Guiding Principles

We have developed 12 principles to guide the process of prioritizing and implementing the climate adaptation goals and actions that are presented in this plan. While all of these principles should be considered with respect to each adaptation goal and action, we recognize that in some cases there will be tradeoffs among the principles. We also know that to be resilient we need to collectively reduce our contributions to climate change by

Helena commission backs 2030 "100% clean electricity" goal

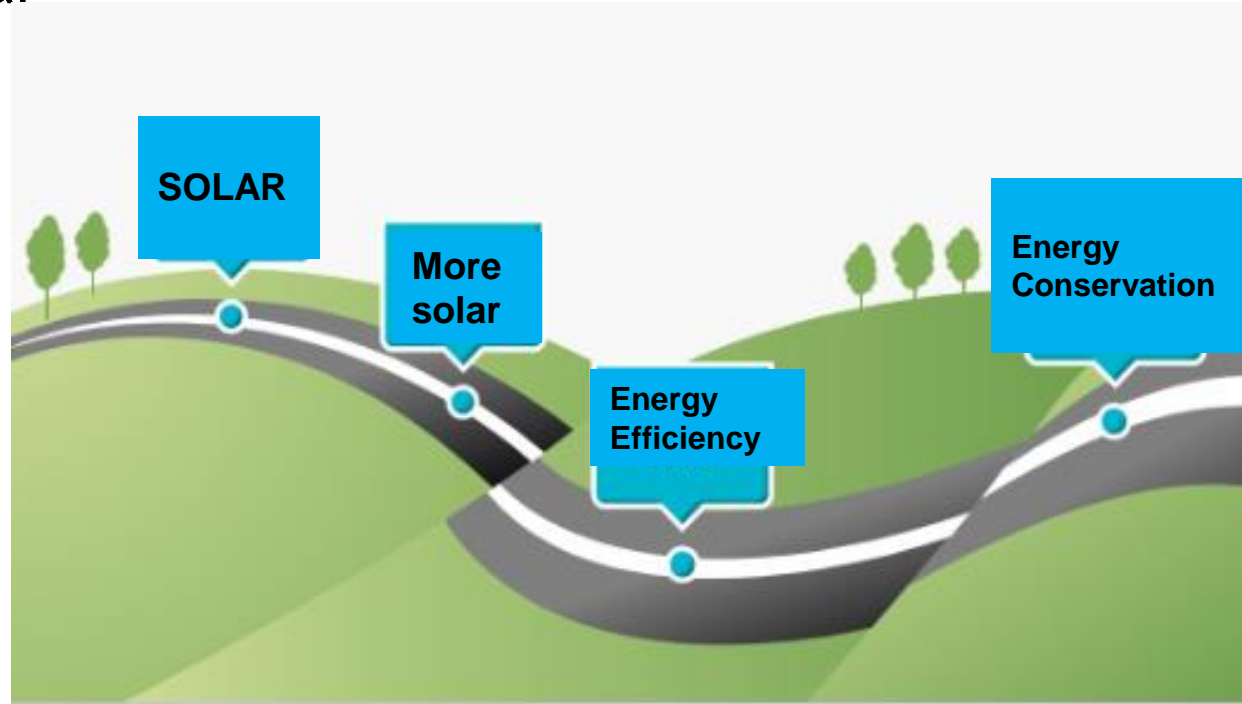

Posted: 10:20 AM, Feb 25, 2020 Updated: 10:21 AM, Feb 25, 2020

By: Jonathon Ambarian - MTN News

100% Roadmap – components:

1. Renewables - Solar

- Utility scale
- Community scale
- On-site

2. Energy efficiency & conservation

Renewable Electricity

Green Building, Energy Efficiency & Conservation

Transportation

Zero Waste Missoula

REPORT: Transportation is “climate enemy #1”

Destination: Zero Carbon

- all new light-duty vehicles sold after 2035 are EVs;
- all transit + school bus fleets are electrified by 2030;
- number of people who travel by walking, biking or taking transit is doubled by 2030

Governor's Climate Solutions Council: Montana Climate Solutions Plan

- Adaptation
- Mitigation
- Innovation

The screenshot shows the DEQ website header with the logo and navigation links for Divisions, Contacts, and a menu icon. Social media icons for Facebook, Twitter, YouTube, and Instagram are in the top right. The main heading is "Montana Climate Solutions Council". Below it is a navigation bar with five tabs: "What is the Council?", "Council Meetings", "Council Membership", "How to get Involved", and "Additional Resources". The "What is the Council?" tab is active. The content area is titled "About the Climate Solutions Council" and features the Montana Climate Solutions logo, which consists of three concentric circles in green, orange, and blue. The text describes the council's establishment by Governor Steve Bullock on July 1, 2019, and its mission to provide recommendations and solutions to reduce greenhouse gas emissions, prepare for climate impacts, and address the needs of communities in transition. A quote from Governor Bullock is included: "Climate change is already impacting our way of life and our economy. How we choose to respond to the changes around us offers a pivotal opportunity to both safeguard our traditional strengths and diversify and grow new opportunities for our future," said Governor Bullock. "That's why I'm convening a diverse group of Montanans to develop thoughtful solutions to address climate change for our state."

On Monday, July 1, 2019, Montana Governor Steve Bullock issued an Executive Order establishing the Montana Climate Solutions Council, tasking up to 30 Montanans with providing made-in-Montana recommendations and solutions to reduce greenhouse gas emissions, prepare the state for climate impacts, and address the needs of communities in transition through appropriate economic development and workforce strategies.

"Climate change is already impacting our way of life and our economy. How we choose to respond to the changes around us offers a pivotal opportunity to both safeguard our traditional strengths and diversify and grow new opportunities for our future," said Governor Bullock. "That's why I'm convening a diverse group of Montanans to develop thoughtful solutions to address climate change for our state."

"Like all difficult issues we tackle here in Montana, I know we can find a path forward by getting together, rolling up our sleeves, and focusing on the values we share in common. The state needs Montana-focused solutions, now more than ever," continued Governor Bullock.

THE BIG CLIMATE CHANGE EVENT
was incredible and inspiring.

THANK YOU to the 700+ people who joined us for this powerful community conversation.

Attended the event? Wondering what your next step might be?
Want to watch Dr. Rob Davies? [Head here!](#)

We had a BLAST Running Up For Air all day on Mt. Sentinel.

We've already raised over \$12,000, and there's still time to [DONATE](#) to those who spent their Saturday running up and down for clean air.

Thanks Runner's Edge for this new, cool, Missoula event.

ACT, ADVOCATE, ASSIST: doing what's necessary

We were thrilled to have 700+ people at The Big Climate Change Event on February 19! Thanks to those who joined us.

Now it's time to do what's necessary to address the climate emergency.
It's about RESOLVE.

Were you at the event and wondering what to do next? Or just interested in learning how to take action? Read on...

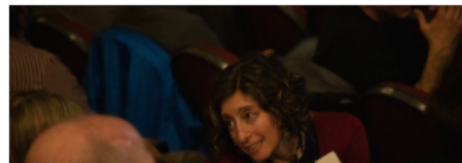

FEBRUARY 19, 2020

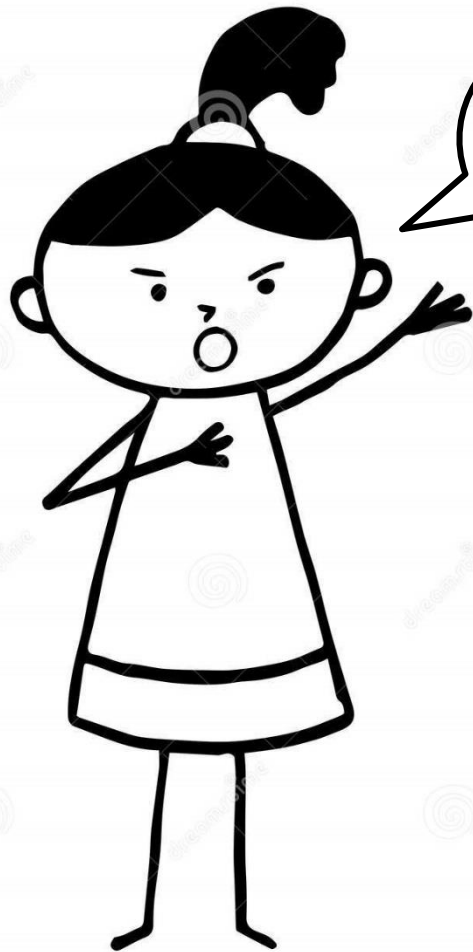

Where you will learn that it is an emergency. And that it is not impossible and there are things we can do, and we will feel good and motivated and fired up and ready to make a difference and do what is necessary.

**THE BIG
CLIMATE CHANGE**

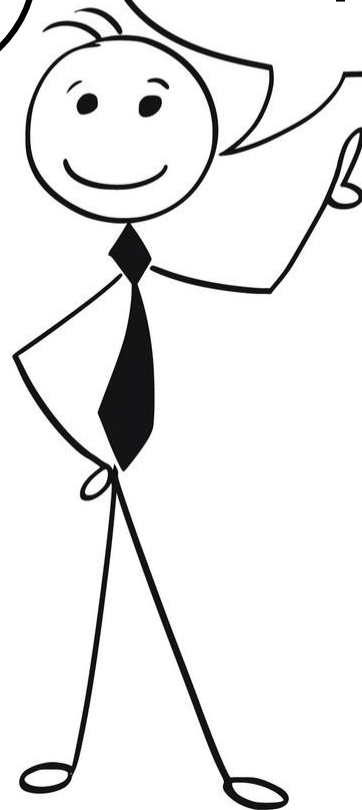

Thanks to Dr. Rob Davies for sharing his incredible presentation with Missoula! Video of the event is coming - in the meantime, check out Rob's talk in Bozeman the night before [on YouTube](#).

Check out some photos of the event, below: 700 people at the Wilma for an unforgettable evening.

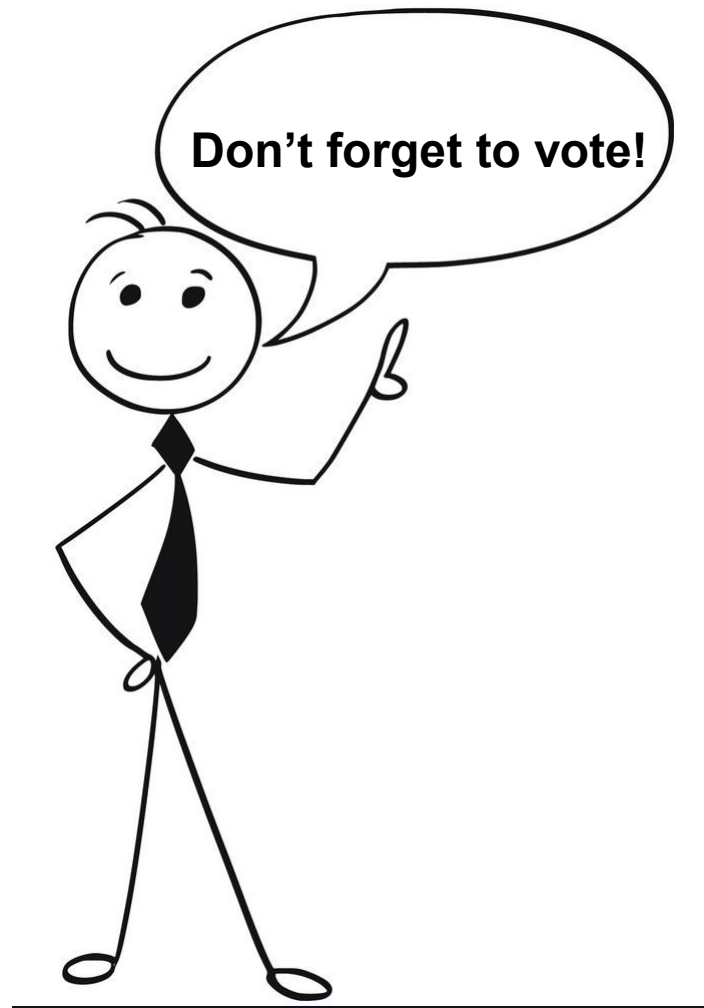

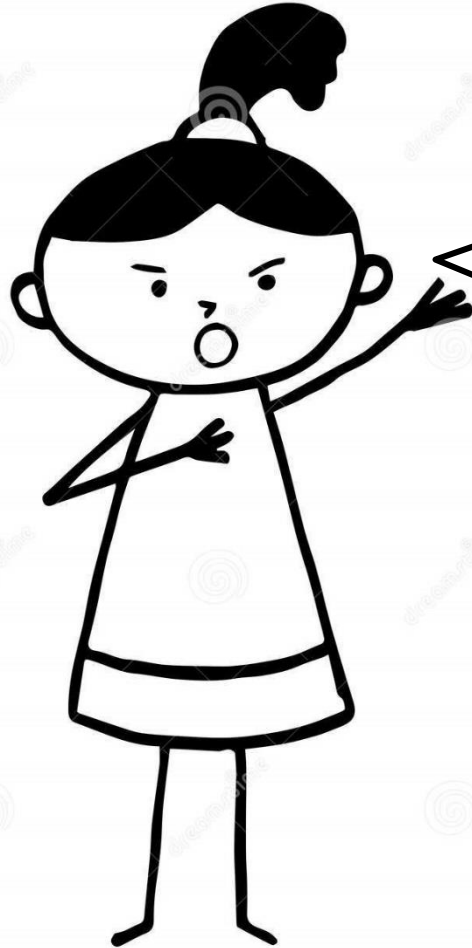

What
can I
do?

Step it up!

Do more than vote!

- work on campaigns
- excite 18 year olds
- Educate re down ballot candidates!
