Course Location and Time
Interdisciplinary Science 110
Tuesday and Thursday 9:40 – 11:00 AM

Instructor Information
Instructor: Erin Yosai, M.S.
Email: erin.yosai@umontana.edu
Office: Skaggs Building 365
Office hours: Thursdays 11:10 – 1:00, Fridays at 10:30-11:30 AM; and by email appointment

Textbook

Course Objectives
Understanding the development of children and adolescents is important for parents, teachers, counselors and others who work in various professions. This course is designed to acquaint you with research findings and theories of development from conception through adolescence. In addition, the course will relate research and theory to practical applications. As a result of this course, you should be able to:

1. Remember basic research findings and theories of development
2. Recognize normal development in various aspects of development
3. Explain scientific methods used in the study of children and adolescents
4. Apply research findings to real-life situations
5. Use critical thinking to interpret developmental research and theories
6. Analyze current issues related to children and adolescents based on research

Course Requirements
Although the class is conducted in a lecture format, class participation is welcome and important to active learning. Students are expected to arrive on time and remain for the entire class period since it is disruptive to the class to arrive late or leave early. The syllabus, class materials, course notices, and grades will be posted on the Moodle Course Management System with communication through your university e-mail.

Course Guidelines and Policies:
Drop/Add
February 13th is the last day to drop classes without consent. After that date, requests to drop the course will require legitimate justification.
**Academic Honesty**
All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or disciplinary sanction by the University. All students need to be familiar with the [Student Conduct Code](#).

**Disability Modifications**
The University of Montana assures equal access to instruction through collaboration between students with disabilities, instructors, and [Disability Services for Students](#). If you think you may have a disability adversely affecting your academic performance, and you have not already registered with Disability Services, please contact Disability Services in Lommasson Center 154 or call 406.243.2243. I will work with you and Disability Services to provide an appropriate modification.

**Grading**
There are four exams based upon class material and textbook assignments. Bring a scantron form #95142 and a #2 pencil to each exam. Students may review their exams or assignments within one week of the posting of the score. An additional 10 points may be earned through extra points.

Course grades will be determined by point totals, not percentages. Total possible points in the course are as follows: Exam 1 (50 points); Exam 2 (50 points); Exam 3 (50 points); and the Final Exam (50 points). The lowest of the four exam grades will be dropped so final grades will include a maximum of three exam scores (150 points).

Points for final grades:  
135-160—A  
120-134—B  
105-119—C  
90-104—D  
below 90—F

**Extra Points**
Students will have the opportunity to earn up to 10 extra points throughout the duration of the semester. Periodically throughout the semester I will offer in-class participation points worth 2 points each. Throughout the semester, I have selected 5 days at random to take attendance and give participation points for being present in class, participating in lectures or discussion, etc. Although I will not announce “Participation Days” before class, I will make sure to let you know that you will be receiving points for being in attendance that day.
