SECOND-GROWTH FOREST RESEARCH
REVEALED AT UM SATURDAY, MAY 13

MISSOULA--

Recent research results on second-growth forest management will be discussed at the University of Montana Saturday, May 13.

Brief reports will be made on 22 recent research projects conducted by the Montana Forest and Conservation Experiment Station at UM. The projects are part of the station's Mission-Oriented Research Program.

Registration for the symposium will begin at 9 a.m. May 13, and the program will run from 10 a.m. to 4 p.m. in a number of concurrent sessions. The fee is \$3 before May 10 and \$5 after May 10. All events will be in the University Center third-floor Ballroom.

The program will include reports on such topics as "Status of the Mission-Oriented Research Program," "Effects of alternative slash treatments on fire hazards," "Ponderosa pine thinning study," "Forage quality in relation to forest canopy" and "Drying lumber with a solar kiln."

To register or for more information, interested persons may write MORP director Robert Pfister, School of Forestry, University of Montana, Missoula, MT 59812, or call him at (406) 243-6582.

The symposium will be held in conjunction with the annual UM School of Forestry Spring Awards Banquet, sponsored by the UM Forestry Alumni Association, beginning at 6 p.m. May 13, in the University Center.
