The following items were news on the University campus this week.

Jack Ryan

Missoula, Aug. (00) -- The Department of the Army this week renewed a research grant to Dr. Mitsuru Nakamura, of the Montana University department of bacteriology, to continue specialized research work in the field of preventive medicine. Dr. Nakamura has been working on the effect of antimetabolites on the growth of Entamoeba histolytica. The grant was for $9,000 through the office of the Surgeon General for the Preventive Medicine Branch, Research and Development Division.

Missoula, Aug. (00) -- A research grant of $6,500 was awarded this week to Dr. Meyer Chessin, associate professor of botany at Montana University, for continuation of research on the physiology of plant virus diseases. The grant was received from the Department of Health, Education and Welfare, Public Health Service. Specific projects to be undertaken by Dr. Chessin include investigation effects on growth of host plants, effects of ultra-violet irradiation on plants and viruses, and identification of viruses of legumes in the Montana area.

Missoula, Aug. (00) -- Dr. Raymond L. Gold, assistant professor of sociology at Montana University, will address the meeting of the American Sociological Society on Aug. 29 in Seattle on "Collegeship and Forms of Rapport." The paper is the product of several years' study in social science research.
