Associated Students of the University of Montana
Fire department ill-equipped for high-rise dorms

By Rick Parker

The Missoula City Fire Department does not have adequate manpower or equipment to ensure the safe evacuation of residents should a major fire erupt in either of the University of Montana’s two high-rise dormitories.

The two buildings, Jesse and Aber halls, each house about 550 students.

Assistant Fire Chief Chuck Gibson said recently that the possibility of residents becoming trapped during a fire, especially on the top six floors, is “very high.”

“High-rise dorms are terrible; he said. “It can be a very bad situation.”

Ideally, the initial response to a high-rise fire should include two aerial-ladder trucks, five or six pumping trucks and 30 to 40 firefighters, Gibson said.

The Missoula fire department has two aerial-ladder trucks available, but only one will reach the top floor. If a fire were to start today, only two to three pumping trucks would arrive and, instead of 30 to 40 firefighters, only nine would be available for that initial response.

Ken Willett, campus police chief, who also is in charge of campus fire safety, said that the protection was inadequate, but acknowledged that a problem existed.

“I don’t consider it a grave problem because we are aware of it,” Willett said. “Prevention is the name of the game, and you have to work at it.”

The 11-story Jesse and Aber halls were constructed to minimize the risk of a major fire ever occurring.

A visual inspection of Aber Hall with Walt Noyes, a UM design engineer, showed that the walls and floor are constructed of mostly non-flammable material and the ceilings of fire-resistant tiles. Aber and Jesse halls, which were built in the mid-1960s, are nearly identical.

“However,” he said. “It can be a very bad situation.”

Vernon Stone, 53, director of the UM journalism school, is one of five finalists that journalism students can consider for the UM journalism school.

In his meetings with students, faculty and local professional journalists, Stone said that because public relations and advertising are “big job areas,” the UM journalism school should consider making its curriculum more responsive to those market needs.

While at Carbondale, Stone doubled the full-time advertising faculty from two to four of the 22 faculty positions and decreased professors of news editing by that number, he said.

Because UM’s catalog states that journalism students can take courses in public relations, the school should consider offering such courses regularly, he said. (The school now offers public relations courses when professors can be found to teach them.)

But Stone, who is also a finalist for journalism dean at the other campus organizations and have more students come by the MontPIRG office, he said.

• Julia Burkart, senior in business administration, said that her business background would assist her in working on MontPIRG projects. She said that she would like to see improved bicycle facilities in Missoula and would also try to establish a connection between MontPIRG and the Missoula Chamber of Commerce.

• Teri England, junior in resource conservation, is now working as an intern in Helena with the Environmental Information Center. She said that projects she would like to see MontPIRG undertake include studies of water contamination in Milltown, air quality control, consumer protection and work on land use regulations.

• Wendy Friesma, freshman in general studies, said that she has a strong interest in economics and experience in research. She said she would like to see MontPIRG undertake more economic projects.

• Bob Harrington, senior in forestry, is a member of the MontPIRG board of directors and was one of the founders of the organization on the UM campus. He said that his personal interests are in the areas of energy conservation and planning, public land policy and management, consumer work and the local economy.

• Jean Harte, graduate in economics, is serving on MontPIRG and the Missoula’s Environmental Task Force. She said that she is interested in city transportation, land allocation and use, open space, energy and jobs.

• David Heat, senior in economics, is serving as MontPIRG’s political director.

• Keith Baer, sophomore in business management, said that he would like to start a weekly column in the Kaimin to publicize what MontPIRG is doing. He would also like to see MontPIRG work more with

Forecast

It will be warm today. High near 45. Low tonight 30. Air quality will be fair.
Opinions

Endorsements: only Keenan

As is the norm for the Montana Kaimin’s endorsement decisions, the editor is an opinion leader, managing editor and the two news editors. This is not a typical endorsement, however, because the Kaimin has found itself unable to endorse any of the pairs of candidates for ASUM president and vice president. The Kaimin can and does, on the other hand, whole-heartedly endorse Peter Keenan for ASUM business manager.

Kaimin editorial

Not long back, one of the candidates for ASUM president expressed the opinion that it was not the Kaimin’s place to endorse ASUM officer candidates. But that’s not why there’s no endorsement for ASUM president and vice president. A newspaper reports on its government, and if it is not newsworthy, then there’s no choice among those who aspire to be part of that government, it will so note in an editorial.

When some other people at ASUM caught wind that the Kaimin might not endorse presidential and vice presidential candidates for ASUM president and vice president, a newspaper reported on its government, and if it is not newsworthy, then there’s no choice among those who aspire to be part of that government, it will so note in an editorial.

As is the norm for the Montana Kaimin’s endorsements, the decisions heretofore are the consensus of the editor, the managing editor and the two news editors. This is not a typical endorsement, however, because the Kaimin has found itself unable to endorse any of the pairs of candidates for ASUM president and vice president. The Kaimin can and does, on the other hand, whole-heartedly endorse Peter Keenan for ASUM business manager.

Kaimin editorial

For the Kaimin, at least, none of the candidates expressed the opinion that it was not the Kaimin’s place to endorse ASUM officer candidates. But that’s not why there’s no endorsement for ASUM president and vice president. A newspaper reports on its government, and if it is not newsworthy, then there’s no choice among those who aspire to be part of that government, it will so note in an editorial.

Third candidate campaigns for ASUM business manager

By Lance Lovell
Kaimin, Legislative Reporter

With only two days to go before the ASUM elections, Tim Bogart, senior in accounting and finance, announced yesterday that he is also running as a write-in candidate for ASUM business manager. He entered the race late, he said, because he was just recently able to firm up plans to return to the University of Montana to pursue additional training.

Supply-side economics disappearing from classrooms

(CPS) — College economics departments apparently have given up on supply-side economics. Students may have a hard time finding a class to learn about it from now on.

In contrast to two years ago, when many economics departments were scrambling in the first flushes of Ronald Reagan's victory to find some way to discuss the theory in their classes and squeeze it into late editions of textbooks, the theory is dying out.

These days, the theory's been reduced to "just another alternative" status or eliminated altogether in many classrooms.

"Reaganomics, as a popular idea in the classroom, has pretty much come and gone," according to New Mexico State economist Kathleen Brook. "People have become aware that it's not an instant cure-all, that it's just another alternative, that it's just another alternative.

I'm struggling with how to cover the whole business of Reaganomics in my revision," said Campbell McConnell, the economics professor at UT who is the only candidate with his name on the ballot, and another write-in candidate, Mark FitzGerald, a senior.

Bogart, 24, said he decided to run because his experience and ASUM involvement made him the most qualified candidate for the position.

He is running against two business administration students; Peter Keenan, a sophomore who is the only candidate with his name on the ballot, and another write-in candidate, John Maynard Keynes, who argued the government should stimulate business — the side of the economy that supplies goods and services — through tax breaks and deregulation in order to improve the economy.

Since the 1930s, the U.S. government has generally adhered to the theories of British economist John Maynard Keynes, who argued the government should stimulate the economy by stimulating consumer spending and consequently demand for products.

The president, of course, campaigned on the promise of juggling Keynesian economics in favor of supply-side economics, generally do not address the problems.

He did say, however, that if he is elected he plans to look in ways of streamlining the ASUM budgeting process and procedures for obtaining ASUM loans.

Even though he will have campaigned for only two days before the election, Bogart said he believes he has a good chance of winning.

He said Keenan is probably the front-runner in the race because he filed before the other two candidates and will be the only one with his name on the ballot.

"Voters will find it a lot easier to check off a name than it is to write one in," he said.

However, Bogart said, his chances are good because Keenan has two years less training in business and accounting and because FitzGerald has had no involvement with ASUM.

Grizzlies hope for two wins and luck in opponents losing

State has been playing good basketball lately, and last week beat a heavily-favored Idaho team. In addition, Idaho State plays a style of basketball—fast paced with good outside shooting—that will match up well against Weber's lumbering half-court offense and sagging defense.

Montana has the opportunity Saturday night to deal the Wolf Pack the blow that will K.O. Reno's chance to host the tournament.

But if the Grizzlies hope to beat the Wolf Pack in Reno, they'll have to play better than they did the past two weeks.

UM Coach Mike Montgomery said that one or two hot players won't be enough to beat Reno.

Weber's only remaining game is against Idaho State. The game will be played in Ogden, Utah. Weber will be the favorite, but a win by Idaho State is not inconceivable. Despite a horrendous start, Idaho State has been playing good basketball lately, and last week beat a heavily-favored Idaho team. In addition, Idaho State plays a style of basketball—fast paced with good outside shooting—that will match up well against Weber's lumbering half-court offense and sagging defense.

Montana is already assured of a play-off berth in the tournament, but in order to host the tournament, the Griz must win both games this week and have help from Nevada-Reno and Weber State in the form of a loss for each.

Montana has the opportunity Saturday night to deal the Wolf Pack the blow that will K.O. Reno's chance to host the tournament.

UM law school introduces structural curriculum changes

By Ira Foster
Kaimin Contributing Reporter

In an attempt to relieve some of the "sink-or-swim" anxieties of the beginning law student, the University of Montana School of Law has implemented a month-long introductory course.

This and other curriculum changes are a result of the evaluations of the school's curriculum, financed by a $240,000 grant from the Fund for the Improvement of Post Secondary Education.

The school surveyed Montana lawyers to determine what a graduating lawyer needed to know the most, said Jack LaTrielle, director of resources at the law school.

Lawyers and professors also were surveyed in an attempt to determine future needs of the field.

John Mudd, law school dean, said that some changes had been made in the school's ethics course, trial course, and contracts course, all at the first-year level.

Mudd said the school is "moving in a very deliberate fashion." He added that the second-and third-year curriculums may be changed, but that the process would be slow.

The structural changes in the first-year curriculum are the addition of the month-long introductory course, all at the first-year level.

Mudd said that the groups were probably getting more practical and usable training than did first-year students prior to the curriculum change.

Crist agreed that the practical changes were good, but added that some students seemed to think the month of introduction was too long, and that it was time to "get on with law school" before that phase was completed.

Eula Smith, a second-year law student and one of two student evaluators of the new curriculum, said that the goals are to teach students the basic history, origins, structure and terminology of law. She said the program also teaches students to think critically and increases cooperation and support for incoming students.

Barrie Burke, visiting assistant professor of law, said that she believed the introductory course accomplished these goals. She said that three of the four first-year instructors were younger people and that, along with the introductory course, makes the first year less intimidating and adds a spirit of cooperation.

Several changes in handi­ capped services are now in effect, according to Rita Flanagan, handicapped student advisor at the University of Montana.

Flanagan, also a counselor at the Center for Student Development, said that some new definitions in these changes were recently made to make it clear what special services are available to students. These are:

• Early registration — available to anyone with a handicap, that meets one of two criteria. The first is when a student needs to get class materials early or to make special arrangements with a professor. Second, when a student needs a specialized class schedule. Flanagan said, if a student has a mobility impairment that doesn't allow him or her to get to class within 10 minutes, a carefully-designed schedule is needed. Early registration provides for such planning.

• Room change — the Registrar's office will re-arrange a classroom to make it accessible to a handicapped student, Flanagan said. Students must notify her three weeks before the end of the quarter because of time restrictions. Changes will not be guaranteed after the deadline.

• Events — A UM programming will allow students with mobility impairments or special considerations, such as blindness or deafness, into events free or at a discount. For example, Flanagan said, students in wheelchairs will get in free because they bring their own chairs. Students with special needs must notify Flanagan, not themselves known to my office," Flanagan said. She is now trying to find out the exact number of handicapped students on campus and what their needs are.

Kaimin Reporter

A search for a new dean of the College of Arts and Sciences at the University of Montana is underway, according to Fine Arts Administrator Bryan Spellman.

Spellman said the application deadline for the position was February 15, but that he couldn't divulge the number of applications received.

The position has been vacant since former dean Richard Solberg became associate academic vice president at UM last fall.

Spellman said the new position will begin July 1 and applicants must have earned a doctorate, have a successful teaching background and experience in many related areas including curriculum development and planning, faculty evaluation and budgeting allocation.

Beginning March 9, the 10-member search committee will begin to evaluate the applications, he said. Eventually the committee will select a group of finalists, he said, and make a recommendation to President Neil Bucklew.

Kathryn Martin, dean of the School of Fine Arts, is serving as committee chairman, Spellman said. Committee members from the college of arts and sciences are Richard Fervol, Philip Maloney, Charles Parker, Arnold Silverman and James Walsh.

Jill Coddell from the art department, Coladarci from the education department and three university students are also on the committee, he said.

Acting dean Howard Reinhardt has served as acting dean for the college since August. He was previously a mathematics professor.

Each of these firms has five or six freshmen and a second- or third-year student called a junior partner.

Two of the partners are Bon­ nie Briggs, a third-year student, and John Crist, a second-year law student, who direct discussion and act as guides for the problem-solving efforts of the groups.

Briggs said that the groups were probably getting more practical and usable training than did first-year students prior to the curriculum change.

Crist agreed that the practical changes were good, but added that some students seemed to think the month of introduction was too long, and that it was time to "get on with law school" before that phase was completed.

Eula Smith, a second-year law student and one of two student evaluators of the new curriculum, said that the goals are to teach students the basic history, origins, structure and terminology of law. She said the program also teaches students to think critically and increases cooperation and support for incoming students.

Barrie Burke, visiting assistant professor of law, said that she believed the introductory course accomplished these goals. She said that three of the four first-year instructors were younger people and that, along with the introductory course, makes the first year less intimidating and adds a spirit of cooperation.

Smith agreed that the goals had been achieved, but said that the "concept of a harmoni­ ous environment and cooper­ ation is at odds with the tradi­ tional adversarial system." She also said she is "skeptical of the devalued position of inde­ pendent thought."

Smith said the anxiety level is probably as high as in previous years, but "the "level of depres­ sion is lower."

According to LaTrielle, thor­ ough evaluations will start next week, and some parts of the curriculum will be revised again this summer.

The grant ends in August, but Mudd said changes will continue to be made as the need arises.
