FOR RELEASE WEDNESDAY, JANUARY 17

The National Science Foundation has awarded Montana State University a $12,200 continuation grant to support research directed by Dr. Clyde E. Noble of the Psychology Department, MSU officials announced.

Dr. Noble's studies of human trial-and-error learning, which began in 1953, are aimed at the development of a quantitative psychology of learning, he says. In his research he is exploring ways of applying mathematical measurements to the psychological processes of humans.

Principal assistants on the project will be James E. Fuchs, graduate student from Harlowton, and Don E. Lawrence, senior from Missoula.
