This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.
Syllabus – GEO 309 – Sedimentation and Stratigraphy – Spring Semester 2013 – 4 credits

Lecture: Monday and Wednesday 10:10 to 11:30 AM and Friday; 10:10 to 11:00 AM; CHCB # 348

Professor: James R. Staub: Office hours are from 2:00 to 3:00 PM on Monday and Wednesday; other times by appointment. CHCB # 353; phone 243-4953; james.staub@umontana.edu

Course Outcomes: To provide you with a basic working knowledge of the characteristic features of sedimentary rocks and the physical and chemical processes responsible for their origins and diagenesis. A working knowledge of stratigraphic principles, methods of correlation, and methods of paleographic reconstruction will also be provided by this course. In addition, concepts of basin analysis are introduced. These outcomes are achieved through class room lectures, a series of laboratory exercises and/or problem sets, library research culminating in a term paper, and a field exercise.

Class Format: Many ideas and materials will be presented in lectures that are not covered in the course text. You are accountable for all ideas and materials covered in the text as well as those presented in lecture.

Moodle Course Supplement: Class announcements, lecture slides, and laboratory exercises and problem sets will be posted on Moodle.

Course Content:
Introduction to Sedimentology and Stratigraphy
Weathering and Soils
Transport and Deposition of Siliciclastic Sediment
Sedimentary Textures
Sedimentary Structures
Siliciclastic Sedimentary Rocks
Carbonate Sedimentary Rocks
Chemical/Biochemical and Carbonaceous Sedimentary Rocks
Depositional Environments
Controls on Sea Level
Continental Environments
Marginal Marine Environments
Siliciclastic Marine Environments
Carbonate and Evaporite Environments
Stratigraphy
Lithostratigraphy
Seismic, Sequence, and Magnetic Stratigraphy
Biostratigraphy
Chronostratigraphy
Basin Analysis and Tectonics

Grading: There will be two midterm exams (15% each). They will not be comprehensive. The final exam (30%) will be comprehensive. Exam questions will be short answer/essay, computational, hand specimen identification, photo analysis, etc. in format. Failure to take any of
the exams at the scheduled time will result in a grade of zero (0), unless prior arrangements are made with the professor or a signed medical excuse from the attending physician is presented to the professor.

There will be seven (7) laboratory exercises and/or problem sets posted on Moodle which will be graded and count as part of your final grade (14% of total grade). Assignments must be completed in a timely manner to receive credit. Due dates will be posted on Moodle.

A term research paper is required (13% of total grade) consisting of library research. The text of the paper (not including the abstract, figures, and references) should be 10 to 12 pages in length (one and one-half spaces for text) and follow is the Geological Society of America Bulletin format. Schedule an appointment with the instructor to discuss paper your topic before February 22th. The term paper is due on the last day of class, Friday, May 10th, by 4:00 PM.

There is a field exercise as part of a weekend long (Friday-Sunday) field trip that is graded (13% of total grade). The field exercise is scheduled to start at 12 Noon on Friday, April 26th. We will Travel to the Billings area and we will be camping. We will return on the evening of April 28th. Your completed written field report is due on May 3rd by 4:00 PM. If you cannot participate in the field exercise/field trip for an acceptable reason (e.g., medical issue) you must discuss this with the instructor by February 11th. In lieu of your participation, a second term paper following the same guidelines from the previous paragraph on a second topic is required to successfully complete this course.

Individual letter grades and final letter grades will be based on the following percentages: 100-90% A, 89-80% B, 79-70% C, 69-60% D, 59% and below F. Plus and minus scores will be assigned to letter grades following university guidelines.

Exam Dates: First midterm exam (one hour) is on Friday, March 1st; second midterm exam (one hour) is on Friday, April 12th; the final exam (two hours) is on Monday, May 13th, at 10:10 AM.

Student Conduct Code: Please be familiar with the UM Student Conduct Code. It outlines the rights and responsibilities of students at The University of Montana. Being a student at UM presupposes a commitment to the principles and policies embodied in the code. The Student Conduct Code can be found on the Vice President for Student Affairs web site at http://life.umt.edu/vpsa/student_conduct.php.

Course Accommodations (DSS): Students with disabilities will receive reasonable accommodations in this course. To request course modifications, please contact me as soon as possible. I will work with Disability Services in the accommodation process. For more information, visit the Disability Services website at http://life.umt.edu/dss or call 406.243.2243 (Voice/Text).
