FOR RELEASE TUESDAY, OCTOBER 17

Dr. Clyde M. Senger, assistant professor of zoology at Montana State University, is one of 16 scientists selected this year to participate in the nationwide Visiting Biologists Program of the American Institute of Biological Sciences, according to Dr. Philip L. Wright, chairman of the MSU Zoology Department.

Dr. Senger has been assigned to speak at high schools requesting his services on topics including radiation biology and parasitology of big game animals.

The AIBS program is supported jointly by the National Science Foundation and the Atomic Energy Commission, Dr. Wright said. Its primary purpose is to enable high school students to meet leading biologists in the various fields of the life sciences, he said.

"The men and women selected for the program are ... distinguished scientists who have agreed to take time from their busy professional lives to help promote the cause of science," according to the AIBS.

The MSU zoologist is a native of Portland, Ore., and a graduate of Reed College. He holds an M. S. degree from Purdue University and a Ph. D. from Utah State University. He was a National Science Foundation Fellow in 1952-53 and a Public Health Service Fellow from 1956 to 58. He is currently on the staff of the NSF-AEC in-service Institute in Radiation Biology at MSU.
