This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.
Biology and Management of Fishes

Biology 308  Fall 2005

Instructor: Lisa Eby, BRL 103, x 5984, leby@forestry.umt.edu
Office Hours: Tuesday and Thursday 10-12 or by appointment
T.A. Magnus McCaffery, magnus.mccaffery@umontana.edu
Office Hours: Monday 10-11 am; Wednesday 2-3 pm

Readings: See syllabus for schedule; the papers are on electronic (password:FISH05) and 2 hour reserve in Mansfield Library. Read them for examples, applications, generalizations, and principles. Questions based on lecture and reading material will appear on the midterms and final exam. Electronic Reserve is located at: http://eres.lib.umt.edu and can also be reached with a link in the Library catalog under "course reserves".

Objectives of class:
This class explores the biology of fishes, the most diverse group of vertebrates. The areas treated include morphological, physiological, and behavioral adaptations of fishes to their aquatic environments, as well as aspects of population, community, and applied ecology. We will be discussing both freshwater and marine fishes with an emphasis placed on freshwater fishes native to Montana.

Grading:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Midterm I</td>
<td>20%</td>
</tr>
<tr>
<td>Midterm II</td>
<td>20%</td>
</tr>
<tr>
<td>Final (Comprehensive)</td>
<td>20%</td>
</tr>
<tr>
<td>Project</td>
<td>10%</td>
</tr>
<tr>
<td>Lab quizzes, exercises, &amp; problem sets</td>
<td>30%</td>
</tr>
</tbody>
</table>

Projects:
Projects will be done by a group of four students working together. A statement of group membership and a proposed project is due by September 15th, a study plan is due by September 29th, and a list of papers that you are finding on the subject is due October 13th. If you are struggling with a topic, please come see me during office hours. I expect that I will meet with each group briefly a few times during the semester. The final product of the project will be a scientific paper due (following the formatting of Ecology and no longer than 10 pages) due on 11/22/05 by 5:00 pm and presented to the class during the last two weeks of class. The presentation will be a formal powerpoint presentation with a time limit of 15 minutes. In addition to my grade of the final product, each group member will be grading the other group member’s contribution to the project.

Class Policy:
Some of the field and lab projects will be done by teams of students so the resulting data are team or class property. Students are free to discuss results. However, all written material, calculations and graphs to be handed in must be your own work. Late penalties will be 5% of grade each day late.

The class final is Wednesday, December 14 from 10:10 to 12:10.
NO EARLY EXAMS WILL BE GIVEN!
<table>
<thead>
<tr>
<th>Date</th>
<th>Lecture Topic and Readings</th>
</tr>
</thead>
</table>
| 8/30 – 9/1 | Diversity of aquatic environments and fishes & Locomotion  
**Readings:** Moyle and Cech Chapter 1 and Chapter 2 section 2.8                                                                                                  |
| 9/6 – 9/8  | Respiration and Circulation  
**Readings:** Moyle and Cech Chapters 3 and 4 p. 37-75                                                                                                           |
| 9/13 – 9/15| Buoyancy and Thermal regulation  
**Readings:** Moyle and Cech Chapter 5  
| 9/20 – 9/22| Osmotic regulation and energetics  
**Readings:** Moyle and Cech Chapter 6 and Chapter 7                                                                                                         |
| 9/27 – 9/29| Energetics and growth  
**Readings:** Moyle and Cech Chapter 8                                                                                                                        |
| 10/4 – 10/6| Sensory systems and Exam I (10/6)  
**Readings:**  
Moyle and Cech Chapter 10  
| 10/11 – 10/13| Behavior  
**Readings:** Moyle and Cech Chapter 11  
| 10/18 – 10/20| Species interactions  
**Readings:** Moyle and Cech Chapter 9  
| 10/25 – 10/27| Reproduction and Life history  
**Readings:** Moyle and Cech Chapter 9  
| 11/1 – 11/3| Population Ecology  
| 11/8 – 11/10| Population Ecology                                                                                                                                                                                                       |
11/15 – 11/17  Populations to communities and **Exam II (11/16)**

11/22 – 11/24  Community Ecology and Thanksgiving
*Helfman et al. Diversity of Fishes. Chapter 25, Communities, Ecosystems, and the Functional Role of Fishes*

11/29 – 12/1  Presentations and Zoogeography of Fishes

12/6 – 12/8  Presentations Fish in an Ecosystem Context
