ASUM picks Melissa Smith as new Programming Director

By Deirdre Hathhorn
Kaimin Reporter

Melissa Smith, a senior in Music Education will take over as ASUM Programming Director beginning Summer Quarter from outgoing Programming head Bill Reker.

Smith, the first woman since the early 1960s to assume the position, was chosen from among four candidates because of her experience, leadership and references, according to ASUM President Phoebe Patterson. Patterson made the decision with the help of a five member panel which included Program Manager Victor Gotesman, Reker, ASUM Vice President Jeremy Sauter, a graduate student in business administration and a fine arts major. Central Board must ratify the decision, which is usually a formality.

Smith has been the coffeehouse coordinator and has promotional experience. The programming office will be in a

"transitional stage," until Summer Quarter, Smith said, with new staff members learning their responsibilities.

Smith faces a Programming debt of about \$5,000, which she said can be reduced by sponsoring rock group performances brought in by promoters. The university receives 10 percent of the profits from each performance or \$500, whichever is higher.

Smith worked in the programming office as the Spotlight coordinator which books regional and local artists to perform concerts in the Copper Commons, Gold Oak Room, University Center and the Underground Lecture Hall.

Smith said she eventually would like to promote shows through the programming office, allowing it to attract groups it wants rather than depending on promoters.

However, she said there is a risk involved when promoting shows because Missoula isn't

big enough to support concerts by groups or performers that aren't well-known.

Smith said she wants to expand the lectures program and make it more visible through advertising and promotion. She also wants to work with other departments to bring in more poets, speakers and perform-

ers. For instance, if the English department wants a poet to read to students, the programming office would help fund and promote the event.

As programming director, Smith will choose coordinators for lectures, advertising, performing arts, coffeehouse and pop concerts. The coordinators

arrange the performances, but the director helps with decisions and must approve the event.

The deadline for coordinator applications is May 22.

Central Board will review Smith's selection tonight at 7 p.m. in the Montana Rooms.

Education can end overpopulation, says Ekisola

By Alexis Miller

Kaimin Reporter

The world-wide overpopulation problem can be eased by educating people in less developed countries and increasing technological aids to them, according to Olufayo Ekisola, a 31-year-old Nigerian student, who spoke Tuesday in the University Center Mall.

The noon forum, coordinated by two University of Montana professors, John McQuiston and Thomas Whiddon, was part of a day-long series of talks and lectures focusing on the problems of world popula-

tion.

Werner Fornos, president of the Population Institute in Washington, D.C., was scheduled to speak, but cancelled his visit because of a debate in Congress on a world population bill.

Ekisola, a graduate student in environmental studies, said that in nations with advanced education and technology systems, people find it more difficult to have children and keep their jobs. This is so in the United States, he said, because most people have become more involved in work than in

becoming parents and raising children.

A similar attitude must occur in developing countries before a decrease in population can be expected, Ekisola said. But, he added, "trying to project Western values on some of these countries will not help."

The solution is a world economy where all nations would start as equals, he said.

"The problem of population is not really a question of having too many people, it is a question of resource allocation," he said. "The United

Russia won't be coming to Olympics

MOSCOW (AP)—The Soviet Union announced Tuesday it will not participate in the 1984 Summer Olympics in Los Angeles, charging that the United States doesn't intend to ensure athletes' security and accusing the Americans of "undermining" Olympic ideals.

The Soviets did not mention the U.S. boycott of the Moscow games four years ago, but Peter V. Ueberroth, president of the Los Angeles Olympic Organizing Committee, told a news conference in Washington that the United States was "paying the price for 1980."

The Soviet National Olympic Committee's announcement was distributed through the official news agency Tass. It capped a long campaign of Soviet criticism of the Olympic preparations, ranging from complaints about commercialism to reports of the Los Angeles crime and smog.

"Extremist organizations and groupings of all sorts, openly aiming to create 'unbearable conditions' for the stay of the Soviet delegation and performance by Soviet athletes, have sharply stepped up their activity with direct connivance of the American authorities," the Soviet statement said. A group call-

ing itself the Ban the Soviets Coalition had said it would encourage Soviet athletes to defect during the Games.

The Soviet statement also said U.S. authorities took a "cavalier attitude" toward observing the Olympic charter, and "in these conditions ... participation of Soviet sportsmen in the games of the 23rd Olympiad in Los Angeles is impossible."

The Soviet announcement was made nearly a month in advance of the June 2 deadline for giving formal notification of participation in the Olympics, and came as the cross-country relay of the Olympic torch began in New York City.

It also came at a time of tense relations between Washington and Moscow. The Soviet Union has walked out of arms control talks and has not said when it will return.

The Soviets "have disregarded the feelings of most nations and millions of people the world over that the Olympics be conducted in a nonpolitical atmosphere," said President Reagan's chief spokesman, Larry Speakes. He said the United States had "gone the last mile" to accommodate the Soviets.

"We have made exhaustive efforts to meet Soviet concerns

Summer session: mixed bag

Despite our recent fickle weather, summer will soon be here at the University of Montana. Along with it will come the silver glint of glacier glasses, the lobster-red glow of scorched thighs, and the deafening roar of air conditioners that wait until finals week to go on the fritz.

Most students will jubilantly join the post-finals out-of-town exodus. A few wise ones, however, will stay around for one of Missoula's great secrets: UM's summer session.

Those who have attended can tell you: summer session is one of the most delightful experiences available at UM. Classes are relaxed and informal, often with far fewer students than regular quarters. Rather than stretching out a three-credit course for ten or more weeks, the same material is covered in a quick, but intense, four weeks (a few run eight weeks). As a result, you retain more of what you learn.

Editorial

And, for you mercenary types, most courses require fewer written assignments, since the instructor has only four weeks to get everything graded.

Also, with the influx of public school teachers picking up courses to keep their certification current, an unusually mature atmosphere exists. They bring with them "real-world" experiences that enliven discussions far beyond the norm.

You can complete Accounting 201 in a mere four weeks, rather than sweating through 11 weeks of debits and credits next fall. You can take Shakespeare Intensive without suffering the slings and arrows of outrageous homework. You can even complete a year of Spanish in only eight weeks.

Unfortunately, for students hoping to pick up required courses for their major—especially those on the lower-division level—the pickings are slim in some departments. In some cases, the problem is a lack of courses. In others, few required courses are offered.

For example:

- In the physical sciences the problem is acute. In chemistry, only individual study and research is available. In physics, no courses are offered whatsoever. In botany, biology and zoology, no courses are offered on campus. An excellent program is offered at the Yellowstone Biological Station, but no lower-division courses are included.

- In mathematics, a fine series of "mini-courses" is offered. But they are designed for teachers or students with substantial math and computer backgrounds. The four lower-division courses that are offered fall into the "dummy" category.

- In English, while several good upper-division courses are offered, only one 100-level composition and one 200-level literature course are available. And the literature course is not one needed for the major.

- In journalism and radio-television, only one course is offered in each (other than individually arranged study). There are exceptions, of course. The business and education schools offer a massive array of courses. Also, history, sociology and political science offer useful courses for majors.

But some departments seem to offer courses that are more convenient for the professors who teach them than for the students taking them.

According to Mel McCoy, summer programs manager, course offerings are up to school deans, who, in turn, usually leave it up to department heads. McCoy says "80 to 90 percent of the decision is left up to the department head."

Summer is when many professors are catching up on writing and research, or getting "hands-on" practice in their field. Some, understandably, are simply vacationing. To be requested to teach a summer course may seem an imposition, and some department heads apparently soften the blow by allowing wide latitude in what the professor may teach.

Summer session is a valuable opportunity for students. It could be made even more valuable if all department heads ensure that a thorough selection of useful courses is offered.

—Jim Fairchild

An Outside View by Larry Howell Silence one Silvertip

Our federal government owns many, many things, so it assigns numbers and letters to each item for convenience's sake. For instance, instead of an officer at Malmstrom Air Force Base having to write, in a tiny blank on a form, "one Minuteman III intercontinental ballistic missile east of Conrad, Mont., number nine out of flight group two," that officer can simply write "Romeo 29." Then, whoever reads the form can just type "Romeo 29" into his computer terminal and out of the silicon deep will rise all the pertinent data on that nuclear weapon.

As simple as this identification system seems, however, it isn't foolproof. One possession's characters and numerals are occasionally mistaken for those assigned to another. When this happens, it's usually because of a screw-up at the U.S. Data Bureau in Washington, D.C., the huge, but unknown, clearinghouse for all info sent between federal agencies.

A high official at the Data Bureau, who insisted on anonymity, recently told me of one such screw-up concerning Montana. His story explains a lot.

It begins with the arrest of the protesters at Malmstrom on Easter Sunday. The arrested were protesting at Romeo 29's home, having picked that particular ICBM as the objective in their "Silence One Silo" campaign. The protesters believe that any nuclear arms reduction has to start small. Dismantling Romeo 29 would, they hope, encourage Russia to dismantle one missile. Who knows from there?

An officer at Malmstrom was writing up a brief report for the Pentagon explaining the protest. Being late for his handball game, he wrote only that the protesters wanted Romeo 29 destroyed. He mailed the report to the Data Bureau, where it would be forwarded electronically to the Defense Department.

A data entry clerk at the Bureau then typed the report into the computer, put the paper copy into the shredder, and was ready to send it on when along came a pretty co-worker. She stopped to talk. Distracted, he cleared his screen before he'd sent the Romeo 29 report to the Pentagon.

When she left ten minutes later, he realized his error and started to retype the report. But he couldn't remember "Romeo," though he knew the name started with an "r." Then it hit him: "Roscoe." So he retyped the report, now about "destroying Roscoe 29 to satisfy protesters in Montana," and pushed the "send"

key.

The screen glowed green and then acknowledged "data sent." The clerk sighed happily, knowing that the computer automatically sends data to the appropriate agency, and won't send anything with the wrong code word. But over in the Interior Department the clerk who got the report on his screen spit Tab on the keyboard. He called up his supervisor who in turn called up the interior secretary. Roscoe 29, it seems, is Yellowstone National Park's grizzly bear number 29, nicknamed "Roscoe."

When the secretary read the report he was angry because he hadn't heard of this protest before. Protesters had, after all, driven his predecessor from office. Besides, if killing one bear would satisfy the protesters, he was all for it. In fact, he'd have two or three shot. He called up Yellowstone's supervisor.

The supervisor, who was in the middle of reviewing the Park's blueprint for a hundred-seat outhouse near Fishing Bridge, didn't know anything about the protesters either. But he wanted to be on his boss's good side. He told him he'd have several grizzlies "dispatched," but it would take awhile because they were still hibernating. He said that will allow time to discreetly find out any objections. The secretary hung up and decided to take a sauna.

The park supervisor, because he thought his boss was crazy, decided he'd better lay the blame for this idea on another agency. He called up Don Bianchi, public information officer for Montana's Department of Fish, Wildlife, and Parks. The supervisor asked Bianchi if he would suggest killing a few grizzlies so it would get a few lines in local papers. Bianchi's a nice guy. He agreed.

So, last Friday in Bozeman, at a Fish and Game Commission meeting, Bianchi said, "I think we could solve our grizzly bear problems if we could hunt two or three a year" around Yellowstone. Some grizzlies are dangerous, he said.

After hearing this story from the anonymous source, I said I didn't believe it.

"It's true," he said. "How else do you explain the government jailing citizens who want only one of ten thousand nuclear weapons destroyed, yet killing rare bears because they're dangerous? It's a bureaucratic foul-up." Then the government will surely straighten this mess out?

"Oh, no," he replied. "We couldn't do that. Think of the precedent."

Forum

The Kaimin welcomes expressions of all views from readers. Letters should be no more than 300 words. All letters are subject to editing and condensation. They must include signature, valid mailing address, telephone number and student's year and major. Anonymous letters and pseudonyms will not be accepted. Because of the volume of letters received, the Kaimin cannot guarantee publication of all letters, but every effort will be made to print submitted material. Letters should be dropped off at the Kaimin office in the Journalism Building Room 206.

Archie Venola

Editor: To Richard Venola:

At the beginning of this school year, I read an interesting article on Afghanistan by what seemed like a professional journalist. It didn't make me jump up and respond although I now wish that I had. I had no idea that this person measured the professionalism of his articles by the amount of response he received. I would have responded, not to soothe his ego but to tell him I felt the article was professional or its own merits.

The articles you wrote since then remind me of a fellow who sat several seats away from me in Freshman English in high school. He used to let out some stinky farts and for the next few moments he'd sit there and sniff them, apparently enjoying the aroma.

Similar to this person, you seem to enjoy the aroma so much you don't care what it will cost you or the people around you. It will inevitably cost the field of journalism plenty since you aren't alone with your interpretation of professional journalism being ego satisfaction. Sam Reynolds and others seem to measure the merits of their work by response, also. This is only speaking of what it costs you as a professional.

Let's talk of what it costs those around you. Instead of helping to bridge the gap between conservative and liberal minds in this country (which is fully within the power of media to do) you are helping to broaden the gap. "Who cares if we provoke a battle or instigate violence between different groups, we got a response didn't we?" seems to be what you're saying. The root of this type of thought is pure "ego satisfaction."

Archie Bunker comes to mind here. When this program was televised half of America hated him and the other half said "Archie Bunker for President." Closed-minded, conservative racists were being silenced and their ideas were fading away until "All in the Family." This "satire" and others led to a broader gap between the two sides. Satire proves only to be a tool, designed by its author, to use people as gamepieces in a game called "Amuse me."

The effects of your articles can also be compared to

someone else in history. Joe McCarthy played the game, very successfully, including most of America. However, McCarthy had an excuse for what he started. He actually believed what he was saying. After reading your article on Afghanistan I don't think you have his excuse.

I don't choose to item-by-

item respond to your article (Friday) about Native Americans. Suffice it to say that I am a student at this University as a means of survival. I am learning about your culture to try and understand how America can point the finger at Russia and other suppressive governments for violating human rights while attempting to do the same to my people. The constitution doesn't apply to Native Americans. Assimilation seems fine when your society does it, but we better do something about Afghanistan!

In my opinion you could have written a professional article about suppression here in America. Instead, you went for the ego fulfillment of response. What a wasted school year you've had.

Rugby: finesse, a talent for the brew and leather balls

By Jerry Wright

Kaimin Senior Editor

Bashing heads and drunken revelry of the most sordid sort seems to be the popular image of rugby and the actions of its aficionados. But while rugby players admit the image is correct to some extent, they insist their game is a very classy sport. "Elegant Violence," they call it. A combination of hard hitting, creativity and finesse.

The University of Montana Rugby Club is a mixture of those who appreciate rugby for the game's sake and those who appreciate the game, but also love and perpetuate the image that—as the bumper sticker says—"Rugby Players Eat Their Dead."

The UM Rugby Club, established by Professor Henry Byrd

in 1968 and partially funded by ASUM, is a loose-knit group of anywhere from 25 to 40 people, depending on who you talk to. About 20 show up at a good practice, according to club member Dan Smith, but there are 40 "Party Warriors," — injured players and friends who are social members.

It's difficult to get direct answers from a group of rugby players. They have great affection for their image of being outrageous. But they admit that rugby attracts a diverse group of people.

"We appeal to people who want to be involved in intercollegiate sports but don't want to put up with the bullshit," said J.T. Moore, club social chairman, in an interview with sev-

eral other club members.

"It takes a special breed to play rugby," added Bill Cody, team inspiration. "We're all well-hung."

Cody can be seen on occasion sprinting down field during a kick-off, screaming at the top of his lungs.

ers lost to graduation, it doesn't expect to repeat that performance this year.

It takes intelligence to play rugby well, Beuch said. There are no huddles, and play is continuous for each 40-minute half, with no substitutions except for injury. And

Beuch added. The team must control the ball as a unit.

Rugby players stick together because "we have trouble making friends," Cody said.

"The main goal in rugby," added Smith, "is the story. It's no fun if you don't tell everybody about it."

Back Line Captain Russ Beuch, a voice of reason in an otherwise scatter-brained though amusing interview, said rugby's appeal at UM is that aside from performance on the field, "you don't have to be serious about anything."

"When a sport gets institutionalized, it turns into a business with lots of structure, which ruins it," he said.

In rugby "you just get in shape and go out and kick somebody's ass," added Moore.

There are no training rules, though players are encouraged to work out two to three times a week with the team and on their own as much as possible.

"Training rules hamper our creativity," said Cody.

Conditioning is imperative if a person really wants to play, said Beuch.

"You run for 80 minutes with no substitutions," he said.

There are nine teams in Montana, and the UM team plays every Saturday during Spring Quarter, traveling around the state or playing on their home field at Playfair Park. Last year the team took the state championship, but because of play-

there are just two injury timeouts each half.

"You've got to think on your feet," said Beuch. "It's a very creative sport; you've got to keep your head about you. There is not the specificity of position as in football."

There are not the number of injuries as in football, either, despite the fact that no padding or helmets are used. There are a lot of bruises, bumps, sprains and pulls, Moore said, but so far this season only one major injury—a broken arm last weekend.

Rugby is an outlet, said Moore, a chance to let off steam and to travel around the state and have a good time.

"It also gives you a chance to satisfy your blood lust," Cody added.

There is a strong sense of camaraderie about the team, something Moore attributes to the physical nature of the game.

"You have to look out for your teammates," he said. "There aren't any hot dogs, it takes 15 guys working together to get the ball down the field."

That is the major difference between rugby and football,

"Why else would your friends like you?" Cody agreed.

Off the field, rugby has its traditions. Particularly the Zulu Warrior Dance.

The Zulu is for the rookie on his first score. Following the game, his teammates surround him and chant the Zulu Warrior Chant while the honored player strips and his teammates douse him with beer.

Nudity and beer seem to be a big part of post-game celebration, win or lose.

At the Maggot Fest last weekend—a rugby tournament that draws about 30 teams each year from all over the Northwest and Canada—the sport at the Saturday night party was break dancing in jock strap and two inches of beer.

"You can express yourself more freely at a rugby party, because no one cares," said Chris Lopp, who joined the team this spring. "If you want to be outrageous, be it. The whole thing is addicting, from parties to the game."

UCLA leads powerful UM Invitational Saturday

Some of the best track and field athletes in the nation will be featured Saturday at the Third Annual Montana Invitational Track Meet at Dornblaser Field, beginning at 1 p.m.

Competing with the Grizzlies, among others, are perennial national powers UCLA, the University of Washington and the University of Portland.

In last year's meet there were nine records set including five Dornblaser Field marks. The field marks set were a 282-foot-5 javelin throw by Washington State's Laslo Babits; a 7-foot-2 3/4 high jump by WSU's James Cunningham; a 1500-meter run of 3:47.58 by WSU's Richard Tuwei; and intermediate hurdle mark of 45.04 by Chris Whitlock of WSU and a 50.80 by the University of Idaho's Mike Kinney.

"This meet is tailored for track and field spectators," Grizzly Coach Bill Leach said. "It has national and world class matchups and I expect to see some great performances. They say competition against the best brings out the best and that's what we have in this meet."

Leach said the meet has been condensed so that it will start at 1 p.m. and the last events will begin at 3.

Former Hellgate High School star Mike Ramos, now attending and competing for the University of Washington, will compete in the pole vault competition.

Leach said he will be flying here separate of the team because he will be delayed in Pullman competing in the Pac-10 decathlon tournament held there.

Leach also said he expects

great head-to-head battles in the javelin, discus, high jump, 100-meter run, long jump and triple jump competition.

A breakdown of those events is:

Javelin—This field is led by UW's Bob Rockett, an NCAA and Olympic trial qualifier with a best of 267-feet. Teammate Dale Pedersen also has an NCAA qualifying mark of 255-feet-7.

The Grizzlies' have the top thrower in the Big Sky in Shawn Maus with a best of 220-feet-3. He is followed by Montana State's Rich Paull (219-feet-5).

Discus—UCLA's Brian Muir, at 192-feet-11, should battle it out with MSU's Lance Deal (193-feet-6) and UW's Dan

Tabish (187-feet-8). Tabish is a former Montana state champion and is from Hellgate High School. The Bruins' Jim Banich has a best of 186-feet-6 and there are two others over 170 feet.

High Jump—UCLA's Troy Haines has gone 7-foot-2 and the Grizzlies' Mike Deden has cleared 7-foot-0 many times this season. MSU's Ken Townsend has a best of 6-foot-10, while UM's Scott Zanon and Rick Thompson have both jumped 6-foot-8.

100 Meters—The Huskies' Sterling Hinds has a 10.43 this year and has run 10.27 while teammate Robert Gray has a best of 10.70. UCLA's Ed Savage has a 10.81, and the Grizzlies' Paul Reneau has a

10.74, ranking him seventh in the Big Sky.

Long Jump—UCLA's Darryl Taylor has the best mark coming in at 24-feet-4, but UM's Dave Binder is close behind with a 24-feet-1 jump, the second best in the Big Sky. Washington's Vesty Jackson has gone 23-feet-10 and MSU's Doug Smith has jumped 23-feet-4 3/4.

Triple Jump—UM's Binder has a triple jump mark of 50-feet-4 3/4, a UM record, and only one jumper in the tourney has a better mark. That is Mike Taylor, of UW, with a 51-feet-2 mark. Jackson, also of UW, has a best of 50-feet-4 3/4.

Cowboys sign Fudge, Charles

Former University of Montana football players Tony Fudge and Joey Charles have signed free agent contracts with the Dallas Cowboys of the National Football League, the Cowboys announced recently.

Fudge, a 6-foot-2, 202-pound strong safety had only 26 tackles in six games during his injury-plagued senior year in 1983. The Great Falls native had 44 tackles and six interceptions as a junior and was first team All-Big Sky and an Associated Press All-American honorable mention.

Charles, a speedy, 5-foot-10, 200-pound tailback from Valencia, Calif., was the Grizzlies' leading rusher in 1983 with 511 yards on 122 carries for 4.2 yards per carry average. He was also hampered with injuries and played in only seven games.

Charles rushed for four touchdowns, caught 21 passes, two for touchdowns, and was a second team all-conference in 1983.

The two join former Grizzly tight end Brian Salonen who was drafted in the 10th round by Dallas last month. Salonen was a Division 1-AA All Ameri-

can, first team all-conference and an East-West Shrine Game choice.

Salonen, a 6-foot-2 1/2, 232-pounder from Great Falls, broke all of UM's career receiving records and broke or tied four 1-AA national records.

Psychiatrist Lifton to give Mansfield Lecture

Robert Jay Lifton, psychiatrist, teacher and award-winning author, will be the 17th speaker in the University of Montana series of Mansfield Lectures in International Relations.

Dr. Lifton, a professor of psychiatry at the Yale University School of Medicine, will speak Thursday, May 10, at 7:30 p.m. in the University Center Ballroom. His topic is "Nuclearism and Beyond: The Quest for

Awareness." His lecture is open to the public without charge.

He will be honored at a no-host luncheon today, at noon in the University Center Mount Sentinel Room.

worked with and written about brainwashing victims, Hiroshima survivors and Vietnam veterans.

Dr. Lifton has been awarded a half dozen honorary doctorates. His numerous other honors include the Gandhi Peace Award in 1984.

The Mansfield lectures are supported by an endowment established in 1968 in the UM Foundation to recognize UM alumnus Mike Mansfield's 25th year of congressional service and to mark the university's 75th anniversary.

The series has brought a succession of internationally known figures to the campus. The first lecture was given in 1968 by then Senator Mansfield. Mansfield, who served a record 16 years as Senate majority leader, was appointed ambassador to Japan by President Carter in 1977 and re-appointed by President Reagan in 1981.

Dr. Lifton's thought is being examined in the 1984 Mansfield course at UM, taught by Stewart Justman, professor of English. Titled "Language and Revolution," the course traces the emergence of the modern idea of revolution and investigates the ways in which catastrophic change works on ordinary ways of thinking and speaking. It gives special attention to the Industrial Revolution and the Nuclear Revolution.

Dr. Lifton has written that his two subjects of study have been "holocaust and transformation." In particular, he has studied how people survive extreme situations. He has

Alice in Weatherland

"C'mon," said the White Rabbit. "Let's have our picnic."

"Hold on," Alice said. "I just remembered something."

She stopped at a telephone booth, although the White Rabbit didn't recall seeing one there the moment before.

"It's Public Radio Week, of course," said Alice. "And KUFM has weathered some rough times—increased costs, decreased federal funds, aging equipment, cooler temperatures, scattered showers, local west winds, a high of 59 and a low of 36. So I'm dialing 243-6400 to make my pledge."

The White Rabbit sighed. "Public radio's all right," he thought, "if you like happen to like music at dawn, afternoon and night, but I wanted to go on a picnic."

"All things considered, I'd've done better to catch a ride on a pea green boat."

Nominees sought for Pantzer Award

The University of Montana committee that will select the recipient of the 1984 Robert T. Pantzer Award is seeking nominations.

The \$100 award is presented annually at Homecoming, scheduled this year for Oct. 25 and 27, to an individual from the university or the state who has contributed substantially to making the university a more open and humane environment.

The award was established by the UM Foundation in 1975 to honor Pantzer, UM president from 1966 to 1974. He and his wife, Ann, live in Santa Rosa, Calif.

Pantzer, whose open-door policy was a hallmark of his administration, provided outstanding leadership in the preservation of unfettered academic inquiry and expression, according to Alex M. Stepanzoff, chairman of this year's selection committee. Stepanzoff said the committee is seeking nominees who have demonstrated similar characteristics.

Nominees should be proposed in one-page letters, accompanied by a summary no longer than one page of the nominee's background and attributes.

Nominations are due May 13. They should be sent to Alex M. Stepanzoff, Chairman, Pantzer Award Committee, Lodge 139, University of Montana, Missoula Mt 59812.

Past recipients of the Pantzer Award are: Fred Henningson, 1983; Eugene Donaldson, 1982; John M. Dietrich Jr., 1981; Eugene Andrie, 1980; Emma Lomasson, 1979; K. Ross Toole, 1978; Alex M. Stepanzoff, 1977; Vincent Wilson, 1976, and George P. Sarsfield 1975.

Tour of Flathead Indian Reservation scheduled

University of Montana students can tour the Flathead Indian Reservation on Saturday, May 12, as part of a program funded by the Cooperative Projects Program of the National Association for Student Affairs and UM.

Students will visit the pow-wow grounds in Arlee, a longhouse, the Indian cultural center and museum, the St. Ignatius Mission, a

cottage industry in Elmo and the Moise National Bison Range.

The tour leaves at 9:45 a.m. and returns at 4 p.m. Participants should meet in front of the UM Field House and bring a bag lunch. Dorm residents may order from the food service two days in advance. Cost for the trip is \$3. Admission charge for the museum is 50 cents. The deadline to apply

for the tour is tomorrow.

Participants are also encouraged to attend an orientation session tomorrow at 7 p.m. in Liberal Arts 305.

Today

Population

Continued from page 1.

States uses forty percent of total world resources when it only has 5 or 6 percent of the total world population."

One hundred million people live in Nigeria and "compared to the average resources used in the United States," the people of Nigeria use next to nothing, he said.

According to McQuiston, professor of sociology, world population growth has been one percent per year, which means that the world's population doubles every 30 years.

"There are about 217 more people every minute in the world," he said.

Translate this into the problems it causes in food production, McQuiston said, and it averages out to "700 million calories of food per day" in world-wide consumption.

Shaplen to speak

Robert M. Shaplen, Far Eastern correspondent for the New Yorker and author of several books on Vietnam and Asia, will be speaking tonight at 8:00 in the Underground Lecture Hall.

Shaplen has worked for the New Yorker since 1952 and has been called "one of the most thoughtful and knowledgeable American journalists in Southeast Asia."

His speech "The Unraveling of American Foreign Policy," is the seventh Edmund and Mary Freeman Memorial Lecture and is free to the public.

"Food production capabilities are limited," he said, because there "isn't enough room to grow the food needed, given our present dietary habits."

In 35 years, two-thirds of the world's population will be malnourished because of limited agricultural space, he added.

"The next war may be a war of food," he said.

Olympics

Continued from page 1.

about arrangements in Los Angeles and we have met those concerns," Speakes said.

It was not immediately known whether other Warsaw Pact countries would join the Soviet Union in staying away from the Games. Sports committees and state-controlled media in East European countries have been repeating Soviet allegations that the United States was violating the Olympics charter, but Tuesday they reported the Soviet withdrawal without comment.
