The Bolinger year: an elusive constitution, old furniture, inexperience

By Eric Troyer
Kaimin Reporter

ASUM President David Bolinger and Vice President Paula Jellison had good intentions when they entered office last year, but were hindered by lack of experience and poor communication.

That is the opinion of several people who worked with Bolinger and Jellison throughout the year.

Central Board Members Carollos Pedraza and David Keyes and ASUM Accountant Cari Burgdorfer described the administration as mediocre when compared with past ASUM administrations.

"It was good—not outstanding," said Burgdorfer.

But others were pleased with Bolinger and Jellison despite the problems they had.

"They did well, both of them together," said Henrietta Whiteman, CB faculty advisor.

"Paula and David laid a solid foundation" for future student governments.

CB Member Charlie Burnham said he was "fairly pleased" with Bolinger as president.

Communication between the president and vice president was the problem mentioned most by those interviewed, including Bolinger and Jellison. Burgdorfer and ASUM Administrative Aide Brenda Perry said communication within the office deteriorated as the year progressed.

"They started out pretty gung-ho," Perry said, but their differences of opinion drove them farther apart. Their communication problems showed when some of their ideas were not presented clearly to CB, she said.

Keyes and Pedraza said lack of experience with student government, especially on Bolinger's part, hurt the administration's effectiveness and image.

"Every stride he's tried to make forward, his inexperience has held him back," said Keyes.

Keyes' comment was echoed by Pedraza who added that Bolinger spent most of the year learning how ASUM runs.

Both cited Bolinger's purchase of furniture through constitutional referendum postponed for second time; Bucklew faults language

By Deanna Rider
Kaimin News Editor

The ASUM Constitution Review Board voted yesterday to postpone a referendum on the proposed new constitution because of problems with the wording of the judicial system section.

According to Chairman Mark Josephson, the board agreed to the postponement after University of Montana President Neil Bucklew said he would not approve the proposed constitution until changes were made in Article VII. A new constitution must be approved by at least 25 percent of the students and by Bucklew before it goes to the Board of Regents for final approval.

The referendum was to have been voted on during Spring Quarter registration.

Bucklew said the article would give ASUM the ability to set up a judicial system separate from the Standards of Student Conduct and university grievance procedures. Article VII of the proposed constitution says:

*ASUM shall provide in the Bylaws a judicial system.*

*The judicial system shall have jurisdiction over all cases where a student is in jeopardy of University-imposed sanction for misconduct.*

*ASUM shall provide for a Student Conduct Code which shall establish the right of a student to petition for relief from administrative rulings.*

Josephson said the intent of the article was to continue ASUM's participation in the judicial system already provided for in the Standards of Student Conduct:

"It wasn't our intent to set up a new system," Josephson said.

The article will be rewritten to clearly reflect the board's purpose, he said, and the constitutional referendum will be held sometime during Spring Quarter.

This is the second time the referendum has been postponed because of problems with the proposed constitution. The election scheduled for Jan. 4 was delayed by Central Board because one section of the proposed constitution conflicted with state law.

Josephson said the board could not make changes in the proposed constitution before a registration election because notice of the referendum, and a copy of the final document, must be published in the Kaimin four times before the referendum is voted on. Today's issue of the Kaimin is the last for Winter Quarter, and sufficient time would not exist to publish the notice. Publication will resume March 28.

Faculty Senate concerned over funds for general education program

By Chris Johnson
Kaimin Reporter

In a discussion of the recent planning proposals made by University of Montana President Neil Bucklew, members of the Faculty Senate yesterday expressed concern over the funding of proposed changes in the general education requirements.

The new program is scheduled to go into effect Spring Quarter and will apply only to freshmen. Bucklew recommended in his proposal that $10,000 be used to assist the development of new programs for existing general education courses. He also set aside $25,000 from the Enhancements Pool, a fund set aside from UM's legislative appropriation, for the implementation of the general education program in the 1984-85 school year.

At yesterday's discussion, Bucklew said he hopes to add $50,000 of Excellence Fund money, private donations administered through the UM Foundation, to that being used in the development of general education courses.

But some Faculty Senate members said that while support for the general education program exists for next year, the year after will place a larger strain on the program as a new group of freshmen enter school while sophomores are still taking required general education classes.

In response, Bucklew said, "It's going to require several more years of investment. We'll do that. We'll make it."

Ron Perrin, professor of political science, said lack of flexibility in the registration system needs to be corrected to ensure students can get into often-crowded general education classes. He added that computerized pre-registration is needed to allow for efficient course planning.

Bucklew said that computerized pre-registration will probably be implemented Winter Quarter of next year. He also said the summer orientation program for incoming freshmen essentially pre-registers Bucklew "out of half of the new freshmen."

Richard Barrett, associate professor of economics, said the General Education Program will draw a disproportionate amount of resources from the College of Arts and Sciences but Bucklew said a program centered in this area will help serve the needs of the college.

Others at the discussion questioned changing the Research Administration to the Office of Research and Creativity Activity and said the Research Administration already serves the function for which it was designed.

Bucklew said the proposed change is more of a fine tuning. He added that the "diversity of our campus" should reflect the diversity of research at UM.
Opinions

The last good 'kiss-off

Please bear with us one more time: once again on the Kaimin opinion page you are getting a farewell, it's been great article. You probably say—as we at the Kaimin so often do—"so what," or "BFD." Well, between the two of us we've put in 15 quarters at the Kaimin and so we're going to do it anyway. You don't like it? So what.

So now that we have the opportunity—our last—we're going to abuse this space once again. But this time we're going to do it right.

• Thanks to "Boy David" Bolinger (that's what we used to call you, Dave) for giving us something interesting to fill our pages with. Despite what a lot of people might think, Miss Grove really didn't like you.

• To Neil: Ciao, baby.

• To the J-School faculty: Thanks for all the spare change. (Some of you cats are more generous than others, though.) Jerry H. and Dean Hood: we're going to get your jobs in ten years.

• I get a thrill from punishment; I've always been that way"—A quote from Lou Reed I've always wanted to put in an editorial.

• "Copacetic": adjective: cool, laid-back groove, indicative of one who has consumed the ubiquitous chill pill.

• We'd also like to say, if we had it to do all over again, that we'd charge ASUM money to run that stupid constitution. We hope the new staff does. We run a business here, and we've wasted an incredible amount of space running two abortive tries at a constitution. Aren't you proud now, Boy David?

• Here's something from the Talking Heads: "I don't have to prove that I am creative. I don't have to prove that I am creative. All my pictures are confused..."

• And a little something from Grand Master Flash and the Furious 5: "Don't push me cuz I'm close to the edge, I'm tryin' not to lose my head—Ha, Ha, Ha, Ha. It's like a jungle, sometimes it makes me wonder how I keep from scratching with another professor, something like: "I'll make my students buy your book. When I publish, you make your students buy mine."

• The professor assigns a 400-page tome containing three chapters that he agrees with. You pay $20 for a book that would cost $3.25 if you could find it in any other store. You read the three chapters, then realize that they have nothing to do with the rest of the class. Finally, the professor has to make up test questions just to be fair to students who actually bought the damned thing. But the real fun starts when you try to sell it back to the bookstore:

  "We're sorry, that class is not being offered next quarter, but we can give you 15 cents for the book."

Or, "Oh, we're sorry, but there's a new edition coming out and we can only give you 3 cents a pound on that volume."

• There is one constructive suggestion here: in areas not requiring last-word developments, couldn't teachers buy their students' books, then rent them out to future classes at a reasonable fee? Surely, by the time the books need replacing, the original cost will have been recouped.

Unfortunately, one must face facts. This column is just a howl from the flames of bureaucratic hell. Any change of policy will require a faculty member with the courage of Martin Luther King, the decisiveness of Ghengis Khan and the philosophical benevolence of Pope John Paul II. But if enough students and supporting parents raise their cash-backed voices in protest, maybe some professors will take steps to undue the fraud.
Letters

Asbestos

Editor: I wish to take issue with several statements made by the Chairman of the Asbestos Abatement Task Force, Wayne P. Van Meter, in the March 8 Kaimin.

The highest level of steam tunnel concentration was actually .53, not .36 as has been stated several times in previous articles in the Kaimin. This level was reached when Paul Marsh and several other students were pulling cable through the tunnel system. The .36 level was simply an average of the two filters used during the sample taking. One filter read .53 and the other read .26. The .26 filter was used over a longer period of time, thus the average was reduced to .36. I wonder if anybody informed Paul Marsh’s lungs that on an average, he fared pretty well!

At the time this test was being conducted, the occupational standard was 5 fibers/c.c. That level was contested by the asbestos industry and until an “acceptable” level can be politically settled upon, the “acceptable” level will again be 2.0 fibers/c.c.

The conclusion of the Asbestos Abatement Task Force to monitor areas being worked in by craftsmen is a step in the right direction, but will only be effective if this rule is enforced. The simple fact is that there are many potentially dangerous areas on campus. The only way to keep the exposure level to a minimum is to do the required asbestos removal properly!

Desperation shot ruled late; MBA nips All Stars

By Brian Mellstead
Kaimin Sports Editor

A half-court desperation shot by Brian Solonen of the Chuck Taylor All Stars went through the hoop but was ruled no good because it was shot moments after the buzzer and the MBA All Stars won the championship game of the Men's Intramural Basketball Tournament 64-62 last night in the Men's Gym.

The game was tied seven times in the first half and the Chuck Taylor team mounted the biggest lead of the first half when a free throw by John Coppege with two minutes remaining opened their lead to three at 25-22.

That lead was short-lived, however, as seconds later Kent Clawson sank two free throws for MBA to narrow the tally to 25-24. Kurt McGinnes hit a 16-foot jumper for Chuck Taylor's, followed by a tip-in by MBA's Steve Irion, a jumper by Chuck Taylor's Brett Argenbright with 15 seconds on the clock and a 16-foot jumper by MBA's Mike Chester to close out the first half at 29-28.

MBA took charge early in the second half. After just six minutes of play, MBA mounted a five-point lead at 40-35 on a basket by Ritchie Edwards.

Chuck Taylor combined some good rebounding with a scoring spurt by Coppege, and a 20-foot jumper from the corner by him at the midway point tied the game at 43.

Coppege scored eight of his team-high 18 points in a four-minute span. He connected on four straight jumpers between the range of 15 and 20 feet. Teammates Clawson and Edwards then went to work for MBA and together scored 13 of the team's 19 remaining points.

Clawson worked the inside scoring buckets within seven feet of the hoop and Edwards See 'MBA' on page 8.
SPRING ENROLLMENT...

- Blue Cross of Montana is offering a health care coverage plan designed specifically for the college and university student. This plan is available at the University of Montana.
- The cost to the student is substantially lower per month than that of health care plans available to single working people.
- The coverage plan is available year-round and is in effect any place, any time and even may be maintained while the student is working in the summer.
- We encourage students to enroll in this plan at spring registration. More information about the Blue Cross of Montana student health care program will be available then.

Griz-Cats meet today in playoffs

By Brian Mellstedt
Kaimin Sports Editor

The University of Montana Grizzlies will have to shutdown the streaking Montana State Bobcats, if they hope to get a shot at the Big Sky Championship, when the two teams meet today in a semi-final Big Sky Conference Tournament game in Ogden, Utah.

The Bobcats beat the Grizzlies 60-59 at the buzzer when they met in Bozeman and in doing so clinched a home game for the first round of the tournament.

MSU took advantage of that situation by beating Boise State 65-64 at the buzzer and the 14-14 Bobcats find themselves bidding for the whole shabang.

"Montana State is on a roll," Griz Coach Mike Montgomery said. "They have won two games they have had to win. We know what we have to do and I expect an extremely tough game."

The game has also been billed as the "young versus the old" as MSU has only one senior starter and the Griz have three.

Griz seniors Marc Glass, Doug Selvig and Rob Hurley are all three-year starters with playoff experience.

Bobcat forward Chris Brazier is their lone starting senior.

The Grizzlies have been leaning on 6-foot-9 forward Larry Krystkowiak. He has lead the Big Sky in rebounding all season and he overtook Vince Hinchen of Boise State last week as the scoring leader.

Krystkowiak is averaging 10.5 rebounds per game and 17.0 points. Hinchen follows at 17.6.

Brazier is MSU's big scoring gun averaging 12.6 points per game.

The game will begin at 9 p.m. and will follow the game between Weber State and Nevada Reno.

The Wildcats won the Big Sky regular season by with a 12-2 conference record and WSC is 22-6. UM, also 22-6 overall, finished the conference in second place with a 9-5 record.

Montana's 22 victories so far this season is the second most in school history. UM was 27-4 in the 1949-50 season under coach Jiggs Dahiberg.

The game in the 12,000-seat Dee Events Center will be broadcast live by KYLT Radio and the Grizzly Basketball Network. Tom Morris will begin this broadcast at 8:45 p.m. with his scouting reports.

KYLT will also broadcast the championship game tomorrow if the Grizzlies beat the Bobcats.

Friday and Saturday's games could also be televised but that decision has not yet been made.

MBA wins

Continued from page 4
tallied scores outside the 15-foot mark.

The Chuck Taylor team was not done, however.
The dramatic ending was set up on a tip-in by Ben Keiffer, with just over one minute remaining and Chuck Taylor trailing by 10 at 62-52. Keiffer stole the subsequent inbounds pass and made a layup to pull them within six at 62-56.

The Chuck Taylor team forced a turnover and a driving layup by Chuck Taylor's Kelly Richardson fell thrice with 35 seconds remaining to make the score 62-58.

MBA's Brian Benson fouled as soon as he received the inbounds pass and missed the first of a one-and-one free throw situation.

The Chuck Taylor team took the ball to the opposite end of the court and Richardson was fouled. He sank both tosses to pull them within two at 62-50.

Benson was fouled right away again with 17 seconds left. He made his first shot and missed the second. Solonitien hit a layup for Chuck Taylor's with five seconds left to make the score 63-62.

Three seconds later MBA's Irish was fouled. He made the first shot and missed the second which Solonitien rebounded under the bucket, dribbled to half court and shot just before the buzzer sounded.

The game's leading scorer was MBA's Edwards with 22 points.

The Rainbow Connection cruised to 18-6 halftime lead over the Goddesses and came away with 36-22 victory in the championship game last night in the Men's Gym.

Rainbows top Goddesses

Sheryl Flat led the Rainbow Connection in scoring with a game-high 14 points. The Goddesses were led by Laura Slaa with eight points.

Times of MWAC tourney games

tipoff times for the Mountain West Athletic Conference championship and consolation games Saturday at Dahlberg Arena have been changed.

The consolation game will begin at 4 p.m. instead of 7 p.m.

and the championship game will start at 8 p.m. instead of 9 p.m.

Some changes have been made to these games to not conflict with the Big Sky Conference games which may be televised.

Score: Courts 21, Racquetballers 0; play washed up for this Spring

By Chris Johnson

Kaimin Reporter

The eight racquetball courts at the University of Montana Recreation Annex will be closed for much of Spring Quarter and setup racquetball games and one handball class scheduled for next quarter will be cancelled, according to Ray Chapman, director of the University Center.

The eight racquetball courts were damaged over Christmas break when a pipe froze and broke, spilling hundreds of gallons of water on them. Howard Johnson, manager of UM recreation facilities, said in January the plan was to replace two of the floors and repair the other six at a total cost of about $24,000.

However, the floors to be repaired have still not dried completely and it seems unlikely that repairs will return the courts to the "quality conditions" they were in before the damage, Chapman said. He added that he was afraid repairs would leave dead spots on the courts, so all eight floors will be replaced.

A Spokane firm, Northern Hardwood, was hired to sand them available before the end of the quarter.

Chapman said new floors will cost about $6,000 each for a total cost of $32,000. He added that he won't be sure of the exact cost of replacing the courts until the bids are awarded.

"We were hoping to save some money" by repairing the courts, Chapman said.

He said he has filed a claim with the company that insures the Alpha and that he was "confident it would cover at least a portion" of the replace ment bill.

Campus Rec made its initial claim to the United States Fidelity & Guaranty Co. for repairs in January. A new claim is being filed and Chapman said that it probably won't be settled until the bid is awarded.

Murderer of Stanford professor out on parole

VACAVILLE, Calif. (AP) — Theodore Streleski, who beat his Stanford University math professor to death 57 years ago, was released from prison today and immediately vowed to violate his parole as "an anti-Stanford statement." He said he won't be sure of the parole before the end of the quarter.

"I don't want to do anything that says I didn't mean it," he said, adding "I'm not going to do anything at all." He said he was afraid repairs would leave dead spots on the courts, so all eight floors will be replaced.

A Spokane firm, Northern Hardwood, was hired to sand them available before the end of the quarter.

Chapman said new floors will cost about $6,000 each for a total cost of $32,000. He added that he won't be sure of the exact cost of replacing the courts until the bids are awarded.

Glacier's not-so-Hidden Lake may get $55,500 viewing platform

By Jill Trudeau

"So much for the sacrifice concept are the most important," said Ray Chapman as he made the repair decision during a "further effort to confine damage" to the vegetation and animals has occurred.

The proposed platform "may arrest the damage that has already taken place." Since the visitor center was built, he said he has seen "a dramatic increase" in the volume of people that visit the area, which some people oppose because it looks unnatural.

Construction of a platform with restrooms. This alternative would cost about $8,500 and would prevent further damage from people urinating in the area. Haraden said it is not the preferred alternative because it would necessitate the removal of waste by helicopters or ground vehicles that would disturb the animals.

Restriction of visitor use. This would involve allowing only a certain number of people in the area at one time, probably by special permit.

More people have been using the area since the 1966 construction of the Logans Pass visitor center, from which the trail to Hidden Lake starts, according to James Haybeck, a University of Montana professor of botany who has done vegetation research in Glacier Park.

Haybeck said he thinks the proposed platform "may arrest the damage that has already taken place." Since the visitor center was built, he said he has written "Logan Pass off" as a "sacrifice area" where the bulk of visitors go. He says "it-tees up from damage to the rest of the high country," he added.

Chapman added that the platform, UM professor of forestry, said, "Maybe the overlook (platform) and the sacrifice concept are the most valuable" in face of the "sheer volume of people" that visit the area.

However, he said, "even with 100 policemen" the park service could never prevent visitors from dropping potato chips, trampling the vegetation and "sneaking behind the tree" to urinate.

About 85,000 people visited the area in 1983, a number Haraden said has doubled in the last 15 years. He said most of the people would visit the area even without the nature walks.

Haraden, who will make the final decision on the proposal, said he would like to see the platform completed "as soon as possible," he said. Letters should be addressed to him at Glacier Park Headquarters in West Glacier.
'Liquid Sky': only a fistful of quaaludes

By Jerry Wright
Kaimin Associate Editor

"Hi—you're a pretty cute chick, wanna do some blow?" I lie; he only had a fistful of quaaludes. But he got his in the end. Or in the head anyway, by an alien glass speaker, just as he was having an orgasm. What-a-way-do-ga...

Sleazy, stupid dialogue is standard fare in "Liquid Sky," and though there are some wild visual effects, they're a long way from saving this thing.

The movie is playing at the Wilma, and it ranks way up there on the B word scale. You see these aliens come to New York in their little flying saucer in search of heroin, or "liquid sky" as the hipsters call it. A lot of the time we see as they see, kind of psychedelic infra red. Heroin appears to them as a little sunburst flower.

But then they shamelessly watch poor little Margaret— the misunderstood new wave fashion model with the brains of a box of rocks and the personality to match— getting raped. Lo and behold, the little flower appears in the head of the rapist. Not to miss an opportunity, the aliens dispatch their glass and their climax at the same time.

After two guys have died on top of her, our heroine looks at the sky and thoughtfully says, "Hey you, what's with these little glass arrows? I can't have all these dead bodies. Corpses, corpses. All these dead bodies..."

But that's O.K.—Adrienne, her junkie/foul-mouthed/dealer roommate takes a liking for necrophilia.

The photography is great throughout "Liquid Sky," but the acting and the dialogue are so bad that it begins to seem like a low-budget skin flick. Only the language is worse. Adrienne and Margaret are not sweet young things. And their buddies are not nice people. "Too weird for words" was how some described it. Indeed.

JUDY CHICAGO'S "GUIDED BY THE GODDESS": a way of showing that somebody does care, that somebody will listen. (From "The Birth Project," copyright 1983 Judy Chicago.)

The theater too

And so human nature

By John Kappes
Arts Editor

It seems like a paradox: walk away from Missoula in any direction, somehow keep walking, and you will eventually find yourself back in Missoula. The world defies appearances—it's round, in a universe of curved space.

And so human nature. William Congreve, who wrote "The Way of the World" in 1700, thought that people (not to say their motives) were base and corrupt, and that they looked for happiness through a stinking moral swamp of their own choosing. Jura Snyder, who wrote "Eddie Lechner's Trip to Paradise" in 1936, thought that people were basically nice, and that they looked for happiness through a stinking moral swamp thrust upon them by "history."

Their paths cross, however, when it comes to "The Birth Project"— they talk fast and mean, with each insult under-cut by yet another ridiculous gesture. Adele Hansen's Lady Wishfort is equally overwrought, and her scene with Michael Lewis (Waltwell) finds the pace missing everywhere.

There are problems. James Pask (Temmie) tends to go slow when fast would do, and Steven Zediker (Mr. Fainall) shares his vice. But both have a strong instinct for character, and are helped in that by Karen Davis (Foible) and Jennifer Rose (Mrs. Marwood).

Only Cheryl Baker (Mrs. Fainall) seems mired in lethargy, and the seductive lines of Glynn Bartlett's set and Philleo's wigs easily restore order.

Order was Soyfer's demon, and the call to will of "Eddie Lechner" is a demand both on actors and audience. The cast of the Winter Workshop production (tonight and Saturday at 8 p.m. in the Masquer Theatre) captures the elegant, mannered formality of Congreve's language without skimping on the bankrupt intentions he saw lingering behind every word. Nor has director James Kriley cheated him: the play is thoroughly funny. A tricky, occasionally unstable balance, held in place by some extraordinary character work.

Severt Philio (Petulant) and Gregory Wurster (Witwould), twin tops with acid tongues, offer a keen taste of the Restoration— they talk fast and mean, with each insult under-cut by yet another ridiculous gesture. Adele Hansen's Lady Wishfort is equally overwrought, and her scene with Michael Lewis (Waltwell) finds the pace missing everywhere.
Continued from page 1.

ASUM channels and his inclusion of an insurance endorsement on ASUM letterheads as problems caused by his inexperience.

Earlier in the year Bolinger used ASUM funds to buy $249 of furniture from a state surplus sale for his personal use, with the intention of reimbursing ASUM. However, items sold from the sale were to have only gone to a state agency and not to private individuals.

Bolinger agreed that the furniture purchase was a "poor decision to make," and the people interviewed agreed that he took the right steps once the error was discovered. The furniture is being held until a buyer can be found.

Last year Bolinger accepted $50 for ASUM from American Health and Life Insurance Company for including an ad on ASUM letterheads. Keyes, Pedraza and Whiteman agreed that Bolinger should have discussed that matter with CB members before making a decision.

Bolinger's decision to apply for mayor of Missoula following the death of Mayor Bill Cregg during Fall Quarter was criticized by Keyes, but most of the others said he was justified in his decision. Bolinger considers a major achievement of his administration to be the revision of the ASUM Constitution, which was supposed to be voted on at Spring Quarter registration. However, yesterday the ASUM Constitutional Review Board voted to postpone the referendum because of problems with the wording of the constitution (see related story on page 1).

Pedraza and Keyes argued that Bolinger did not handle the constitution as well as he could have. "We needed a force behind the constitution" which wasn't there, said Keyes, adding that it could have been finished Spring Quarter of last year.

Other achievements cited by Bolinger were:
- Increased access for students to the ASUM Student Loan Program. Loans may be taken out two days a week instead of one, as was done previously.
- Inclusion of office computers for the ASUM administration in next year's budget.
- Inclusion of the comments section in the CB agenda. The section was suggested by Jellison.
- A leadership conference put on by Jellison that was praised by all those interviewed.

IN ARMY NURSING YOU KEEP ADDING NEW SKILLS.

It's important that you're treated with the dignity and respect accorded an Army officer. And it's important to work in a modern medical center, earn a top salary, and travel. But perhaps the most important aspect of Army Nursing is the dedication to education. In Army Nursing you have the opportunity to attend professional conferences, pursue advanced degrees and study a variety of nursing specialties.

If you're a student working on your BSN or if you already have a BSN and are registered to practice in the United States or Puerto Rico, look into Army Nursing. Stop by or call us:

Call Sgt. Don Marshall or Sgt. Don Downum Collect (801) 524-4568

Party Time, St. Urho style

By Brian Justice
Kaimin Reporter

The Missoula chapter of the Montana Environmental Information Center is sponsoring a St. Urho's Day celebration to raise funds for MEIC activities. That right, a St. Urho's Day celebration.

You're probably saying, "what the hell is St. Urho's day?"

St. Urho's Day is the reaction of the Finnish people against the Irish monopolization of St. Patrick's Day, according to Jennifer O'Loughlin, board representative of the Missoula MEIC chapter.

O'Loughlin said that the origins of the St. Urho myth are unclear, but the myth was introduced to the world March 16, 1956 by a St. Paul, Minn. psychologist of Finnish descent. Finnish Americans celebrate the occasion every March 16.

The myth has it that St. Urho saved Finland's grape crop long ago, ridding the land of its grasshoppers by shouting: "Heinasirkka, heinasirkka, mene taalta hilteen," which means "grasshopper, grasshopper, go away."

MEIC will host a party and dance March 16 at the Moose Club, 140 W. Pine St. The admission fee is $5. This includes free beer and country music by Spring Thaw.

New Zealand trip
Harry E. Ray Jr., associate professor of education, will teach a summer course in New Zealand.

The course, "A Comparison of American and New Zealand Schools," is scheduled for July 16-Aug. 10. Enrollment is limited to 20, and pre-registration is required by March 31.

For information about the course call or write either Harry E. Ray Jr., School of Education, (406) 243-5161, or Summer Programs, (406) 243-2900.

SEMESTER IN SPAIN

Not just for Spanish majors only, but for everyone: beginners, "in between" students, and advanced. Put some excitement into your college career!!

BEGINNER OR ADVANCED - Cost is about the same as a semester in a U.S. college: $3,199. Price includes round trip to Seville from New York, room, board, and tuition complete. Government grants and loans may be applied towards our programs.

Hurry, it takes a lot of time to make all arrangements.

SPRING SEMESTER - Feb 1 - June 1
FALL SEMESTER - Sept. 10 - Dec. 22
FULLY ACCREDITED - A Program of Trinity Christian College

Male beer guzzlers run higher chance of rectal cancer, study claims

BOSTON (AP)—Men who drink the equivalent of 1½ or more cans of beer a day are three times more likely than non-drinkers to get cancer of the rectum, according to a new study.

The research also found that consumers of wine and whiskey are more likely to get lung cancer, but gave no indication why.

Several studies have shown a link between alcohol use and cancer of the mouth and throat, but the evidence associating beer with other kinds of cancer has been conflicting.

The American Cancer Society estimates that rectal cancer strikes about 40,000 people in the United States each year.

In the latest study, researchers surveyed 8,006 men to see whether their drinking habits were related to five different kinds of cancer.

“Many of the cancer sites—stomach, colon and prostate—there was no evidence of a relation with alcohol consumption,” said the researchers.

But the researchers noted that overall alcohol use among the men studied was relatively low and said this “raises the question whether our findings concerning cancer of the rectum and lung can be explained by alcohol consumption.”

The study was directed by Dr. Earl S. Pollack of the National Cancer Institute and was published in Thursday's New England Journal of Medicine.

They found that men who drank 500 or more ounces of beer—about 42 12-ounce cans—a month were three times as likely as non-drinkers to develop rectal cancer.

In all, 82 of the men studied got rectal cancer and 42 of them, or 58 percent, were beer drinkers, compared with 45 percent of the group as a whole. Almost a third of those with the cancer drank at least 500 ounces a month, or roughly 42 12-ounce cans.

Some earlier studies also have suggested a relation between beer and rectal cancer, but negative results have been reported, too. An Irish study found that brewery workers were far more likely to die of rectal cancer than were other men in Dublin. But a similar study of Danish brewers found no such link.

The latest study also found that men who drank more than 50 ounces of wine or whiskey a month were about 2½ times more likely to have lung cancer. This link was still apparent when the researchers took into consideration cigarette smoking, which is by far the greatest cause of lung cancer.

However, they cautioned that the association between liquor and lung cancer might be due “to a residual confounding effect with cigarette smoking that we were not able to eliminate in the analysis.”

They were unable to explain how drinking might contribute to cancer.
