This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.

**Geography 487/489: Remote Sensing and Raster GIS & Laboratory
Fall 2018 Syllabus**

Instructor: Dr. Anna Klene
Office: 216 Stone Hall
Teaching Assistant: Ryan Rock
TA Office: 206 Stone Hall

Office hrs: W 3-4:30 pm & by appointment
E-mail: anna.klene@umontana.edu
TA Office hrs: T&W 9-11 am & by appt.
E-mail: ryan.rock@umconnect.umn.edu

Learning Objectives: Covers physical laws and principles that a *user* of aerial photos or satellite imagery should know. Know what questions to ask when given or acquiring imagery for a particular study. Overview of applications and limitations of current imagery. **Lab is required.**

Required Text: Remote Sensing and Image Interpretation, 7th Edition, Wiley & Sons, NY. 2015. By: T.M. Lillesand, R.W. Kiefer, & J.W. Chipman (6th okay & less \$, but section #s are different).

Optional Text: An Introduction to Contemporary Remote Sensing, 1st Ed., McGraw-Hill, Q. Weng, 2012.

Tentative Course Outline:

Week 1:	History & Aerial Photography	Chapter 2.1-2 & 2.5-2.9
Week 2/3:	Photogrammetry & Visual Interpretation	Ch. 3 & 1.12
Week 4-6:	Remote Sensing Basics	1-1.11, 2.3-2.4, & 7.2
	Exam 1	Oct. 4
	Grad Student Paragraph Due	Oct. 11
Week 7:	Optical Satellites	Ch. 5.1-5.11 & 5.14-5.21
Week 8/9:	Vegetation Classifications	Ch. 8.2 & 7.7-7.16 & 7.18-7.20
Week 10:	Accuracy Assessments	Ch. 7.17
Week 11:	Exam 2	Nov. 8
	Map Algebra	Only Class Notes
Week 12:	Thermal Systems	Ch. 4.8-4.13
Week 13/14:	Radar & Lidar	Ch. 6.1-6.22, 6.23-6.25
Week 15:	Hyperspectral & High Res.	Ch. 5.12-5.13, 6.18 & 7.21
Week 16:	Grad Student Project Due	Dec. 7
	Exam 3	Dec. 10

Grading Procedure:

	<u>Undergraduate</u>	<u>Graduate</u>
Quizzes	up to 50 points	up to 50 points
3 Exams	500 pts.	500 pts.
Lab Exercises	275pts.	275 pts.
<u>Graduate Student Project</u>	<u>NA</u>	<u>100 pts.</u>
Total	775+ pts.	875+ pts.

Important dates:

- Sept. 17: Last day to drop/add in Cyberbear with partial refund or change to "Audit".
- Oct. 29: Last day to drop with drop/add form (w/ prof & advisor sigs), \$10 fee, and "W" grade.
- Dec. 7: Last Day to petition drop (w/ prof, advisor, & dean sigs), \$10 fee, and "WP" or "WF" grade.

**** This syllabus may be modified as necessary during the course. ****

Geography 487 Course Guidelines and Policy Statements

1. Course Outline - **KEEP** and use the attached outline to maintain continuity throughout the course. Each major topic has a different quantity of concepts that need to be covered so do not assume each section refers to a specific lecture period.

2. Reading Assignments - The required reading assignments are listed on your outline. The text for this course is intended (a) to provide further explanation of concepts covered in lecture and (b) to supplement the lectures by presenting additional information. You are responsible for these reading assignments for all exams.

3. Exams - All exams in this course will be comprehensive. Remote Sensing builds one concept upon another and therefore all tests must contain some previously covered material. However, the exams will be oriented toward the section of the course most recently presented. The exam format will be mainly objective (multiple choice and definitions) and will consist of (a) concepts covered in lecture and (b) concepts covered in the required course readings. There is no provision for make-up exams. Exceptions will be made only for **documented** family or medical emergencies.

4. Laboratory Exercises - The exercises are a vital component of this class. They account for at least 33% of the final grade. This course is graded as a 4-credit class, with the same grade assigned for all 4 credits. Missing a lab does not relieve you of responsibility for completing the assignment on time. The lab is open at other times for you to finish assignments. These policies will be covered in the first laboratory. **Lab exercises are marked off 10% per calendar date late, and are not accepted beyond the next lab period.**

5. Class Attendance – Is strongly recommended. Quizzes may be given on any day and cannot be made up if missed without an acceptable documented excuse. If you happen to miss a class, please borrow a fellow student's notes and review the PowerPoint presentations that I post on the department server. After doing this, if you have additional questions please see me during office hours or lab. Incompletes will be given only for medical or family emergencies, but must be completed within 1 year (<http://www.umt.edu/catalog/academics/academic-policy-procedure.php>).

6. Disability Accommodations – For reasonable accommodation please see me as soon as possible. Disability Services for Students can assist both of us in the modification process. For more information, visit the Disability Services website (<http://www.umt.edu/dss/default.php>).

7. Academic Dishonesty - All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or a disciplinary sanction by the University. All students need to be familiar with the Student Conduct Code. The Code is available for review online at http://life.umt.edu/vpsa/student_conduct.php.

8. Final Course Grade - At the end of the course, the distribution will be examined and letter grades assigned at approximately: A=>90%, B=80-90%, C=70-80%, D=60-70%, etc. The “+/-” grading system will be used. Credit/No Credit is available. **There will be no extra credit of any kind.**

**** This syllabus may be modified as necessary during the course.****

**Geography 489
Fall 2018 Schedule**

Lab 001: W 11:00-12:50 pm, 218 Stone

Lab 002: W 1:00-2:50 pm, 218 Stone

Lab supplies: Calculator, colored pencils, & a magnifying glass for Labs 1-4. USB memory stick should be used to save your computer labs (3-13) at the end of each exercise to back up your work.

	Tuesday class	Wednesday lab	Thursday class
September			
Week 1	28 – Introduction	<i>Lab 1: Review Map Scale & Coordinate Systems</i>	30 – History of Aerial Photography
Week 2	4 – Photogrammetry	<i>Lab 2: Aerial Photography</i>	6 – Photogrammetry
Week 3	11 – Photogrammetry/Color	<i>Lab 3: Photogrammetry</i>	13 – Color/ Aerial Photo Interpretation
Week 4	18 – Electromagnetic Spectrum	<i>Lab 4: Interpretation of B&W & CIR Images</i>	20 – EMS continued
Week 5	25 – EMS continued	<i>Lab 5: TerrSet Tutorial & Registering</i>	27 – EMS continued
October			
Week 6	2 – Review 1 & History of Satellites	<i>Lab 6: Resampling & Image Interpretation Basics</i>	4 – Exam 1
Week 7	9 – Supervised Classification	<i>Lab 7: Supervised Veg. Classification</i>	11 – Virtual Globes Grad Paragraphs Due
Week 8	16 – Unsupervised & Fuzzy Classification	<i>Lab 8: Unsupervised Veg. Classification</i>	18 – Accuracy Assessment & Smoothing
Week 9	23 – Orbits/ Landsat, SPOT	<i>Lab 9: Accuracy Assessment: Missoula NLCD</i>	25 – GOES, POES, etc. & Vegetation Indices
Week 10	30 – Map Algebra, Modeling & EOS Satellites	<i>Lab 10: Resolution Matters: Yellowstone</i>	1 – Review 2
November			
Week 11	6 – Election Day No Classes	<i>Lab 11: Map Algebra: Climate Modeling in Kenya</i>	8 – Exam 2
Week 12	13 – Thermal Imagery	<i>Lab 12: Thermal & Radar Imagery</i>	15 – Thermal Imagery
Week 13	20 – Radar	No Classes	Thanksgiving Holiday
Week 14	27 – Radar & Microwave Imagery	<i>Lab 13: Lidar</i>	29 – LIDAR
December			
Week 15	4 – Hyperspectral & High Res.	All Labs Due	6 – Review 3 Grad Projects Due Friday
Exam Week	Monday, Dec. 10 at 10:10 am – Exam 3		

**** This syllabus may be modified as necessary during the course.****
