FOR IMMEDIATE RELEASE

Saturday, Oct. 16, will be the last chance for high school college-bound students to register for the November test session of the American College Testing Program (ACT), according to Leo Smith, Missoula, state coordinator.

The ACT battery will be given Saturday, Nov. 13, in 19 Montana cities and towns. In ________, the battery will be given at ________ (local town) (test center locations listed at end).

Smith pointed out that 10 Montana colleges and universities and two schools of nursing are among the 1050 institutions across the country which now require or recommend that their prospective students take the ACT battery.

The ACT battery, Smith explained, consists of an information section, the Student Profile, and one test in each of four subject areas—English, mathematics, social studies and natural science.

The four tests sample the student's ability to do the kinds of intellectual tasks college students typically perform. The Student Profile Section gives the student an opportunity to present himself as a special kind of person with unique aspirations and potentials, Smith explained.

Based upon results of the battery, ACT sends a record for each student to the colleges of his choice. These records are used in placement, admissions, academic and vocational counseling, selection of scholarship and loan recipients, and in planning other student programs. ACT also sends "feedback" reports to the student and his high school counselor.
