Spring 2018

Course Location and Time
ISB 110
Monday, Wednesday, and Friday 1:00-1:50

Instructor Information
Instructor: Nicole McCray, Ph.D.
Office: Skaggs 203
Email: nicole.mccray@umontana.edu (the best way to contact me)
Office hours: MWF 12:00 to 1:00 and by appointment

Course Objectives:

The primary purpose of this course is to provide students with an overview of human development from conception through adolescence. Throughout the course of the semester, we will learn about the changes that take place in an individual’s life from birth through adolescence, as well as the factors contributing to those changes. To accomplish these goals, we will learn about the relevant theories that guide research in developmental psychology as well as the research methods used by developmental psychologists. We will also apply concepts learned in class to practical problems facing children and families. Students are expected to think critically about the issues and to actively participate in class discussions. The format of the course will rely on both lecture and discussion.

In order to accomplish these objectives, it is expected that students will exhibit professional behavior throughout the course. This includes, for example, student attendance, preparedness, and active participation and involvement in class.

Recommended Text:

Grading:

Your final course grade will be based upon 260 total possible points that will be distributed as follows:

- 4 Exams (50 points each): 200
- 1 Assignment (50 points): 50
- In-class Activities: 10

Course grading will be based on the following point scale:

- A = 234-260 (90-100%)
- B = 208-233 (80-89%)
- C = 182-207 (70-79%)
- D = 156-181 (60-69%)
- F = 0-155 (0-59%)
Exams

Four exams will be given during the semester, each worth 50 points. The exams will test your knowledge of topics covered by the course text and information from lecture.

- Exam format: Multiple choice. **(NCS 50/50 blue/green scantron forms are needed for tests)**
- Exam make-up policy: When possible, give prior notice of a missed exam. Be prepared to provide reasonable evidence and documentation for missing an exam. Make-up exams may be in a different format than the original exam.
- Missed exam: If you miss an exam and do not make arrangements for a make-up exam, you will receive a zero as your grade for that exam.

In-Class Assignments

A variety of in-class assignments will be given throughout the semester. These assignments will vary depending on the topic discussed in class that day. For example, students may be asked to reflect upon a particular issue in development and turn in a brief written response. Assignments are designed to increase students’ ability to apply concepts from class. There are no make-ups for in-class assignments (except in the case of a documentable emergency/medical situation or university sanctioned activity) but there will be a variety of opportunities to earn these points. If you need to make up an assignment, you must let me know immediately and you must complete the work within one week after the missed assignment was due (unless an illness/emergency prevents you from doing so).

Assignments

There will be an assortment of individual assignments from which you are to pick 1. A total of nine options are listed on the last page of your syllabus. These assignments are designed to increase your understanding of a theory/topic. This assignment will contribute 50 points to your final course grade.

Course Guidelines and Policies

Disability Modifications

The University of Montana assures equal access to instruction through collaboration between students with disabilities, instructors, and Disability Services for Students. If you think you have a disability adversely affecting your academic performance, and you have not already registered with Disability Services, please contact Disability Services in Lommasson Center 154 or call 406.243.2243. I will work with you and Disability Services to provide an appropriate modification.

Attendance

Attendance is not mandatory and role will not be taken. However, your course grade is mostly determined by exams (which will include material primarily from lecture as well as the text). **Course notes are not posted – if you miss class, you are responsible for the material covered.**

Cell Phones/Laptops

Cell phones are to be turned off during class, please. You are welcome to use your laptop to take notes; other activities can pose a distraction to your classmates – please refrain from using laptops for anything other than note taking/class activities.
**Courtesy**

Courtesy is expected. Come to class on time and stay for the entire session. If you have an emergency and must arrive or depart late or early, please do so quietly. Be respectful of the instructor and classmates, do not be a distraction to others. Please familiarize yourself with the [Student Conduct Code](#).

**Course Withdrawal**

April 2 is the last day to drop classes with an add/drop form, without the Dean’s signature. After that date, no petitions to drop the course will be signed and no Incompletes will be given except in documentable emergency situations.

**Syllabus**

The instructor reserves the right to change the syllabus if necessary.

Assignment
From this list of potential topics, please choose 1 to complete as the assignment portion of this class. Independent of choice, the assignment is due on MONDAY, APRIL 23 -- AT THE START OF CLASS. Late assignments will be docked 10 points each day late, including weekends. No emailed submissions will be accepted without instructor approval.

Please note, some of these assignments may take some planning. You must specify the number of the assignment you choose when you turn your paper in. You may also need to cite a source beyond your textbook for these assignments. This source must be a peer reviewed journal. Websites, newspapers, magazines, and other text books are not acceptable sources.

Assignments must be well-written and complete, as grading will depend on grammar, APA style (if appropriate) and general readability. Assignments should be between 2-3 pages in length, typed, double-spaced, no weird fonts or spacing, and stapled. PAPERS EXCEEDING 3 PAGES (not including references/title page) WILL BE DOCKED 5 POINTS. As always, plagiarism will not be accepted, resulting in action from the psychology department and earning no points for the assignment. A detailed grading rubric will be available 2 weeks before the assignment is due.

Be sure to integrate concepts discussed in class and cite outside sources when appropriate. Do not just give your opinion on a particular issue. Failure to fully answer the question will result in a maximum grade of 25 points. PROOF READ your work.

1. Compare/contrast child rearing practices in 2 different cultures. Based on what you learned in class, which elements of childrearing are the most appropriate in each culture and which are troublesome?

2. Naturalistic observation. Find a place where there are babies/children/adolescents (this can be a park, the library, the Children’s Museum, a daycare, a school, a sporting event, etc.) and observe a phenomenon of interest discussed in class. Write a detailed description of what you observe.

3. Article critique. Find an article in a popular magazine for parents and assess whether the advice provided to parents is appropriate in light of what you have learned in class.

4. Choose a topic of interest from class and interview a child, teen, parent, teacher, childcare provider, etc. to gain further insight into the topic.

5. Compare/contrast childhood today with another period in history. What are the pros/cons involved in growing up in Western cultures today?

6. A pregnant woman and her husband are discussing their hopes/fears for their child. The wife is worried about doing all of the right things for their baby because she believes that infancy is the most important time in a child’s life. Her husband disagrees. He thinks that adolescence is a much more important time in the lifespan, involving many more crucial opportunities for parents to guide their children towards appropriate behavior. What would you say to these parents? Is one point in the lifespan more “crucial” than the rest? What are the challenges they
are likely to face in infancy or adolescence? What can they do as parents to be sure that their child turns out ok?

7. Discuss the effects of the use of technology on child development (TV, the internet, touch screen devices, etc.). Use research to support your discussion of pros/cons associated with the tech. of your choice.

8. Choose a controversial issue in Developmental (daycare, divorce, spanking, co-sleeping, bullying, etc. and review the latest research in this area).

9. Choose your own assignment. Must be approved by the instructor. Assignments not previously approved will not be accepted.
