Coreq., MUSI 105: As this is a laboratory course in singing and dictation to supplement Theory I, success is dependent on the student’s desire to grow as a vocal and/or instrumental musician. It is central to the experience that daily practice time be reserved and made use of in an orderly, productive fashion, much the same as practice/rehearsal sessions for applied study. The professional, highly competitive world of music opens quickly to those who can hear, read, speak and write in the language.

TEXT REQUIRED: A New Approach to Sight Singing, ed. 5, by Berkowitz, Fontrier, Kraft

GRADING SYSTEM: All tests are graded with numbered scores, not letter grades. Say a test is worth 20 points and one scores 15/20 (75%), for those who must have a letter grade, that equates to a C. If one scores 19/20 (95%), the letter grade equivalent would be A.

Keep a record of all scores by retaining each test. Use all tests, good and bad, as study guides. Expect weekly dictation tests (corrected in class). Sight singing tests are given “one-on-one” in Prof. Williams’ office. Sight singing tests will be scheduled as the semester progresses. Additional tests may be given unannounced.

* Assignments are due on/for the dates entered. Stay Ahead!
* Sight singing and dictation test materials will be drawn from assigned rhythmic and melodic examples. A professional, scholarly attitude and work ethic will get you there!
