6 Wrap up & Review
Tues. 10 FINAL EXAM 3:20 - 5:20

Food and culture is an examination of the ways culture shapes the satisfaction of a biological need - eating. Food production, preparation, sustainable choices, customs, taste, beverages, spices, and diets will all be covered. Cannibals to Vegetarians, America to Asia, we will again see the strong hand of culture.

All students must practice academic honesty. Academic misconduct is subject to an academic penalty by the course instructor and/or a disciplinary sanction by The University. All students need to be familiar with the Student Conduct Code which is available for review online: www.umt.edu/SA/VPSA/index.cfm/page/2585

Course Objectives

1. Students will gain an understanding of the diversity of human culture and how culture and food are linked.

2. Students will learn about how our earliest ancestors got their food and then we will progress to the present.

3. Students will be immersed in the subject matter and learn how to make personal food choices that will help them for the rest of their lives.

4. Students will learn important terms (like GMO’S) and concepts (like Hunter/Gatherer vs. Food producers) and better understand Organic, Local, Large scale food production and how it affects them and the entire globe.

This is a lecture based class and attendance is necessary to gain a greater grasp of our relationship with food and earn a good grade. I will try to make this learning process fun while still educational and timely.
SUSTAINABILITY ASSIGNMENT 2 - 4 PAGES 20 POINTS POSSIBLE
Due April 29th, 2016 by 5:00 pm. Hand in before class or slip under my door (SS#215).

FOOD AND CULTURE ANTH 133 SPRING 2016 LIST YOUR SOURCES

This is a face to face interview. Find someone involved in the food industry (possible people on back) for your paper and be polite !!!!

FIRST - Define sustainability - Use any source that you trust.
Some sample questions include but are not limited to the following. Modify questions as needed and make up your own.
1. Is the food system you are part of sustainable? Is any of the food local/organic?
2. What is your (their) role in the food system?
3. Do you have control over choices/options or not?
4. Do you/would you happily eat the food that you handle?
5. Are your personal food choices different compared to your work food choices?
6. Would you be willing to change?
7. How does money factor into making food choices?
8. What do you see as a positive in this food system?
9. What do you see as a negative in the food system?
10. What are unique challenges you face at work? (Allergies, Age (young babies - the elderly), Different cultures, Price, Local/Organic vs. Conventional, Corporate decisions, Number of people served, etc.)

Questions for you to answer.
1. How much of a difference can one person make? How much of a difference can a family, business, university, city, state, country, and/or world make?
2. Are there Global impacts of your local choices? Does eating local/organic (Montana beef vs. Canadian) make a difference? Can you taste the difference? Can you feel the difference in your pocket? Is it worth it?
3. What are the hidden costs of doing nothing? (Environmental costs, personal health, financial costs, etc.)
4. Is your personal path sustainable according to how you defined sustainable? Defend doing nothing. (play the Devil's advocate)
Possible people to interview. Be Polite and ask permission, if they are busy arrange a
time to meet or talk later. If they say no then find someone else. This can be done over
the next 4 weeks, especially interesting would be interviews with people from different
cultures or generations. This should be fun and educational.

People to interview (this is a very incomplete list.)

Chefs and any kitchen workers at The University of Montana.
Cashiers, Servers, Dishwashers, Composters, Recyclers, People who order the food.
