FOR IMMEDIATE RELEASE

Dr. Mark J. Jakobson, professor of physics at Montana State University, has been named a visiting lecturer in an experimental program administered by the University of Washington and supported by the National Science Foundation.

The program is regional in scope and involves inter-institutional cooperation in the fields of botany, chemistry, mathematics, physics and zoology, according to James S. Bethel, associate dean of the U of W Graduate School. As a feature of the program, selected faculty members of institutions in the Northwest serve as visiting lecturers at universities, college and junior colleges in the area that request their services.

Dr. Jakobson's lecture topics are "Problems Associated with the Construction and Operation of an Accelerator at an Institution of Limited Means" and "Energy Levels of the Be⁹ Nucleus."
