check cashing service but find it necessary to institute some policy changes. We hope our customers will be understanding and cooperative.

CHECK CASHING POLICY

1. 10-cent charge per check cashed without purchase.
2. Maximum $20.00 over amount of purchase. Minimum purchase $5.00.
3. No two-party checks except state and federal paychecks, money orders and checks from parents with approval.
4. Maximum limit on checks for cash, $50.00.
5. No money orders may be purchased by check.

The Earth pays tribute to its own, and so it will be with one of the University of Montana's most active botany professors and environmental advocates, Clancy C. Gordon, who died July 12 at the age of 53 after a two-year bout with cancer.

The UM Foundation has collected close to $10,000 in tax-deductible donations for an annual Clancy Gordon Environmental Scholarship as a "living memorial" to Gordon's work. A multi-disciplinary committee of staff and faculty next spring will choose graduate students in biology, physics and social sciences, as well as environmental studies, for the award.

Gordon, born in Seattle on July 26, 1928, received his first degree...
Toole began writing history books on Montana in 1957. In 1959 he wrote "Montana: An Uncommon Land;" in 1971 he wrote "The Time Has Come." In 1959, he wrote "Montana: An Environment," in 1957 he wrote "Rape of the Great Plains," in 1956 he wrote "Fracking the West," and in 1959 he wrote "Montana's Native Trees and Plants." In 1960, he published "Four Years Later He Earned His Doctorate in Plant Pathology From Washington State University in Pullman." Gordon joined UM's botany department in 1960, shortly after receiving his Ph.D. He then became actively involved in research in mycology, or fungus research, in his department, and he served as director from 19707 to 1975. The program is geared to the state of valuable resources.

In 1970 was largely due to Gordon, who served as an "expert witness" in numerous court cases involving those influential companies. The creation of UM's Environmental Studies Program in 1970 was largely due to Gordon, and he served as its first director from 1970 to 1975. The program is geared to graduate students in related scientific fields. Gordon was also deeply involved in the celebration of Earth Day, which first took place in 1970, and then in subsequent years.

Sherman Preece, chairman of the botany department, has known Gordon 21 years, ever since Gordon arrived at UM. "His classes weren't the most orthodox," he said of Gordon. "They were informal, but he got his message across and a lot more." Preece said Gordon's work brought an awareness of the environment to citizens, especially Montana's native trees and plants. It also broke ground in modern techniques of pollution research and analysis, he said. Preece added that Gordon's work also was important since his information was used in major court cases involving environmental questions.

"Act and act now, so in the year 2000 no person will leave the state because there are no jobs or because the environment is filthy," Toole said. "This may be our last chance. It is up to you people, not to me anymore."

**NEW AVENUES OPEN UP FOR STUDENT EMPLOYMENT**

Karen McGrath

Student Reporter

When you attend college in a town where the economy is in a shambles and the main industry is constantly shutting down, you can use a job to help meet costs, yes, but you might even try to find work, right?

Well, don’t give up hope yet. There are some tremendous opportunities open to students that are not open to other people.

The Financial Aid office, located in the Lodge, may be the best place to look for employment. Contained in files and stored on window and bulletin boards in the office are cards listing available occupations on and off campus.

Dorothy Kinsey, director of student employment, coordinates student schedules with job schedules and also handles all work-study jobs.

There is one drawback to jobs listed at the Financial Aid office, however. Many of them are work-study related and the deadline for work-study application was last April.

Missoula Job Service is also setting up a temporary office in the Lodge. Carla Chiotti, Job Service’s student representative, will be on hand at the Lodge two days a week. Otherwise, she can be reached at the permanent Job Service office, located at 539 E. 3rd St. W.

Chiotti said that Job Service looks for a student who has some prior experience or skills in a field. Also, transportation is very important. Importantly, job lines do not run in the evenings, when most students work.

In general, Chiotti said, Job Service places students in night and weekend jobs, such as in sales, restaurant work or janitorial services.

**TAN CONCERT POPULAR BUT STILL LOSES MONEY**

Greg Gadberry

Montana Review Reporter

Although officials from ASUM Programming contend that the Aug. 17 concert by singers Janis Ian and Kenny Rankin was an artistic success, it wasn’t a financial one.

According to Programming Manager/Coordinator Victor Gotsman, the show—presented two days after the end of the University of Montana summer sessions—attracted only 600 people.

“Attendance was expected at $3,600. The University Theater, when the concert was held, has about 1,200 seats,” Gotsman said.

But Programming officials insist that the concert, regardless of its date, was too good to pass up.

“Tan had been a Grammy Award winner,” Programming Director Sam Goza said. “We really thought she’d bring in the $3,600.”

Gotsman agreed: “We needed about 1,000 people to break even. We expected to get that many.”

Overall costs for promoting and producing the concert amounted to $8,166. And while Goza said that the cost of production was about average, he said that票 were sold to about 20 percent more usual to ensure that students would attend.

“We really hyped this one up,” he said.

Ticket sales for the show brought in $4,754. Both Goza and Gotsman admitted that ticket sales were not as expected.

“Missoula shows just aren’t what they used to be,” Gotsman said.

“I know I’ve said this before, but the market just isn’t the same,” Goza said.

**CHECK YOUR date here, please**

College Press Service

Ricky Johnson, a sweet-faced and good-natured student, was attracted to a woman law on campus one day. Like any other student, Ricky Johnson and his friend were logical move would be to ask her for a date. But unlike most students, Ricky Johnson needed his dean’s permission to do it.

Permission to date is nothing unusual at Liberty Baptist College, where Johnson was enrolled. Liberty Baptist is the Baptist, which Falwell opened in 1971.

The administration doesn’t always go along with students’ dating wishes, especially if as in Johnson’s case, the two students are not of the same race.

As Johnson discovered, the administration doesn’t always go along with students’ dating wishes, especially if as in Johnson’s case, the two students are not of the same race.

When Ian had been a Grammy Award winner,” Programming Director Sam Goza said. “We really thought she’d bring in the $3,600.”

14—Montana Kaimin • Tuesday, September 28, 1981
Bucklew...

Dispute Settlement in the Public Sector, which I found very interesting, and in fact I notice that it has been an issue.

What kind of teacher are you? Strict? Informal?

I think I am a fairly effective teacher. I tend to provide a lot of cognitive information as a ground work, and then I like to spend some time trying to work with it, apply it. I like case activities and the public sector economics. In the labor economics course I like to do some contract negotiations, and then I like to do some arbitration under the language that you have negotiated. I think that gives a base of information and then practicing at it and working with it is something that the students respond well to. So I find that most times I teach a course that ends up having a sort of two experiences: the first part of the course most students say, 'oh there is so much information so fast I was plowed in.' But the second half is especially for those willing to get into project work. Maybe they spend more time with it the second half, but it is a little easier then I think.

Do you think you will teach this year?

I don't know. I try to teach once a year and teach an introduction course where I would be dealing primarily with sophomores, maybe juniors. Then I try to teach a graduate seminar which is a little more focused on a smaller group of students. But I don't know whether it would be this year, but I look forward to it.

Are you a tough grader?

I am reasonably tough.

Do you think grade inflation is an issue any more? Or do you think the pendulum is swinging back?

I think it is starting to swing. Most institutions had grade inflation going on, and it was a problem that was a circle you could never quite break into it. But I think that there has been a general sense that it was important to be a little more explicit about your expectations. I am not so sure that it was ever a sense of lowering our expectations, but I think that it was part of what happened in the grade inflation. Part of it was with new experiences with grading in the sense that it may be that there were alternatives to failure. Maybe someone ought to try a second or third time. So some of it was trying to be inventive and thoughtful about how you grade. I am not being super critical of it, but I think it went pretty far, and when you ask about the pendulum — I think it is swinging back some.

It seems that a lot of university presidents are coming from corporate backgrounds now. What do you think of that trend?

I am not sure what a corporate background is. I don't know many university presidents who come from a corporate background. If you would ask me that is a trend, I would have said no. I would have said that the last 10 to 15 years have seen people from private enterprise move into the public sector, universities, hospitals, government, but not normally as the chief officer. They often have come over in roles of business or development fund raising, but the focus hasn't been on the chief executive officer role. I think universities are going to continue to normally assume that someone has had an academic background, has been part of the instructional faculty world, has moved into academic administration and then on to university presidency. A great, great majority of university presidents still come with that background.

Do most of them teach?

I think most of them are like me. They have an interest in teaching, they find it enjoyable, I think it is something that the students in the way you can't experience through anyone else. But they find it hard to accommodate and have to accommodate it periodical rather than

technical sense an agency. We represent something that the people of the state through their government said they want and that is important to them. They have a right to expect that their elected officials understand that and that we deal with those elected officials in an effective manner. So I think that if I am going to be a good university president, it is going to require me having a fairly confident attitude in all of those ways and features.

What do you think the role of the Montana Kaimin should be in the university community? Should it be the watchdog of the administration or merely a laboratory for journalism?

I think I have a pretty well-formed balance of understanding of the university as an academic community, and the university as an enterprise that has to think about how it manages its resources.

— University president has to be many things — an academician, a businessman, a politician. Are you all of those things?

Well, I don't know. I have only been a university president for a short period of time. You will have to judge whether I am all of those things. I think I have a pretty well-formed balance of understanding of the university as an academic community, and the university as an enterprise that has to think about how it manages its resources. And I also understand the importance of describing what we are and our needs effectively. We are a state university, we really are in a

16—Montana Kaimin • Tuesday, September 29, 1981
If you're a newcomer to the University of Montana you may need a few handy tips on how to get around, where to get a burger at 4 a.m., where to find cheap Levis and how to escape all the city craziness when you get the blues. The following survival guide may help you figure Missoula out.

Bicycle is far and away the easiest way to get around town.

The town is small enough that you can get anywhere you need in about 10 minutes under your own power. Beginning in November, however, licensing is required on all bicycles. Licenses can be obtained at City Hall and will buy four years' worth. By the way—lock your bike. Trust no one. There are lots of bike thieves out there.

If bikes won't do it, buses will get you just about anywhere. Call Mountain Line at 721-3333 and they can tell you when and where you need to go.

It's 4 a.m. You can't sleep. Your macro-economics book is so fascinating you can hardly stand to put it down, but you need a little sustenance to get you through the chapter on comparative advantages. You head for the fridge. Empty except for some moldy mayonnaise. What to do?

Well, there are a few eating establishments around town that cater to red-eyed, ravished and insomniac academics. Some of those places are: The 49ers at 301 E. Broadway and at the crossroads of Interstate 90 and Highway 93, Perkins Cafe & Steak at 700 E. Broadway, Sambo's Restaurant at 2922 W. Pine, across from the courthouse. Check the Yellow Pages for all the others.

The Army-Navy Economy Store, 322 N. Higgins Ave. (right downtown), is another place for good buys on used clothing—especially wool and outdoor clothing. It also sells tents, boots, packs and a multitude of camping paraphernalia.

When you can finally stand life in the Garden City no longer, pull on your wool shirt that you just bought at the Salvation Army, jump on your licensed bike, dash to Perkins and grab a snack and head out of town. But where?

Well, the three closest and best bike rides in town are Pattee Canyon, the Rattlesnake and the Big Flat Road.

To get to Pattee Canyon follow Higgins Avenue south along the golf course. At the end of the golf course Higgins bends to the right. Turn left there and you'll be on the Pattee Canyon Road. It's five miles uphill, but it's a pleasant ride, there's fine hiking at the top and it's a fast cruise coming down.

The Big Flat Road is on the other side of the valley and goes out of town. Take Higgins Avenue south to South Avenue. Turn right and go all the way across town to 45th Street. Turn right again and go two blocks to North Avenue. Turn left. You cross Maclay's Bridge and will be on Flat Road. It's paved for about nine miles and there's little traffic.

To get to the Rattlesnake, head north on Van Buren Street, which is the easternmost exit of the Interstate. Follow Van Buren for about four miles until you see a small dirt turnoff on the left. That is the entrance to the Rattlesnake Wilderness Area. A few hundred yards down is a parking lot where you can leave your bike. If you walk north for 200 miles, you'll end up in Canada.

If you don't feel like going all the way, you can go just as far as the Stuart Peak, which is a nine-mile hike from the parking lot. The striking view from this 6,000-foot mountain includes sparkling alpine lakes, the distant skyline of Missoula and an occasional bear.

The best day hike close to town rises right out of the UM campus. Mount Sentinel, the nearly 5,000-foot mountain immediately east of campus drive, can be climbed easily from base to summit in several hours. Trails continue on from the top to a higher summit about two and a half miles further east where the radio towers are located. Entrance to the mountain and the trails is off campus drive, next to the Physical Plant office.

Perhaps the most dramatic day hike is 9,075-foot Lolo Peak. Located south of Missoula in the Selway-Bitterroot Wilderness Area, Lolo Peak is the highest mountain within sight of Missoula. To reach the trailhead, take Highway 93 south to Lolo, and turn right on Route 12. Several miles up you will pass the Knotty Pine Cafe. Just after that there will be a Forest Service road on the left—Mormon Peak Road. Take this road to the last switchback before the old firetower foundation at the top. From there it is about four miles and nearly 4,000 feet to the top.

If your idea of after school fun includes ingesting various intoxicants, whether they be illegal or liquid, you ought first to ingest several Missoula laws.

Possession of up to 60 grams of marijuana is a misdemeanor, but since all drug offenses are heard in District Court, the judge sets the penalty. It can be higher than 450 or six months in jail.

Once a month a rumbling street-cleaning truck cruises west of the pole streetlamps and scrubs the deserted roadways of midnight Missoula. If your vehicle impedes its progress, you will receive a $4 fine and a possible tow at your expense.

The truck follows a simple schedule and cleans only one area of the city during each week of the month. When it is in your area, it can be avoided by parking on the even-numbered side of the street on even-numbered days and on the odd-numbered side of the street during odd-numbered days.

During the first week of the month, the truck cleans north of the Clark Fork. During the second week, it cleans south of the Clark Fork, east of Brooks Street and north of South Avenue. During the third week, it cleans south of the Clark Fork, west of Brooks Street and north of South Avenue. And during the last week it cleans south of South Avenue.
Bucklew . . .

Cont. from p. 15

with my family. If I was to try to carve out a whole set of recreational, extra activities that were separate from my family, then I don't know when I would have family time. My children are 14, 13 and 11—the time when I need to be with them and want to be with them—and I want to be with my wife in settings other than obligatory social settings. Love skiing, not a great skier. Just took it up a couple of years ago but it's an example of something I like to do and my three children like to do, and so that's something we will do a good bit of. Whenever I can squeeze time out it will be to head to a ski slope this winter. They like fishing—they all enjoy fishing. I enjoy fishing—none of us are great at it but that's something we will do together every day.

My middle daughter is a fine basketball player—she is generally a fine athlete and we all sort of enjoy watching her. I have a daughter, my oldest daughter, who really enjoys music, chorale things. We make sure that when she is in stage, when she is being active, we are there as a family because we are interested in her abilities.

How far do you jog every day?

I don't know the distance. We got involved in a program that was a time deal and we run 20 minutes or so in the morning. We get up pretty early in the morning—it's still dark—and we are out doing our running. That's become a pattern, which at first was very difficult, but now we even look to it. My mother sent me an article the other day that was telling me that jogging is not only habit forming, but that indeed people who jog and then miss it are truly missing it. Their bodies have accommodated it in a way that they feel slovenly when they haven't done it. I have experienced that, so it's something that I really both look forward to doing and feel better when I am doing it. I really loved history and I still love history quite a bit. That was my undergraduate major. I thought I would teach; probably in a high school somewhere. But things changed, and I had an opportunity and I got into personnel work and enjoyed that very much. One of the things that I have to say about my background is that education has often followed some experiences. I got involved, and that developed an interest, in the public sector issues. I got a degree in political science, and while I was doing my work, I started to focus on labor economics and labor relations as a specific area of interest. When I finished my doctorate, I had to work, and it turned out that I was really fortunate. I got very responsible positions as I was a student working, many others thought of me as someone working who was still slaving hard on a doctoral degree. I thought that I would teach at the university level, and in fact I did, but I stayed in the administration because I had a background. But for the last 10-12 years I have known that university administration was really very rewarding for me. I found it something that I really enjoyed working with. I have been very fortunate, I have been part of first-class administrations. I worked with fine people in the last couple of years, I have thought that a university presidency was something that I had the background to do and the interest in doing.

What's next?

(Laugh) Boy, I'll tell you next for me is being president of the University of Montana and beyond that I have no aspirations. Five years from now you might ask me that question and I would have a different sense, but nothing else next.

If you're taking tough courses, you need all the help you can get.

If you really done it to yourself this term, you need an advanced calculator you can count on through thick and thicker.

You need the most advanced functions and programming features. You need lots of pre-written programs to save you time. You need Continuous Memory and the utmost in dependability. You need an HP calculator.

The HP-34C. All the help you can get.

Hewlett-Packard offers you eight different calculators priced from $55 to provide professional solutions in science, engineering and business. So visit your nearest HP dealer for a hands-on demonstration. Then buy an HP calculator. It may be the last easy thing you do for a long time.

For details and the address of the dealer in your area, call toll free: (800) 547-3400, Dept. 658N, except Hawaii and Alaska. In Oregon, call 758-1010. Or write Hewlett-Packard, Corvallis, OR 97330, Dept. 658N.

Prices are suggested retail excluding applicable state and local sales and service taxes—Continental U.S.A., Alaska and Hawaii. 11/31.
UM goes modern with library security system

A beeping alarm sounds and an exit gate locks shut, preventing you from leaving the library with a stack of library books. This is what would happen if you tried to walk out of the library without checking out the books. The Maureen and Mike Mansfield Library has a new security system.

The bulk of the library materials are now sensitized and must be de-sensitized when checked out at the circulation desk, said Erling Oelz, director of library public service. If they are not desensitized, the alarm sounds before the patron can exit the building.

With the de-sensitizing system, a magnetic strip on the book must be de-magnetized or an alarm will go off, causing the exit gate to lock.

The new system, purchased at the end of Spring Quarter from the 3M Corporation, is now installed and working. Funded with money from the University of Montana administration equipment fund, the system cost $41,940.

"It (the new system) allows a free flow of people out of the building. In the past the system was manual," said Oelz. Before, book bags and other large carryalls were checked by library workers in cooperation with library patrons.

"If people are honest and there is a concern for a lack of materials (available in the library) this new system will help," Oelz said.

A few other changes are apparent on campus this fall. The parking lot by the field house is now paved. The lot has 481 spaces, including five spaces for handicapped parking, and an area for motorcycles. The entire construction cost $135,000.

The psychology and pharmacy departments are now housed in a new building located immediately west of the chemistry-pharmacy and journalism buildings, which includes an underground science theater that seats 450 persons. The theater is just west of the Journalism Building, under the brick patio area.

The biggest physical change in the Liberal Arts Building is the reduction in window space. Last winter and spring there was a controversy over whether the windows in the building should be reduced or remain as they were. The plan was to reduce window size and insulate to conserve energy. Many were opposed to the plan because it reduced much of the view from offices and classrooms in the building. The plan was carried through and the new, smaller windows were installed.

"The windows are a lot smaller and there's less opportunity to see what's going on outside," said Ray Landear, associate professor of philosophy.

Steam traps and control valves in the heating and ventilating system were also replaced and rebuilt. Thermostat temperature controls were rebuilt in various rooms.

Eventually all light fixtures in the east office and classroom wing will be replaced with fluorescent lights which will provide more light in these areas.

We're your bank on campus...

When you have a checking or savings account at Montana Bank, you can bank 24 hours a day, 365 days a year right on campus! Montana Bank's 24+ banking center is located downstairs in the University Center building for deposits, cash withdrawals, loan payments, and transfers between accounts. And because Montana Bank is so handy for University students, we offer special student accounts and bankers attuned to the special needs of students.

Before classes start, why not stop by Montana Bank and ask about our solar energy capabilities. We'll be happy to explain how we have put clean, economical sunshine to work as a heating source for a modern bank and office building.

Student IDs draw a blank

Bain explained. They had been ordered about two weeks ago from Polaroid, a company based in Irvine, Calif.

However, the order, instead of being mailed air freight, was sent parcel post, which is a slower mail classification, he said.

"Polaroid has been a difficult company to work with and they fouled up the order coming out of the shipping area," said UM Purchasing Director Larry Rabold.

The order is expected to arrive in Missoula this week. Bain said they will try to make obtaining permanent IDs as convenient as possible for students.

Equipment for preparing the IDs will be set up in the hall in front of the food service entrance, he said.

The temporary IDs are small plastic cards which bear the names, but no pictures.

Students eating at the food service are required to have their meal pass number placed on their photo ID.

About 400 students who had been issued temporary IDs had their meal number placed on their picture, said Piquette.

But 160 students who did not have a photo ID were required to obtain temporary meal passes.

However, the problem with obtaining supplies for the ID cards goes deeper.

The registrar's office had intended to obtain more durable cards this quarter, similar to the quality of credit cards, Bain said.

New laminating machines had been ordered and received earlier this summer. An order for the pouches was received at the UM purchasing office July 29, said Rabold.

Before the order can be purchased, however, it must be sent to the state purchasing office, which bids the order, he said.

"Polaroid has been a difficult company to work with and they fouled up the order coming out of the shipping area," said UM Purchasing Director Larry Rabold.

The state usually takes six weeks to complete an order and during the fall the high statewide purchasing demand delays the process about another month, he explained.

The UM purchasing office also has a high demand of orders for fall.

"We're in the same situation the state is — we're running considerably behind too," Rabold said.

He said the purchasing office took a week longer than normal to process the order because of the high purchasing demand.

"We fight this battle every year," he said. He suspected other departments also may not have received the supplies they had ordered for fall.

The purchasing office learned two weeks ago that the state had not yet started the bid for the pouches. At that time the order was placed with Polaroid to obtain used pouches.

The bid for the new pouches is expected to be completed in October. The more durable cards will then be issued Winter Quarter, Rabold said.

Voter registration deadline draws near

Students and other new Missoula residents have less than a week to register to vote in the Missoula city elections Nov. 3. The deadline is Monday, Oct. 5 at 5 p.m.

To register, students must be residents of Missoula and have their automobile, if they own one, registered in Missoula County. Students must also fill out a voter registration card and have their signature witnessed by either a notary public or someone who is already registered to vote in Missoula.

Incumbent Democratic Mayor Bill Craig will face a challenge from Republican John Hamp. Incumbent Ward 4 Alderman Frankia Supina will face Democrat Charles Briggs. Incumbent Ward 5 Alderman Rosealie Buxton will face Republican Tim Hubbard. Incumbent Democratic Ward 6 Alderman Bill Potts will face Republican Frank LePaine.

In Ward 3, Democrat Mary Palmer will run against Republican Jannell Hopkins. Alderman Bill Boggs resigned last summer after the ward's other alderman, Ernest Millhouse, pressed an inquiry into whether Boggs actually lived in the ward. Boggs' appointed replacement, Myra Bart, is not seeking the seat again.

Ward 1 Alderman Cass Christian, Ward 2 Alan Chisholm, Ward 3 Jeanne Yvonne Rasavang, City Treasurer Georgia Walters, and Municipal Judge Wallace Clark are seeking reelection unopposed.

Ward 1; the lower Rattlesnake and the University area east of Arthur Avenue and north of Beckwith Avenue.

Ward 2; north of the Clark Fork and west of Higgins Avenue and Greenough Drive.

Ward 3; south of the Clark Fork between Higgins Avenue and Stephens Avenue.

Ward 4; the University area south of Beckwith Avenue and Connell Avenue and the foothills area south of S.W. Higgins Avenue.

Ward 5; between Russell Street and Higgins Avenue south of Mount Avenue and north of S.W. Higgins Avenue and some areas south of 26th Street.

Ward 6; west of Stephens and west of Reserve Street between Strand Avenue and the old Milwaukee railroad bed and some outlying areas west of Reserve Street.

For the exact boundaries and voting information, contact the Missoula County election office at 721-5700 ext. 468.

Student involvement, conference part of ASUM plans

While University of Montana students have been swimming, hiking, sleeping and generally enjoying summer break, the ASUM government officers have been involved in a variety of projects. The top-priority project on ASUM President Steve Spaulding’s agenda has been the planning of a student government conference, to be held at Chico Hot Springs Nov. 15-16. A number of student-oriented subjects will be discussed at the conference, says Spaulding, including the student press, the collective bargaining process, the student grievance procedure, student lobbying and the effect city and county government decisions can have on students.

The conference will include representatives from the six schools of the university system and Acting Commissioner of Higher Education Irving Dayton. Invitations will be extended to the Board of Regents.

Spaulding also said that a major project he will be working on during Fall Quarter will be getting students involved in Missoula city elections, which are to be held in November. ASUM will be working with the Student Action Center in registering students to vote. After the election, Spaulding said he hopes to have a student placed on the City Council in a non-voting position. The student would be able to join in debates.

An update of the ASUM by-laws is also planned for Fall Quarter, Spaulding said. Some confusion has been encountered in the past because of the lack of a definitive set of by-laws. Spaulding also plans to finish revamping the interview process for ASUM positions. Programming director Sam Goza came under fire Spring Quarter for using an ad hoc interview process to choose the Programming coordinators. He and Spaulding worked up a tentative interview policy during the summer.

Vice President Eric Johnson has been working on a number of projects which he says will benefit students in many different areas.

He said arrangements have been made for a student to sit in on negotiations with Blue Cross officials for Blue Cross coverage of UM students. The student, a member of the Health Service Committee, is Bob Brown, who also was the student representative during University Teachers’ Union contract negotiations last spring.

A job referral service has been established at UM in cooperation with the Missoula Job Service, Johnson said. (See related story page 14).

A procedure has also been established whereby people with complaints about University Center Courses may channel those complaints through the ASUM complaint officer, Mickale Carter.

One of Johnson’s projects during the fall, in addition to his duties as overseer of all ASUM committees, will be to attempt to have married student housing annexed into the city. He said this would improve the voter rights of those living in married student housing.

Business Manager Carl Burgdorfer and Accountant Andrew Czomy have been closing out the books on the 1980-81 fiscal year, but have not finished because some groups still have outstanding bills.

Burgdorfer said his job Fall Quarter will be mainly “making sure that things are done right—that the money is being spent right.” He is also in charge of arrangements for the ASUM-sponsored charter flight to New York over Christmas break.

250 arrested

SAN LUIS OBISPO, Calif. (AP)—About 250 protesters, including actor Robert Blake and rock star Jackson Browne, were arrested yesterday near the Diablo Canyon nuclear power plant during the last day of a planned two-week demonstration at the facility, police said.

The arrests brought to 1,900 the number of people arrested at the plant since Sept. 15.

Browne was taken into custody for a second time as he backpacked through the rugged hills behind the big $2.3 billion double-domed reactor located midway between San Francisco and Los Angeles.
Competency tests may become part of college curriculums

Over one-third of freshmen at UM need writing help

Natalie Phillips
Kiana Sport

Over one-third of incoming freshmen need "special attention" to improve their writing skills, according to Jocelyn Siler, instructor in the College of Arts and Sciences.

A random sample of the approximate 1,500 freshmen tested revealed that about 37 percent of the students are not ready to take English Composition 100. The freshmen were tested in writing ability, reading skills and mathematical ability. Scores were computed during orientation week, allowing advisers to assist freshmen in their class selections. Students entering under this year's catalog will be required to take an exiting exam after completing 110 credit hours, but prior to graduation.

The placement exams are not mandatory and the advice, as a result of the exam scores, is only a recommendation. SAT and ACT exams are not required for entrance to the University of Montana, so there is little information available to advisers about the student, according to College of Arts and Sciences Dean Maureen Curnow. 

"There's been a general feeling that our undergrads are just not adequately educated in a liberal arts sense," says Faculty Senate Chairman Gary Thompson. "Many students are coming (to Oklahoma) with such low reading levels we will have to force them to simply ease them through the system. As a result, our academic standards have visibly declined."

There remains some confusion about how many other schools require such tests. The University of Colorado last year decided to allow—but not require—individuals to give them. But Arts and Sciences Dean Everly Fletcher notes, "I don't think the option has been exercised at all. It would take a huge amount of work to formulate and grade such exams."

Harvard and Yale have required comprehensive exams of graduating seniors since the 1950s, although Yale now allows "approved substitutes" like senior theses or field work. Administration at both schools were unsure if any other colleges require competency tests, however.

Dr. Robert Calfee of Stanford's School of Education describes a "dimmer view. "It makes even less sense than does high school testing."

Any such exam would either be too little or much too late," Calfee asserts. "You'd be imposing a standard that's impossible to use fairly. It's a yardstick for competency, it's just plain dumb."

Alternative energy exhibits will end Wednesday

A conference on alternative and renewable energy resources that includes several exhibits, panel discussions and lectures will be held on the University of Montana campus this week. The conference, which ends Wednesday, is co-sponsored by the Bonneville Power Administration and the states of Idaho, Oregon, Washington and Montana. UM students, faculty and staff members will be charged a $5 attendance fee.

Some topics that will be discussed today include wind generation, lithium storage, manufacture of alcohol by Northwest Pacific Energy Co. and public and private financing of energy-producing mechanisms. "Chips on solar wind, geothermal and hydro-energy sources are on display at the University Center. Following the conference tomorrow there will be a microhydro workshop. The workshop is sponsored by the BPA and the Montana Department of Natural Resources and Conservation. It is open to the public, free of charge."

How many people eat, drink, and get married; buy, sell, and build; make contracts and attend to their fortune; have friends and enemies, pleasures and pains; are born, grow up, live and die — bat aleas!

Griz whip UNI

Montana Grizzlies roared to a 42-21 victory over Northern Iowa. Montana scored first as wide receiver Brad Dantic took the ball on a reverse from four yards out with 11:53 left in the first quarter. The score was set up by Mitchy Sutton's 34-yard punt return to the Panthers' 21. Sutton ran a two-yard throw from quarterback Steve Sando to tight end Tom Roberts. Steve Hurrle led the Panthers' meager ground game with 10 yards on four carries.

Tight end Brian Salonen led UM receivers with four catches for 63 yards. Panther Ken Harvey, the leading receiver in division I-AA going into the game, caught 10 passes for 128 yards and two TDs to lead UNI. The Grizzlies' next opponent, Montana State, left a 45-yard scoring pass to Dantic for a 14-7 lead with 2:20 left in the quarter. Dantic had two catches for the day for a total of 62 yards.

Montana then scored four unanswered touchdowns, taking advantage of numerous mistakes on the part of Northern Iowa. The Panthers fumbled the ball away four times, once in their own end zone, and had two passes picked off.

A crowd of 8,287 at Dornblaser Stadium saw Montana rush for 240 yards and 62 TDs in the air. His performance was backed up by Bob Rominger, who took the field as kicker and defense are keys for '81 Griz football team enters the 1981 season looking to improve on last year's wide-open offense that saw 16 TD passes, and a quarterback catch a pass. Thirteen different players scored touchdowns.

Big Sky football race wide open

Sports editor's note: The Big Sky Conference football race should be wide open in 1981. Boise State, who won it all in Division I-AA last year, returns lacking many of the players from its championship team. What this means is the race should be wide open in 1981.

Boise State, who won it all in Division I-AA last year, lost 24 lettermen. Four starters return on a defense that ranked sixth in the nation in division I-AA last year.

Coach Jim Criner, who enters his fourth year at Boise State, has an experienced offense that ranked second in the nation with an 11.6 average in 1980. The Bobcats' 4-6 record in 1980 marked the first time in nine years an MSU football team had posted back-to-back winning seasons.

If the starters stay healthy, Idaho could well challenge for the Big Sky title in 1981. Even if they lose a couple of the 16 returning starters at the tackle spots, Boise State has an excellent shot at posting their first back-to-back winning seasons in 56 years.

UNIVERSITY OF IDAHO

Quarterback Ken Hobart (6-1, 190) rushed for 829 yards out of the backfield in 1980. Running back Jerry Bird (6-0, 190) hauled in 23 receiving touchdowns. The defense is an experienced group and ranked second in the nation in sacks with 17. Defensive backs Kelly Miller (6-1, 180) and Greg Jennings (5-11, 174) had 96 and 97 tackles, respectively.

The defense was an experienced group and returned starters at every position. End Joy Hayes (6-6, 227) was an honorable mention All-American, heads a secondary that could be the team's strongest point. Larry Alder (6-1, 190) will start at safety for the second straight season. Cornerback Bobby Fryer, who runs a 4.4, is the fastest player on the team and should be a threat to return punts.

The offense ranked sixth in the nation in division I-AA last year. The running back tandem of Dwain Wilson (5-11, 170) and Lamar Fite (6-1, 196) combined for 974 yards in 1980. Tailbacks Dwain Wilson (5-11, 170) and Lamar Fite (6-1, 196) should both see action at fullback.

The offense will have to mature rapidly if we expect to defend our Big Sky Conference Championship.
Big Sky . . .

They played hard every game. The Cats return 12 starters from last year. Quarterback Barry Sullivan (6-4, 170) ranked third in the conference in 1980 with 1,020 yards and a 5.87 completion percentage, but threw for only three TDs.

Tailback Tony Boddis (5-11, 190) led the team in rushing last season with 655 yards and a 4.5 average. Split end Pat McLeod (6-0, 170) caught 54 passes for 729 yards in 1980 while flanker Bill Walker grabbed 21 for 367 yards. Flanker Brett Freeman (6-0, 180) didn't start last year, but averaged 19.2 yards on 19 catches.

The offensive line should be strong with center Larry Rubens (6-1, 240) and guard Don Samuelson (6-2, 230) returning after being injured early in 1980. They join Scott Sax (6-7, 250), a two-year letterman, at tackle. Five starters return for the Bobcats on defense, including the entire secondary. Strong safety Tim Budристав (6-2, 215) had 81 tackles and was an honorable mention all-league pick in 1980. Free safety Jim Anderson (6-0, 180) and cornerbacks Bext Chapman (5-11, 180) and Paul Dilley (6-0, 190) give MSU the most experienced secondary in the conference.

Tailback Phil Brumse (6-5, 245) is the only other returning starter on defense. Ten lettermen return and Lubick hopes for top performances from them to fill a large void created by graduation.

NORTHERN ARIZONA UNIVERSITY

Last year, NAU lost 14 starters to injury, with seven being sidelined for the season. The Lumberjacks finished the season with a 5-4 record, its worst since 1975. This year, with 21 returning lettermen and 15 redshirts, head coach Dwain Painter feels his team is solid.

Quarterback Scott Lindquist (6-3, 200) replaced the injured Brian Potter in the third game of last season and completed 109 of 197 passes for 1,466 yards and 9 TDs. Lindquist recently turned down a $40,000 contract offer by the Cincinnati Reds in order to remain at NAU.

Tailback Mike Jenkins (5-11, 200) rushed for 796 yards in 1980 while backfield Rusty Summers (5-11, 207) gained 389 yards on the ground and completed five of eight option passes for 137 yards and four TDs.

Kevin Magerum (5-10, 175), younger brother of Stanford All-American Ken Magerum, is the top receiver.

The offensive line ranks as one of the biggest in the league. Tackles Greg Arthur (6-6, 265) and Fred Smith (6-6, 280), guards Rick Rodrigues (6-5, 250) and Paul Smith (6-3, 260) and center Rod Anderson (6-2, 240) should open plenty of holes.

The defense has five returning starters, but the big story is the comeback of linebacker John Schachtner (6-5, 230), Schachtner, an All-Big Sky and Associated Press All-American in 1978, has recovered from a near-fatal gunshot wound suffered near the end of the '79 season.

Dick Shumway (6-1, 210) returns at linebacker where he should be joined by transfer Ron Thomas (6-4, 220), who was Hugh Green's backup during his freshman year at Pittsburgh.

The secondary is headed by returning starter Junior Solomon (6-4, 196) and redshirt John Land (5-10, 185).

WEPER STATE COLLEGE

The Wildcats look to rebound from last year's 4-7 record, which cost Pete Richardson his head coaching job. There is plenty of room for improvement, considering WSC lost its last three games of the season by scores of 50-13, 46-5, and 75-0.

New coach Mike Price insists the Wildcats aren't rebuilding, but merely reloading.

"Expect the unexpected. We're going to turn Weber State football into fun."

Price may have his work cut out for him. There are six candidates for the quarterback job, but no real standout among the group.

Split end Curt Miller (6-3, 205) returns after catching 32 passes for 474 yards last year. The three-year letterman also handles the punting duties, posting a 37.7 yard average in 1980. Split end Eric Allen (5-10, 176) had 28 catches for 488 yards last season.

Tailback Kevin Matthews, who was Hugh Green's backup during his freshman year at Pittsburgh.

The defense is led by Danny Rich (6-3, 220), a first-team All-Big Sky selection last year.

Two starters return on the line tackle Mike Morely (6-1, 230) and end Curtis McGahan (6-4, 220).

Lady Griz VB team eyes regional title

Scott Turner
Kames Sport Editor

An experienced University of Montana women's volleyball team is looking forward to a big year in the 1981 edition of the Northwest Women's Volleyball League. The NWVL enters its second season with seven teams from three states. The members are Portland State, Oregon State, Oregon, Washington State, Washington, Montana State and Montana.

Last year, the Washington Huskies finished on top. This year, coach Dick Scott expects his Lady Griz to challenge for the title.

"I'm very optimistic about this season," Scott said. "We only lost one starter from last season, and I think the year of playing together will really help. Our mental attitude will be improved because the players understand each other better.

"We also added some height, and this will allow us to try some new things," Scott continued. "I expect to see a lot of improvement in the area of blocking because of the added height."

Returning in 1981 are 5-8 senior Jean Cavanaugh and 5-11 junior Pat Benson. Both have started since they were freshmen.

Scott feels 5-10 sophomore Mary Klueber has the potential to become one of the best players on the team.

Seniors Diana Bandel and Moira Fagan are the most experienced players and should provide solid leadership.

Three more sophomores, Wendy Hoyt, Brenda Gilherson and Libby Shockley, will see a lot of court time.

Three freshmen add good height to the lineup. Kara Price, 6-2, Mary Beth Danger, 5-10, and 6-0 Sue Harbour are three players Scott feels will improve greatly as the season progresses.

There is one major change in the NWVL this year. Three of the teams, Oregon, Washington and Oregon State, will attempt to gain at-large berths in the NCAA playoffs while Portland State will hope to qualify for the AIAW national championships through regional play.

Scott believes Portland State and Montana State will be the teams that will provide Montana the most competition for the league title, with PSU as the probable favorite.

Upcoming matches:
Oct. 1 Washington State in Missoula
Oct. 2-3 Grizzly Invitation in Missoula
Oct. 5 Oregon State in Missoula
Oct. 9 Portand State in Missoula
Oct. 15 Oregon in Missoula

It does rain money—

The Associated Press

Baseball star Reggie Jackson is used to fans' adulation. And he is used to having money thrown at him by the Yankees management at contract time.

But he's not used to what's turning into the latest fad at Yankee Stadium: Fans in the right field stands have been tossing cold cash at him. The money really starts flying after Jackson hits home runs like his 450-foot game-winning shot Sunday.

What does Jackson do when the coins and bills start falling around him?
"I pick them up," he said. Sunday's collections came to

82,50, and one slug, pushing his total for the last few weeks to more than $200. It would have been more, Jackson said, but he was chased off the field by security officers.

Jackson, in the final year of a five-year, $3 million contract said, "This season has been my last regular-season game here. Why not take their appreciation? It was phenomenal. There was so much there, I couldn't pick it up," he said, his cap filled with silver and green.

Jackson, who takes the whole thing "as a compliment," said he would put the money to good use.

"I'm going to put it together in a trophy — maybe in a big apple."
Men harriers gun for NCAA's

Scott Turner
Kaimin Sports Editor

"We have an excellent chance," says second-year coach Dick Koontz, "to make the NCAA's as a team this year." Heidebrecht, who followed Koontz for two years at the University of Montana, is encouraged by the return of four lettermen and six outstanding track runners in Connecticut.

Heading the list of returnees is senior Mike Brady, a two-year lettermen from Spokane. He was a Big Sky Conference placer in the 1500 meters last spring. The Grizzlies' number two finisher at last year's NCAA meet, Kevin Dilley, a senior lettermen from Spokane, is expected to be one of the top harriers this season.

At least three of the newcomers will contend for the top spot, according to Koontz. Laurie Holm, Deirdre Hathhom and Lisa Freiisch are expected to contribute immediately. Rounding out the squad are Aimee Landry, Judy Goffens, Mary Kuehn and Kathy Reidy. "I'm looking forward to this season," Koontz said. "We have a strong team, but we have an equally strong schedule. I'm anxious to see how we'll compare with some of the larger schools."

Koontz also is encouraged by the return of two of the top freshmen in 1979, Gretchen Goebel and Shelly Thompson. Both were injured and unable to compete last season.

Another freshman, Mike Eischele, could also be a factor for Montana this season. From Marine Central High School in McHenry, Ill., Eischele placed second in the "A" cross country championships in Illinois last season.

"I think there will be five teams from our district in the running for the three spots," Heidebrecht continued, "and definitely we should be one of them."

The reason for Heidebrecht's optimism is the return of four lettermen and six outstanding high school and junior college recruits.

Upcoming meets:
Oct. 9 - Fort Casey Invitational, Whidbey Island, Wash.
Oct. 16 - Montana Invitational, Missoula, Mont.
Oct. 23 - Montana State, Bozeman, Mont.
Nov. 14 - Big Sky NCAA District VII Championship, Pocatello, Idaho

...to see how we'll compare with some of the larger schools."

Koontz points to Oregon, Oregon State and Washington as some of the tougher teams UM will face during the season.

"I think we have 10 solid guys," Heidebrecht said. "I am very excited about the season."

Heidebrecht said he expected Idaho State, Nevada-Reno and UM to be the top three teams in the Big Sky in 1981, and Northern Arizona and Weber State could also be factors.

Why Pay More?
There’s Still Lots of Time For Fun on the Water!
This could be you!

The Oakland Raiders had the last laugh on the rest of the NFL last January when they crushed the Philadelphia Eagles 27-10 in Super Bowl XV. Most people figured the Raiders wouldn’t even make the playoffs, but folks around the NFL have fallen into the habit of underestimating (managing general partner) Al Davis. Davis couldn’t help but look good after much-maligned quarterback Jim Plunkett won the MVP award in the Super Bowl and Comeback Player of the Year for the NFL. The Oakland talent goes much deeper than that. Halfback Ken King gives the Raiders the breakaway threat they never had before in the backfield with rugged Mark Van Eghen, Speedster Cliff Branch, sure-handed Bob Chandler and steady Raymond Chester complement each other well on pass routes.

The offensive line is getting old but not showing it yet. Shall, Upshaw, Dally, Marvin and Lawrence keep doing the job. But the real story for the Raiders last year was on defense. Oakland led the NFL in interceptions with 35 and All-Pro corner- back Lester Hayes had 13 of those. Ted Hendricks, another All-Pro, was at his terrorizing best in 1980 as was tackle John Matuszak. Rookie Matt Millen was sensational at linebacker and a cast of relative unknowns helped Oakland to one of its best defensive years ever.

The Raiders have a long road ahead to defend their title. Here is a look at their competition:

The Falcons' number one draft choice in 1980, tight end Junior Joiner, another Pro Bowl selection, grabbed 71 for 1,132 yards while wide receiver Charlie Joiner, another Pro Bowl selection, grabbed 71 for 1,132 yards (3,544) in 1980. His 31 TD passes was tops in the NFL.

THE CONTENDERS

San Diego — Air Coryell suffered a blow on the holdout and subsequent trade of All-Pro wide receiver John Jefferson, who caught 82 passes in 1980 for 1,340 yards and 13 touchdowns. One of, if not the best receiver in the NFL, Jefferson, would be irreplaceable on most teams. But not on San Diego.

All-Pro tight end Kellen Winslow caught 89 balls for 1,290 yards while wide receiver Charlie Joiner, another Pro Bowl selection, grabbed 71 for 1,132. The force behind all those flying balls is Dan Fouts. Fouts threw for 4,715 yards in 1980, breaking his own record and earning a spot in the Pro Bowl. He also threw 30 TD passes.

The Chargers had seven play­ ers in the 1981 Pro Bowl: Fouts, Jefferson, Joiner, Winslow, DE Fred Dean, DT Gary Johnson and DT Louie Kelcher. If the Cowboys have a weakness it’s the offensive line. The NFL’s fewest points in 1980 was The Raiders’ 13 yard line. But Sipe’s pass appeared in the Pro Bowl as did nose tackle Charlie Johnson.

San Francisco — The Forty-Niners had 20 passes going (57 catches for 1,058 yards), Wallace Francia (54 for 863) and Alfred Jackson (52 for 627) The backfield is strong. Will­ iam Andrews rushed for 1,308 yards in his rookie year and had 1,793 total yards and 30 TDs. Another Pro Bowl selection, wide receiver Jerry Butler, caught 57 passes and Frank Lewis had 40.
Could Surprise:

M I A M I — Don Shula and a great defense could push the young Dolphins a long way.

K A N S A S C I T Y — Quietly building up to be a tough team.

M I N N E S O T A — The Vikes have Tommy Kramer and Bud Grant, enough to excite their fans.

The Rest:

B A L T I M O R E — Could surprise, but probably won’t.

J E T S — Something is wrong here.

C I N C I N N A T I — New uniforms won’t help.

D E N V E R — Dan Reeves certainly can’t hurt the worst team ever to almost win it all.

S E A T T L E — Exciting, but a few years away.

W A S H I N G T O N — New coaching philosophy won’t make up for lack of talent.

S T. L O U I S — Jim Hart, Otis Anderson; the talent ends there.

G I A N T S — Some really good players, some really bad.

C H I C A G O — Has talent but too inconsistent.

P A M P A — Proved last year how bad they really are.

G R E E N B A Y — Bart Starr’s days may be numbered if the Packers don’t start winning.

P R O V E D — Bart Starr’s days may be numbered if the Pack doesn’t start winning.

S E A T T L E — Exciting, but a few years away.

W A S H I N G T O N — New coaching philosophy won’t make up for lack of talent.

S T. L O U I S — Jim Hart, Otis Anderson; the talent ends there.

G I A N T S — Some really good players, some really bad.

C H I C A G O — Has talent but too inconsistent.

T A M P A B A Y — Proved last year how bad they really are.

G R E E N B A Y — Bart Starr’s days may be numbered if the Packers don’t start winning.

N E W O R L E A N S — Bum has a lot of work to do.

S A N F R A N C I S C O — Quick, name five 49ers off the top of your head. Don’t feel bad, I can’t either.

R a i d e r s . . .

had been superb. Wide receivers Dave Logan and Rogen Backer and tight end Ozzie Newsome combined for 2,154 yards on 254 receptions while Pro Bowl running back Mike Pruitt led all AFC backs with 63 catches. Pruitt also posted his third consecutive 1000-yard season on the ground with 1,034.

The offensive line sports three Pro Bowl selections: tackle Doug Dieken, center Tom DeLone and guard Joe DeLamielleure.

Despite 224 tackles between linebacker Robert Jackson and Dick Ambrose, Cleveland’s defense was not too good. They tied for sixth in the league in rushing defense but ranked dead last in the NFL against the pass. If Cleveland expects to make it to the Super Bowl, they must first figure out how to stop the pass.

Dieken, center Tom DeLeone and linebacker Robert Jackson and Dick Ambrose, Cleveland’s defense wasn’t too good. They tied for sixth in the league in rushing defense but ranked dead last in the NFL against the pass. If Cleveland expects to make it to the Super Bowl, they must first figure out how to stop the pass.

Close, But Not Quite:

N E W E N G L A N D — Loaded with talent but evidently not using it right.

H O U S T O N — Earl Campbell and an old Snake aren’t fading fast.

D E T R O I T — A few players and a couple of years away.

L A S V E G A S — Personnel problems keep the Rams from being champions.

Season drama tickets save students money

On the heels of a successful summer season at the Riverfront Summer Series location in Casper Park, the department of drama/dance is ready to launch the 1982-83 theater season with renewed vigor. Missoula’s theater audience is growing in both size and sophistication, and the drama department hopes the variety of dramatic productions offered this season appeals to the diverse tastes of its audience.

The University Theatre will house larger productions with broad appeal such as the light-hearted musical farce, “Ernest in Love,” two Montana Repertory Theatre comedies and Shakespeare’s “Merchant of Venice.” Also in the UT will be Bertolt Brecht’s political satire, “The Caucasian Chalk Circle,” which features a cast of 65.

In the Masquer Theatre the drama department will offer innovative and adventurous plays, including two world premieres by UM’s own Professor of Drama, Rolland Meinholzer and former drama graduate student Jim Walke, as well as an experimental play by Antonin Artaud, “The Cenci.” In order to accommodate the tastes and budgets of a Missoula audience, there are two season ticket offerings available. A subscription to all the major productions receives a 30 percent discount over individual ticket prices, or a selection from four productions — and one Masquer Theatre production. 

The UT’s “realist” plays include: “Arden’s Girl,” a new American play by Liz Weilman and John C. Ellis, faculty organ recital. Enjoyable collection of music from Bach to today. Tuesday, 6:30 p.m. Department recital in Hall A.

AROUND TOWN

POETRY:
Brunn Bag Series — Poetry readings by Missoula poets. Tuesday, 11:30 a.m. Missoula Museum of the Arts. 335 North Pattee, Ph. 728-0447.

MOVIES:

— “A” is good but just not a “10” — Ends Thursday.
— Choo-Choo Philly and Flash — Carmen Miranda Livel Starts Friday at the Wilma.
— History of the World Part I — Better luck next time
— Kaimin’s knowledge so check with the theaters.
— With Terence Hill and Ernest Borgnine
— Better luck next time
— Arthur
— Is being a movie star’s daughter really all glamour and excitement? Faye Dunaway portrays a legend, Joan Crawford, with a legendary performance. (See Review.) World. 
— As always sex sells. Mann.
— — It’s good but just not a “10”
— Beauty and the Belushi. Village Twin.
— — A steamy, sleazy film. (See Review).
— Mommie Dearest — Is being a movie star’s daughter really all glamour and excitement? Faye Dunaway portrays a legend, Joan Crawford, with a legendary performance. (See Review.) World.
— — “10”

OUT OF TOWN DANCE:

Houston Ballet Company in Spokane. If you cannot wait until Spring, and the Hartford Ballet, here is your chance to see an outstanding troupe this fall complete with their own traveling orchestra. “Peer Gynt” next week.

The University Theatre’s first performance — and one Masquer Theatre production — will be on Oct. 1 at 8 p.m. in the Masquer Theatre with the Dave Brubeck Quartet and the promise of a full evening of high-quality jazz (see related story). If you want another style, wait a few weeks. On Oct. 21 the Tokyo String Quartet presents classical string sounds. With 10 different performing styles, as UM’s posters point out, you really can “create your own series.”

You can tailor a package of performances by buying advance tickets. For instance, if students purchase a package of four performances, tickets will cost $15.50. Staff photo by Paul Yaniv Deelder

ASUM season offers variety

Kipp Bausset

ASUM’s 1981-82 Performing Arts Series offers something for everyone. There’s enough artistic variety to suit most any taste: jazz, chamber music, instrumental, mime, dance.

This academic year’s schedule starts Oct. 1 with the Dave Brubeck Quartet and the promise of a full evening of high-quality jazz (see related story). If you want another style, wait a few weeks. On Oct. 21 the Tokyo String Quartet presents classical string sounds. With 10 different performing styles, as UM’s posters point out, you really can “create your own series.”

You can tailor a package of performances by buying advance tickets. For instance, if students purchase a package of four performances, tickets will cost $15.50. Cont. on p. 35

Brubeck returns Thursday

Jazz returns to the University of Montana campus Oct. 1 at 8 p.m. when Dave Brubeck and his quartet perform at the University Theatre as part of ASUM’s Programming’s Performing Arts Series.

At 60, Brubeck still maintains a yearly itinerary that covers every corner of the world. This year the Quartet will perform at Carnegie Hall, the Hollywood Bowl, the Monterey Jazz Festival and a one-hour TV production for PBS as well as tours to Australia, Hong Kong, and Europe. Brubeck’s harmonic characterizations and use of unorthodox time signatures go back three decades. His influence on contemporary music has become so pervasive that what was once considered daring and avant garde is now accepted everywhere. Several of Brubeck’s compositions have become jazz standards. In 1977 Brubeck was named a Duke Ellington Fellow by Yale University. Other members of the Quartet are Jerry Bergonzi on saxophone, Chris Brubeck on electric bass and Randy Jones on percussion.

Tickets for the Oct. 1 concert are on sale at the UC Bookstore. For more information call 243-4833.

**Body Heat** is this season’s sizzler.

Robert Lemperly
Kathie Reviewer

Body Heat is a moody, kinky, wholly cynical movie about romantic nihilism. The targets of Lawrence Kasdan's wry, tough, ironic, and compassionately ironic are about as far from matrixes of romance, weakness and humanity, probably in that order. Lawrence Kasdan makes his directorial debut here with great flair and charm, pooling riffs and ambience from motion pictures of the thirties and forties and Ray¬mond Chandler and James Cain novels. Though this film owes much to other movies, and most undoubtedly Double Indemnity, Kasdan isn't making a remake so much as he is using old themes to express new ideas.

Set in modern times in southern Florida during a heat wave, Kasdan's Body Heat makes us feel we are watching a thirties picture. John Barry's sleepy jazz soundtrack gives the picture the atmosphere of an old movie while the oftentimes raunchy dialogue and explicitness keeps yanking the viewer back to the present. The message of this movie is always 'Nothing changes, people are prone to evil, things will be exactly this way fifty years from now.' Kasdan presents future continuum of fatalistic thinking supplies much of the film's energy and friction. We know how things are going to ultimately turn out, but we are too drawn to ever lose interest. Kasdan uses the continual references to bygone eras to reinforce this acute sense of inevitability. And if Kasdan does not run the picture to the extremes of predetermined hopelessness that Melville's Ahab feels ("Twas rehearsed by thee and me a billion years be¬fore the ocean rolled."), Kasdan directs Body Heat with the idea that one movie very, very narrowly within looming circles of fate.

Though the plot has some mirthfully clever twists, plot is not what makes BH worth seeing. The plot everyone has seen all too many times: a handsome young man on the make gets tangled up with an attractive married woman and gets involved in a backfiring scheme to murder the husband for money. One goes to see this movie for its perspective, its odd slant and its bitter mannerisms. And for some super¬b acting.

Most notable is William Hurt, who plays a hardbitten, chainsmok¬ ing Lothario who is rapidly losing his youth and is quickly going to seed as a fourth-rate Florida lawyer. Hurt, who proved in Ahab that he was an actor of considerable talent, fills in the occasional gap in BH with squints and gestures and strange inflections until we not only believe him, but sympathize and empathize. Kathleen Turner plays the rich married woman who wants her husband's money but not her husband. She is never very believable. The entire movie spins on the axis of her sexuality, and she does not match the demands of her role. And Kasdan, who frequently manages to pull off dangerous flirtations with Aristotelian precepts of probability, misses the mark by casting Turner in the co-starring role. Turner is only half-way believable at best, and for the movie to truly work she must be entirely believable. She is pretty but not electric, sexy but not voluptuous, well-formed but not curvaceous.

There is also something faintly simian about Kathleen Turner's face. A veteran of daytime soap operas, Turner is only a third-rate actress at best. At times it looks like Kasdan is showing random out-takes from Turner's worst screen tests. Subtly is the crucial trait Turner lacks. She hypoes the action when she should be fey, she overacts when she should be downplaying her part. Hurt and Turner first meet, and Hurt follows her home, she stands inside her house trying to simultaneously show aloofness and unworldly. Kasdan's treatment of this scene is eerie and ominous. Kasdan has an acute sense of inevitability. And Hurt looks up to see a man parking lot as Hurt makes a date with the supposedly grieving widow, J. A. Preston's portrayal of a black cop borders on the absurd; his use of profanity and inflection are plausable; and Mickey Rourke con¬ tributes some of the best acting in the film. Rourke is the caricature of Turner's worst out-takes from Turner's worst. He makes the bomb for Hurt, to use in the murder (the viewer will want to return to see the movie again if only to hear Rourke say what has to be the greatest B- movie line of all time: "This season. It's a real crime.").

Body Heat, if not great, is ex¬ ceptional despite its flaws and imbalances. It is a movie of wicked insight and stunning detail. In the steamy, farcical, despairing climate the movie is set in, one finds a peculiar authenticity. Though Turner celebrates the death of romance, Kasdan con¬ demns Hurt not for dreaming of something more but for his inability to actually get it. Kasdan is too intelligent and a cynical director to let us forget that the movie is a fairy tale. The power of the film is its complete turn from anything sentimental or even vaguely romantic. Anything, BH celebrates the death of romance. Kasdan depicts a slimy, sordid, free-for-all world where romance is just another manner of hustling the slow-witted and the unworthy.
Still in boot camp
Kate Egli  
Montana View Arts Editor

Bill Murray does it again: he creates another self-indulgent movie. It is called Stripes, and I think he must have pinned his own on. Still the movie does have its redeeming qualities, such as: 

Redeeming Quality No. 1 — Bill Murray is funny.  
R. Q. No. 2 — The Army is still a popular institution . . . to make fun of.  
R. Q. No. 3 — Groups of misfits are generally lovable. Could it be the realization that we are better off than that? 

Aside from these features, we are still left with a movie that centers too much around Bill Murray and we are simply tired of seeing the man. We follow Bill Murray from the streets as a taxi driver to a failing apart relationship to the logical conclusion(?), the Army. He drags along his buddy, played by Harold Ramis, who leaves a promising career teaching English to a hopeless group of foreigners. The only flaw in Ramis’ performance is that it is too limited to moments between Murray. From this point the movie lurches and finally stands still. Maybe the producers have a TV debut planned because there were numerous spots perfect for runs to the fridge for a beer. If you like large doses of Murray, you will probably enjoy Stripes. If not you would be better off at home watching “Fridays.”

John Belushi— from rush to romance
Greg Gadberry  
Montana Review Editor

No one ever accused actor John Belushi of being too subtle. And no wonder. Since the early days of “Saturday Night Live,” Belushi has established himself as the most savage of comics, a clay-faced crazy man who delighted in spitting food in people’s faces. Even crude, furious, hilarious . . . Belushi was all these things. But subtle? Not likely.

But that was before Continental Divide. In this, Belushi’s first attempt at romantic comedy, the former samurai psychiatrist proves himself an able and often surprising comedian. Produced by Steven Spielberg.

ASUM . . .  
Cont. from p. 33

each, as opposed to $4.50 for single performance purchases. By subscribing to six or more performances you can save even more.

The subscription purchase of tickets remains the same as last season. But ASUM’s approach to the new series is different in some areas. Victor Gotesman, ASUM’s program manager consultant, says that the upcoming performances will be more widely spaced during the year and less expensive for students. Performances will have more popular appeal than last season, but the quality will remain high, Gotesman said.

Pursuing popular performers to appear in Missoula can present difficulties. But Gotesman points out that Missoula is actually a travel crossroads. “You go north to south you wind up in Missoula,” Gotesman says. “Denver to Seattle. East Coast to West. You always wind up in Missoula.”

ASUM also plans to offer rock concerts, dramatic performances, dance and music. For more information about what ASUM Programming has to offer, stop by its office on the first floor of the University Center or phone 243-6661.

Mothers are not always dearest
Polly Meeks  
Montana Review

If there is such a thing as life after death, and if we get to watch movies on the big screen after we die, I hope Joan Crawford doesn’t see Mommie Dearest, which is playing at the World Theatre. Her daughter Christina Crawford wrote an extremely revealing and harsh book about her mother that has been made into this Paramount film.

Joan and Christina’s relationship was one of a medinonous superstitious versus poor kid trying to figure out an eccentric mother. It is revealed in this film that Christina was adopted by Joan Crawford, then single, for publicity reasons only. Miss Crawford had people pulling strings for her so she could adopt children to get her big roles at MGM studios, and then later when MGM dumped her to get her new contracts with Warner Brothers.

Faye Dunaway gives a huge, amazing performance of the mentally tormented Joan. At times the charade’s actions and private madonna poses seem a little too exaggerated to be believable, but they are consistent enough to make me believe they come from Crawford and not Dunaway as an actress.

Faye Dunaway gracefully adheres to the features of Joan Crawford, and gives a powerful performance of a has-been queen of Hollywood. Diana Scarwid plays an intense, awkwardly touching role in her portrayal of Christina in her teens and later years.

Faculty Recital...

Organ Music in October

Kate Egli  
Kaimin Fine Arts Editor

Often people travel miles to hear a fine musician when they could hear gifted talent right at home. Norther is there a better example of this than with the faculty recitals at the University of Montana's music department. This fall there are four faculty recitals, led off with an organ recital by John Ellis, Oct. 6.

John Ellis is an associate professor of organ and music theory, and UM organist and carillonneur, a position he has held for 12 years. Before coming to UM, he taught at Hardin-Simmons University, Kansas State Teachers College and the University of Kansas. He was drawn to UM partly because of the music department's emphasis on faculty as performers and has performed numerous recitals in the past.

A native of North Dakota, Ellis received his bachelor and master's degrees from the University of Michigan, and in 1975 he was awarded his doctor of musical arts degree with honors from the University of Kansas.

In addition to the organ and the carillon, Ellis plays the harpsichord in the Baroque Ensemble. The ensemble will be traveling to Seattle in November to perform with the concert in the parks series. Also this fall the ensemble will play in Hamilton for the community concert series.

The recital will be held next Tuesday at 8 p.m. in the Music Recital Hall. Ellis calls the music selections a "potpourri," which includes two Bach pieces and a Persichetti from the "golden age of organ music" the eighteenth century or baroque period. Twentieth century piece by Charles-Marie Widor, Cesar Franck, Maurice Durufle, and Charles Ives comprise the remainder of the program.

Good, but not religious good.  
—Thomas Hardy

There are no atheists in foxholes.  
—William Cummings

What's the Constitution between friends?  
—Timothy Campbell

College enrollment creeps upward

Despite predictions that college enrollment would drop dramatically in the early eighties, there may actually be about 10,000 more students enrolled this year than during the 1980-81 academic year, according to an annual fall overview published by the U.S. Dept. of Education.

The Education Department's survey predicted that college enrollment, which hit an all-time high of 12,115,000 students last year, could inch up to 12,135,000 this year.

The survey also predicted that the college population "appears to be reaching its peak." Even that moderate forecast contrasts with the predictions of six years ago, when most observers said college enrollment would plunge during this decade, and that the bottom would drop out of the industry.

The difference between those predictions and current reality, explains Lee Eiden of the Dept. of Education, is that "the original projections were patterned upon the availability of higher education's 'natural' clientele—18-to-24-year-olds."

While enrollment from that age group has indeed declined, Eiden says schools have compensated for the decline by "reaching beyond their original 'universe'" and actively recruiting older, part-time students.
It’s very clear,” Peng asserts, “that today’s incoming college student is much more interested in making as much money as he can, and that this may indeed be the prime purpose in getting an education. Times have changed decisively from a decade ago.”

Peng’s study team plans to follow the same group of students through their freshman year to see how much the college experience may change their attitudes and themselves. This has never been attempted before. It should prove fascinating, to say the least.

**Pig-out syndrome hits college women**

If you know five women on campus, one of them probably tends to “pig out” periodically on food, feel guilty about it afterward, and then punish herself by crash dieting or even inducing vomiting.

It could be she’s fallen victim to bulimia, an emotional disorder inducing vomiting. Dr. Samuel Peng, chief architect of the study, which observed the educational and occupational plans and activities of 1960 high school seniors and sophomores.

Among other things, the study revealed a dramatic shift of preference in expected college majors. In a similar 1972 survey, social science (including such fields as history, sociology, psychology and social work) was the most popular option, chased by nearly a fifth of all college-bound seniors. In the 1980 study, business ranked in a class by itself, the choice of 22 percent of future college students.

Engineering came in second at 10 percent while social science preference was more than halved, to a mere eight percent.

“Students are quite aware of what fields are economically ‘safe’ these days,” says Peng, “and are eager to take advantage of the fact.”

Just as revealing, Peng notes, is the study’s tabulation of student “life goals.” While most goal preferences remain similar between the 1972 and 1980 surveys (success, a happy family life, good friends, etc.), “having lots of money” jumped a full 12 percent in import. “Working to correct social and economic inequalities” dropped a corresponding 14 percent.
