UM OFFERS SUMMER COURSE ON SOILS

A course which will examine soil as a medium for plant growth will be offered June 18-July 13 at the University of Montana.

The course, "Introductory Soils," will introduce the chemical, physical and biological characteristics of soils and will be taught by Thomas Nimlos, professor of forestry. The usual chemistry prerequisite has been waived in order to open this course to non-forestry majors.

A catalog containing information about summer-session registration and courses is available at the Summer Programs Office, 125 Main Hall, University of Montana, Missoula, MT 59812; (406) 243-2900.
