Resource Guide for Health and Fitness Program Development (78 pp.)

Director: Brian J. Sharkely, Ph.D.

The need for a resource guide of health and fitness materials exists for optimum development and implementation of employee health management programs. By request of the United States Forest Service (USFS) Equipment Development Center of Missoula, Montana, a resource guide was developed to help units of the USFS, as well as other organizations and individuals, implement health and fitness programs.

The scope of the health and fitness resource guide includes: health and wellness; nutrition; weight control; exercise and fitness; stress management; blood pressure control; and smoking cessation. The types of resource materials include pamphlets, booklets, books, films and slide-tape presentations. Specific publication lists, resource catalogs and resource organizations are also listed.

Letters of request for materials to be submitted for review and possible inclusion in the resource guide were sent to government health and fitness agencies; state, regional and national organizations; corporations with employee health and fitness programs; and resource individuals. Resource materials were reviewed, analyzed and selected according to technical soundness, cost effectiveness and applicability and accessibility of the resources. The information given for each resource includes: the title; date; publication number, if available; the author or organization involved in writing the materials; where to write for the material; type of source; page numbers; approximate costs; for whom the material is intended; contents.
ACKNOWLEDGMENTS

I would like to express my sincere appreciation to Stephen Ballard and my parents for their continual encouragement, love, and prayers throughout the writing of this paper. I would also like to thank Dr. Brian Sharkey for making this project available to me and for giving me guidance along the way, and Dr. Kathleen Miller for her special contributions, not only with this project, but throughout my graduate study.

PART A

GENERAL CONSIDERATIONS CONCERNING
THE DEVELOPMENT OF THE
HEALTH AND FITNESS RESOURCE GUIDE
CHAPTER 1

INTRODUCTION

Organizations are becoming more and more aware of the health benefits associated with physical fitness. Corporations are offering health and fitness programs for their employees in hopes of improving health, reducing absenteeism, controlling the cost of health care and increasing productivity. Employee health management programs stress the concept of wellness by utilizing health risk analysis techniques and counseling in areas of stress management, nutrition and diet, weight control and smoking cessation. A special emphasis is placed on the development of cardiovascular fitness to reduce the likelihood of cardiac disease.

Numerous educational materials and guides for health and fitness program development exist, but selecting and locating these sources are frequently difficult. Often in the development of a health management program, an organization finds that it needs additional information and teaching materials for a more effective program but does not have a means of obtaining this essential information.

With the assistance of Dr. Brian J. Sharkey of the University of Montana, the United States Forest Service Equipment Development Center of Missoula, Montana devised an Employee Health Program (1) which emphasizes the prevention of illness, an individual's responsibility for health and the cost effectiveness to the organization. The program maintains the need for a health risk profile, blood chemistry analysis
and periodic medical examinations. The Employee Health Program stresses the need for the development of health programs which include printed and audiovisual aids in the areas of stress reduction, nutrition, weight control and exercise. Although the Employee Health Program describes how to evaluate and implement health and fitness programs, it does not deal specifically with the resource material needed to best meet the goals of the program. As an aid to individual Forest Service units attempting to implement the program, the United States Forest Service wished to develop an informational resource guide of exceptional health and fitness program materials.

It was because of the great need for this type of resource guide for the development and implementation of health and fitness programs that this researcher intended to compile a list of sources to be utilized by the United States Forest Service as well as other organizations and individuals. Having access to this resource information will allow organizations to devise a well-rounded health and fitness program to achieve the highest possible level of employee wellness.

**Statement of the Problem**

The purpose of this study was to devise a resource guide containing material to be utilized in the development and implementation of employee health and fitness programs.
Subproblems

1. A health and fitness resource survey was conducted.

2. Health and fitness resource materials were analyzed and selected for inclusion in a resource guide.

Delimitations

The scope of this study included the following areas:

a. health and wellness
b. nutrition
c. weight control
d. exercise and fitness
e. stress management
f. blood pressure control
g. smoking cessation

Limitations

1. The review of health and fitness program resource materials was limited to the number of contact sources the researcher was able to obtain.

2. Not all individuals or organizations responded to the request to review their resource materials.

3. The purchase of resource materials was within the financial limitations set by the United States Forest Service Equipment Development Center of Missoula, Montana.
Assumptions

1. There is a need for a resource guide of health and fitness program materials.

2. Organizations will continue to offer health and fitness programs for their employees.

3. With increased knowledge and scientific evidence of the benefits of exercise and healthy lifestyles, a greater number of organizations will be interested in developing employee health and fitness programs.

4. An increase in the number of organizations beginning employee health and fitness programs will create an increased need for a resource guide.
CHAPTER 2

METHODS AND PROCEDURES

Resource Survey

The scope of the health and fitness resource survey included health and wellness; nutrition; weight control; exercise and fitness; stress management; blood pressure control; and smoking cessation. The health areas of alcohol and drug abuse were not included in the resource guide because excellent community referral organizations such as Alcoholics Anonymous and other drug dependency agencies are generally available for assistance. The types of resources included pamphlets, booklets, books, films and slide-tape presentations.

The initial search for health and fitness resource materials was conducted at the United States Forest Service Equipment Development Center in Missoula, Montana. Government publications, United States Forest Service health and fitness guides, brochures from national and regional health conferences and conventions, as well as journals, books, pamphlets and brochures were reviewed for leads to government health and fitness agencies; state, regional and national organizations; corporations with employee health and fitness programs; and reference individuals who may be able to aid in the development of the resource guide.

University of Montana experts in specific health-related areas
were asked for suggestions of resource possibilities. Physical education book lists and catalogs, as well as health and fitness newsletters were also reviewed for resource materials.

**Inquiry Process**

Letters were sent to prospective organizations, government agencies, corporations and resource individuals informing them of the development of the health and fitness resource guide and the health areas and types of resources contained in the guide. Criteria for evaluation and selection of materials was discussed as including technical soundness, cost effectiveness and applicability and accessibility of the resources to users in remote locations as is the case with certain United States Forest Service units. The inquiry letter explained that the University of Montana's Human Performance Laboratory had been asked by the United States Forest Service (Equipment Development Center of Missoula, Montana) to research and assemble the guide and that its use was intended to help units of the Forest Service implement health and fitness programs suitable for their size and location. It was also noted that the guide would be available to the public, as is the case with all government publications. Requests were made for health and fitness materials to be submitted for review and possible inclusion in the resource guide.
Review Process

The first review consisted of a broad overview of the materials with preliminary decisions of acceptability made according to the appropriateness and validity of the contents. Information as to contents, cost and date of publication were listed and attached to each resource.

In the second, in-depth review the materials were placed into sub-categories according to the type of information presented. Materials were further analyzed for technical soundness, cost effectiveness and availability.

As materials were reviewed, additional health and fitness resources, organizations and individuals were discovered. Inquiry letters were thus continuously sent out as materials came in and were reviewed.

Resource Guide Organization and Development

The health and fitness resources were organized first by broad topic headings and then more specifically by their purpose in the program. Each topic includes the sub-categories of program resources, additional resources, publication lists and resource catalogs, and resource organizations. Additional sub-categories were added when necessary.

The materials were not ranked from the first to last resource choice but were instead listed by a combination of the form of material and comprehensiveness of its contents. Pamphlets and brochures were
usually listed first. The variability in the type and amount of contents often made it impossible to rank the material or comment on its specific use. For this reason, all materials listed were evaluated as being helpful in the development of a health and fitness program. The subcategory materials under the heading, "Additional Resources," were considered helpful but because of cost or specific content appropriateness, were not included with the other resources.

The specific information in the resource guide includes the title; date; publication number, if available; the author or organization involved in writing the material; and where to write for the resource material. Also covered are the type of resource; page numbers; appropriate cost; for whom the material is intended; and a brief summary of the resource contents.

The date of some booklets and small pamphlets do not appear in the resource guide because the date was not printed. These materials were included if the contents were applicable. The organization or publishing company of whom to write for the resource is indented immediately under the title, date, publication number and author. All resource addresses are alphabetically listed in Appendix B.

Because the prices of resource materials change periodically, the resources were placed into four cost categories rather than listing specific prices. The ranges of cost are abbreviated and designated as:

(I) no cost; (II) low cost: $0.20-$3.00; (III) cost: $3.00-$10.00;
(IV) high cost: over $10.00. Films, of course, were over $10.00 and thus rated as high cost. The preview, rental, and purchase prices of the listed films are comparable to other film prices. Most film companies failed to respond to the request for review or requested a film preview fee. For this reason, along with the fact that most film descriptions contained inadequate content material, only three films were listed.

Each resource is designated as being appropriate for the program director, employee or both with abbreviations of PD, E and PD/E respectively. The resources are not restricted entirely by the specified label, but are given as guidelines for program development.

Resource contents are presented by separating the main themes or topics by semicolons and related information by commas. Specific comments are only given to clarify reasons for placing some resources under the "Additional Resources" heading.
The health and fitness resource survey resulted in a 66.24% return. Inquiry letters were sent to 234 organizations, government agencies, corporations, publishing companies and individuals. One hundred fifty-five responded by sending resource materials and/or letters referencing other organizations and resources for review while 79 did not respond. Each organization was only counted once although many were written to more than one time when additional resources were discovered.

Several contributing factors may have lowered the percent return:

1. Many of the initial inquiry letters were sent to several resource individuals and organizations who it was thought may not respond. This was done to try and receive information and leads from a wide variety of places, organizations and individuals.

2. Several State Health Departments were written to in hopes of receiving examples of free information available to in-state and out-of-state residents. Some responded by saying they could not send information to other states because of financial reasons.

3. The organizations were responsible for paying the postage on
materials they sent for review.

4. Many corporations may not have responded because they used personal company publications.

5. Some organizations may not have had appropriate materials to send or did not want to take the time to respond.

6. Some letters were returned because of organization name or address changes and could not be forwarded.

The best response came from the government agencies who were also found to have many of the best and least expensive materials. These resources are generally well researched, periodically updated and comprehensive.
CHAPTER 4

SUMMARY AND RECOMMENDATIONS

Summary

A resource guide which contains materials to be utilized in the development and implementation of employee health and fitness programs was devised by request of the United States Forest Service Development Center of Missoula, Montana. The scope of the health and fitness resource guide included: health and wellness; nutrition; weight control; exercise and fitness; stress management; blood pressure control; and smoking cessation. The types of materials consisted of pamphlets, booklets, books, films and slide-tape presentations. Specific publication lists, resource catalogs and resource organizations were also listed.

Letters of inquiry were sent to government health and fitness agencies; state, regional and national organizations; corporations with employee health and fitness programs; and individuals known as experts in the areas of health and fitness. Requests were made for materials to be submitted for review and possible inclusion in the resource guide.

Resource materials were reviewed, analyzed and selected according to technical soundness, cost effectiveness and applicability and accessibility of the resources. The information given for each
resource listed in the guide includes: the title; date; publication number, if available; the author or organization involved in writing the material; where to write for the material; type of source; page numbers; approximate cost; for whom the material is intended; contents.

**Recommendations**

1. A condensed version of the information in this resource guide is being developed by the United States Forest Service as an aid to units of the Forest Service in the development and implementation of employee health management programs. For further information, contact the United States Forest Service, Equipment Development Center, Fort Missoula, Bldg. 1, Missoula, Montana 59801.

2. Corporations and other organizations can benefit by using this resource guide to develop new employee health and fitness programs or improve existing programs.

3. The resource guide can be utilized in the school setting by instructors and students in the Health Promotion field as a guide to collateral materials for health education unit development.

4. Continued survey and review of health and fitness resource materials are necessary for a complete, comprehensive and up-to-date resource guide.

5. As the health and fitness resource guide becomes available, more organizations and individuals will become aware of the guide and send their materials to be reviewed.

General Nutrition Program Resources

*Nutrition and Your Health*
U.S. Department of Agriculture, U.S. Department of Health and Human Services
Superintendent of Documents, U.S. Government Printing Office

19 page pamphlet  I  E

dietary guidelines for Americans: variety of foods; body weight; fat, saturated fat, cholesterol; starch and fiber; sugar; sodium; alcohol

(A Scriptographic Booklet)
Channing L. Bete Co., Inc.

15 page booklet  II  E

general nutrition information: six basic nutrients, recommended daily allowances for infant, male, female; balanced diet: the basic four food groups

Center for Consumer Health Education

7 page pamphlet  I  E

nutrition basics: well-balanced diet, foods to avoid: saturated fat and cholesterol, sodium, sugar, saccharine; special nutritional considerations of babies, children, pregnant or breast feeding women, the elderly, people with special conditions: diabetes, high blood pressure

*Good Health: Exercise/Nutrition*
Illinois State Council on Nutrition, Governor's Council on Health and Fitness

7 page pamphlet  I  E

combination of sensible diet and exercise programs for fitness: basic four food groups, nutrients, approximation of calories needed per body weight; exercise tips; calorie value of various activities; minimum requirements for improving cardiovascular fitness and weight control
.Nutrition: Food at Work For You
Prudential Insurance Company of America

16 page booklet II E

basic four food groups; tips on meal planning; nutrients: what they do, where found; mineral and vitamins; water; food energy; maintaining desirable weight

Nutrition Information and Resource Center, Pennsylvania State University

23 page fact sheets I E

examples of nutrition topics: sodium, fiber, sugar, diet and heart disease, fad diet frauds, weight control, fast foods, convenience foods, food forms, nutrition during pregnancy, vegetarianism; nutrition resource lists: pamphlets, books, low fat and low sodium cookbooks

National Dairy Council

6 page booklet I E

energy nutrients and their effects on health; sources of nutrients; food groups; recommended dietary allowances; nutrition labeling

.Diet and Coronary Disease (1978)
American Heart Association

6 page booklet I PD

factors associated with coronary heart disease; general dietary recommendations: caloric intake, reduced saturated fats and cholesterol, carbohydrate, sodium, other dietary factors

.Your Diet and Your Heart (1982)
(A Scriptographic Booklet)
Channing L. Bete Co., Inc.

15 page booklet II E
simplified nutrition factors and heart disease: 
atherosclerosis, obesity, reduction in cholesterol, fats; basic four food groups; total health strategy: periodic medical check-up, healthy eating habits, exercise, avoid stress

National Dairy Council

2 page fact sheet I E

discussion of function of vitamins; recommended dietary allowances; supplements generally not needed; naturally occurring vitamins, synthetic and "natural" vitamin supplements; large chart of fat-soluble and water-soluble vitamins and their recommended dietary allowances, significant sources, major physiological functions, deficiency symptoms, overconsumption functions

.Vitamins: An Alphabet Soup for Good Health 
Abbott Laboratories

6 page pamphlet I E

discussion and chart of vitamin functions, deficiency conditions, food sources; importance of balanced diet

Comprehensive Nutrition Program Resources

.Weighing the Choices: Positive Approaches to Nutrition 
Spectrum Films

20 minute film (16 mm or 3/4" video-cassette) IV E

positive food choices for healthier living; short-term payoff of feeling better and eventual reduced risk of disease and disability; weight control: food choices rather than dieting; lifetime eating habits

comments: endorsed by the American Occupational Medical Association and by the American Association of Fitness Directors in Business and Industry

Best Foods Nutrition Information Service  
22 page booklet  II (single Copy: I)  E  

- facts about fats, fat composition, cholesterol, fats in foods, package labels, food choices

**The Medicine Called Nutrition** (1979)  
Best Foods Nutrition Information Service  
67 page booklet  II (single copy: I)  PD  

- comprehensive overview of nutrition for better health: reports by experts in the field; guidelines for nutrition counseling: protein, fats, carbohydrates; choosing foods for health; nutrition vs. disease, hypertension, atherosclerosis, obesity, cancer, diabetes; lipids, proteins and fat metabolism

Candy Cummings and Vicki Newman  
Prentice-Hall, Inc.  
170 page paperback  III  E  

- informational nutrition facts and recommendations: food intake health questionnaire; types of fats; fiber; sugar; cholesterol; salt: sodium content in various foods, spices as alternatives; caffeine: content in selected foods, beverages and drugs; weight control; several recipes with minimal sugar, salt and fat comments: easy reading with humor and cartoon illustrations

**A Change for Heart; Your Family and the Food You Eat** (1978)  
James M. Ferguson, M.D. and C. Barr Taylor  
Bull Publishing Company  
183 page paperback  III  E  

- self-instructed guide for eating behavior modification; family involvement in planning for change; eating behavior charts, food check lists, graphs; glossary of medical and dietary words; references and recommended readings
Additional Nutrition Program Resources

American Medical Association

9 page pamphlet  II  E

energy and nutrient requirements for infants, children, adolescent, adults, pregnancy, aging adults; daily food guide: minimum servings of the four food groups for each age group; sources of additional information

Society for Nutrition Education

18 page booklet  II  E

nutritional needs in later years, weight control, shopping tips, protein foods, special nutrition problems, realities of "health" foods and vitamin/mineral supplementation; nutrition chart: major nutrients, their sources, functions and recommended daily serving; resource organizations, programs, books and publications

Nutrition Labeling: Food Selection Hints for Fat-Controlled Meals (1978)  
American Heart Association

9 page pamphlet  I  E

how to read food labels, guidelines for shopping for fat-controlled meals

.Read the Label, Set a Better Table (1976)

DHEW publication No. (FDA) 76-2049
U.S. Department of Health, Education and Welfare Food and Drug Administration

7 page pamphlet  I  E

reading a nutrition label; key nutrients: functions, sources; using the labels to serve a better meal and to save money; U.S. recommended daily allowances

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.
.The Sodium Content of Your Food (1981)
U.S. Department of Agriculture
Superintendent of Documents, U.S. Government Printing Office

43 page booklet I PD/E

overview discussion of sodium content in food; chart of sodium content in foods and beverages, selected non-prescription drugs

.Sodium in Food, Medicine and Water
Water Quality Association

56 page pamphlet I PD/E

chart of sodium content in foods and beverages, common medicines, and in the water of U.S. cities; lists the products portion size, weight in grams, sodium content in milligrams

.Facts About Potassium (1977)
American Heart Association

9 page booklet I PD/E

potassium facts: what it is, normal diet usually sufficient, increased need due to some heart disease medications, selected references; potassium and sodium content of selected foods

Brent O. Hafen
Allyn and Bacon, Inc.

250 page paperback III PD

reference text: comprehensive overview of the basic nutrients, vitamins and minerals: functions, sources; digestion, absorption, metabolism; contemporary issues in nutrition: cereals, breads, flour: whole wheat vs. white bread; sugar; fiber; caffeinated beverages; vegetarianism; nutrition and disease; nutrition, learning and behavior; food additives; nutrition labeling; overweight and obesity: myths and facts; obesity and health; weight control fads and fallacies; nutritive values of the edible parts of foods

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.
Realities of Nutrition (1976)
Donald M. Deutsch
Bull Publishing Company

405 page paperback IV PD

reference text: basic principles of energy, exercise and fat; principles of weight control; food content and labeling; carbohydrates, proteins, fats; vitamins, minerals; application of nutrition principles; modern technology and food: processed vs. "natural" foods, additives, pesticides

WEIGHT CONTROL

Weight Control Program Resources

*The Healthy Approach to Slimming* (1979)
American Medical Association

21 page pamphlet II E

weight conscious vs. health conscious approaches to weight control; desirable weight; short term weight changes; deceptive gain and loss; calories as fuel; planning a diet: basic four food groups, sample diets

*You and Your Weight* (1982)
(A Scriptographic Booklet)
Channing L. Bete Co., Inc.

15 page booklet II E

basic weight control; why the problems; health problems; desirable weights; controlling the diet: four food groups; exercise, getting started; balancing diet and exercise; determining calorie intake and expenditure; other weight loss plans: crash diets, mechanical devices, drugs

*Exercise and Weight Loss* (1980)
President's Council on Physical Fitness and Sports
Superintendent of Documents, U.S. Government Printing Office

8 page pamphlet I E

weight control fallacies: energy expenditure in exercise, appetite and exercise; advantages of exercise; importance of diet; exercise and modern living: regular exercise schedule, supplementary physical exercise, stepped-up ordinary exercise, physical activity in the day's occupation

*How You Can Control Your Weight* (1979)
(Stay Well Series)
Metropolitan Life Insurance Company

6 page pamphlet I E
desirable weight chart: varies according to amount
fat weight and muscle mass; healthy eating: lifetime
habit; dieting tips; effects of exercise; behavior
modification methods: food diary

.Overweight and Your Health: The Vital Connection! (1978)
Weight Watchers International, Inc.

14 page booklet II E

health risks of being overweight: causes, related health
problems, long term affects; respiratory problems, cardio­
vascular diseases, diabetes, gynecologic problems, gall­
bladder disease, osteoarthritis, varicose veins, skin
conditions, surgical risks, shortened life expectancy;
health hazards from improper dieting; choosing a sensible
diet

.Life Plan for Weight Control (1980)
Center for Consumer Health Education

7 page pamphlet I E

diet myths; two methods of simple weight assessment;
mirror test, pinch test; getting started; sensible
food substitutions; question checklist for determining
weight control program

.Personalized Weight Control (1981)
Betty Taif
National Dairy Council

15 page pamphlet I E

inventory of present food habits; quality vs. quantity of
calories: carbohydrates, proteins fats; guide to good
eating: basic four food groups; tips for preparing foods,
packing lunches, snacks, restaurant earing; exercise:
physical activity throughout the day

.What to Know About a Weight Control Diet Before You Eat
One (1982)
National Dairy Council

8 page pamphlet I E
general information on the basics of a good weight control diet: basic four food groups, nutrients cutting calorie input, increasing energy output through exercise; basic behavior modification principles: eating habits; tips for the beginning a weight control diet

*Weight Reduction* (1975)
American Heart Association

12 page pamphlet I E

daily food patterns: basic four food groups; guide for selecting and preparing food, serving sizes, approximate calorie amounts

*Proper and Improper Weight Loss Programs* (position paper)
American College of Sports Medicine

9 page paper I PD

statements and recommendations for weight loss based on current research: severely restricted caloric intake and the loss of water, electrolytes, minerals, glycogen stores and minimal fat loss; large muscle dynamic exercise and higher percentage of fat loss; need for nutritionally sound diet, lifetime commitment to proper eating habits and regular physical activity

*Thin and Fit: Your Personal Lifestyle* (1982)
Dorothy E. Dusek, Ph.D.
Wadsworth Publishing Company

278 page paperback III PD/E

comprehensive discussion of weight control as total lifestyle involvement: nutrition and eating patterns, physical activity, stress management, relaxation and positive relationships; readiness profile for estimating success of weight reduction program; setting goals, methods of determining ideal weight; role of calories in weight reduction, behavior modification techniques; stress management; analyzing personal diet, planning a new healthy diet; exercise profile: importance of strength, flexibility and endurance as exercise components; developing a program; references, suggested readings
Weight Control Behavior Modification Manuals

.Take It Off and Keep It Off: A Behavioral Program for Weight Loss and Healthy Living (1977)
D. Balfour Jeffrey and Roger C. Katz
Prentice-Hall, Inc.

354 page paperback III PD/E

causes of becoming overweight; eating, exercise, psychological habits; realistic goal setting, rewarding success; nutritional facts, diet guidelines; role of exercise in weight control; managing food: buying, preparing, servings, eating, snacking; emotional aspect of eating; weight loss maintenance techniques; improving child's eating habits; eating behavior and exercise charts and records

.Learning to Eat: Behavioral Modification for Weight Control (1975)
(student and leader manuals)
James M. Ferguson, M.D.
Bull Publishing Company

170 page manuals (approx.) III PD/E

leaders manual: outline lesson plans, charts, graphs used in programs; student manual: major proportion behavioral charts and graphs; ten week weight control program, one lesson per week involving class lecture/discussion, daily homework: monitoring and charting eating behaviors and activity; weight habit awareness; eliminating eating cues; changing eating behaviors; analyzing behavior and progress, problem solving techniques; energy expenditure: increase normal activities, enjoyable exercise; snacks and holiday control

.Habits, Not Diets: The Real Way to Weight Control (1976)
James M. Ferguson, M.D.
Bull Publishing Company

252 page paperback III E
self-instructed behavioral weight loss course: same contents as Learning to Eat (above); large portion of text is charts and graphs for self-monitoring of eating habits

Richard B. Stuart and Barbara Davis
Research Press
163 page paperback III E

self-instructed guide to behavioral weight control: discussion of obesity; how to succeed in a weight control program, managing the behaviors prior to eating: eating-related feelings, availability of desirable and problem foods; retraining ones urge to eat; managing the act of of eating: pre-planning and pre-recording what is eaten; managing the consequences of successful eating behavior; ideas in planning what to eat; choosing a personalized food plan guide

.Slim Yourself (1979)
Morton L. Arkaya, Ph.D.
Moss William Publishing Co., Inc.
174 page paperback III PD/E

health and social/psychological problems and causes of obesity; behavior modification and weight control: specifying problem behaviors, observing and recording behavior, analyzing records, applying behavioral control strategies; self control of eating: tips on shopping, storing, packaging and cooking food; mood eating; food and nutrition myths; exercise and weight control: elements of aerobic exercise; energy expenditure; applying self control principles; other approaches to weight control; caloric values of common foods; two week supply (57 page) of personal data charts and graphs

.Taking Charge of Your Weight and Well-Being (1978)
Joyce D. Nash, Ph.D. and Linda H. Ormiston, Ph.D.
behavioral approach to weight control: identifying and managing underlying problems; comprehensive workbook manual: approximately 50% pages of charts and graphs for personalized data; used as individually self-instructed manual or used in groups; leaders guide available; sample topics: choosing what to eat, coping with emotions, eating for a healthy heart, self-reward, managing self-image and special situations

Caloric and Nutritive Food Value Resources

- **The Fat Counter Guide** (1978)
  Bull Publishing Company
  
  131 page paperback   II   E

  caloric values of common foods: data on protein (% of U.S. RDA), carbohydrate, calories, fat calories, total calories; emphasis on quantity of fats in foods: information sections on calories, too much protein in American diet, carbohydrate as main energy source; all foods in one section: alphabetical

- **Calories and Weight: The USDA Pocket Guide** (1981)
  (Agriculture Information Bulletin No. 364)
  Science and Education Administration, U.S. Department of Agriculture
  Superintendent of Documents, U.S. Government Printing Office
  
  80 page pocket booklet   II   E

  total caloric value of common foods, listed by food types: alphabetical; index to general table headings, small section of basic nutritional information: choosing foods for weight control, four food groups, reducing caloric intake

- **Your Calorie Counter** (1980)
  National Dairy Council

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.
caloric values and generalized vitamin/mineral data on basic foods; listed by food groups including popular main dishes, desserts and snacks, beverages; two day personal calorie data chart; male/female table of desirable weights

_Nutritive Value of American Foods in Common Units_ (1975)  
(Agricultural Handbook No. 456)  
Agricultural Research Services, U.S. Department of Agriculture  
Superintendent of Documents, U.S. Government Printing Office

290 page paperback III PD/E

comprehensive nutritive information of American Foods; one list, alphabetical; information includes description of the food, approximate measure or unit, several sizes, proportions and types of preparations, corresponding weight in grams

Table 1: percent water, calories, protein, fat, total saturated and unsaturated fat, carbohydrate, calcium, phosphorus, iron, potassium, vitamin A, thiamin, riboflavin, niacin, ascorbic acid
Table 2: fatty acid values: total fat, total saturated fatty acids, oleic and linoleic unsaturated fatty acids, principal sources of fat

_Nutritive Value of Foods_ (1981)  
(Home and Garden Bulletin No. 72)  
Science and Education Administration, U.S. Department of Agriculture  
Superintendent of Documents, U.S. Government Printing Office

34 page booklet II PD/E

condensed version of _Nutritive Value of American Foods in Common Units_ (above); items listed alphabetically by food groups

EXERCISE AND FITNESS

United States Forest Service Resources

.Fitness and Work Capacity (1977)
(FS-315) (Stock No. 001-001-00426-0)
Brian J. Sharkey, Ph.D.
U.S. Department of Agriculture/Forest Service
Superintendent of Documents, U.S. Government
Printing Office

81 page booklet III PD

aerobic and muscular fitness related to work capacity
and health; intensity, duration, frequency of exercise;
sample walk-jog programs; muscular strength prescriptions;
special considerations of training; facilities, running
technique, shoes and clothing, environmental factors: heat,
alititude, air pollution, exercise problems; weight control
tips; fitness exercises: weight control tips; fitness
exercises: warm-up, weight lifting, calisthenics,
isokinetic exercises

.Measuring Your Physical Fitness
(Title No. 007939)
U.S. Department of Agriculture/Forest Service National
Audiovisual Center

80-slide program; 16 page booklet IV PD/E

step test: explanation, procedures; equipment; test
background and rationale; scoring methods; 1½-mile run
alternate test; medical considerations of test administra-
tion

.Fitness Trail (1977)
Brian J. Sharley, Ph.D.
U.S. Department of Agriculture/Forest Service
United States Forest Service, Missoua, Montana

29 page booklet II PD

the use of a fitness trail as a testing and training
facility; how to build, sign and use the trail

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.
Exercise and Fitness Program Resources

*An Introduction to Physical Fitness* (1978)
DHEW Publication No. (OS) 79-50068
President's Council on Physical Fitness and Sports
Superintendent of Documents, U.S. Government Printing Office

25 page pamphlet

Self-testing; graded exercise programs: warm-up exercises, conditioning exercises, cardiovascular activities; exercise programs are designed primarily for beginners.

*"E* is for Exercise* (1977)
American Heart Association

6 page pamphlet

Effects of exercise; types of exercises: isotonic, isometric, dynamic; proper exercise procedure: warm-up, conditioning, warm-down; lifetime commitment.

*Finding Your Own Way*
Center for Consumer Health Education

9 page pamphlet

Importance of staying physically fit; basic guidelines on what exercises are best and how to exercise.

*Physical Fitness and Your Heart* (1976)
(A Scriptographic Booklet)
Channing L. Bete Co., Inc.

15 page booklet

Basic, generalized description of effects of exercise on the heart; beginning an exercise program, best types of exercise; basic office exercises; motivational tips for continuing a program.
Physical Fitness for Fire Fighters
President's Council on Physical Fitness and Sports

8 page fold-out brochure II E

flexibility, strength and endurance exercise program; description and visual diagram of exercise including intensity, duration and frequency

Walking as an Exercise
Illinois Governor's Council on Health and Fitness

4 page pamphlet I E

general information on frequency, duration, intensity of exercise; benefits of walking compared to running; tips for a walking program

Exercise for Office Workers
Illinois Governor's Council on Health and Fitness

4 page pamphlet I E

importance of making exercise part of daily activities; stretching exercises for office and home; cardiovascular exercises

How to Keep Fit at Your Desk: The Desk-R-Cize Way (1980)
Doug MacLennan
The Fitness Institute

31 page booklet II E

the dangers of desk work: reduced circulation, muscular weakness, poor posture, pain and stiffness, fatigue, muscle tension; simple tests for determining fitness; exercises for the office, plane, bus, car

Shaping Up for the Long Run (Whether Measured in Miles or Years)
Best Foods Nutrition Information Service

24 page booklet II (single copy: I) E
informative discussion of bodily changes due to exercise, proper nutrition; reasons running is one of best exercises for health and fitness; weight control: exercise and diet; components of a nutritional diet for someone on a fitness program; muscular fitness; exercise guide: warm-up, warm-down, building muscles, endurance training

_Beyond Diet...Exercise Your Way to Fitness and Heart Health_ (1981)  
Best Foods Nutrition Information Service

36 page booklet II (single copy: I) E

informative discussion on proper diet and exercises: effects on decreasing the risk of heart attack; starting an exercise program; guideline medical questionnaire for the need to consult physician; type and frequency of exercise; mets and calories of various exercises; warnings for stopping, evaluating, readjusting a program; specific exercise programs; motivation; heart rate profile chart

_Fitness Head-On_  
(A Participation Book)  
Accidental Life Insurance Company of Canada

32 page booklet III E

two common problems in attaining fitness: getting started and keeping going; strategies for overcoming the "ten most common problems that stand between people and fitness:" misconceptions, indecision, time, old habits, lack of satisfaction, social pressures, self-consciousness, defeatist attitudes, tension, giving up

_Fitness for Everybody_ (1980)  
Linda Garrison and Ann Read  
The Athletic Institute (or Mayfield Publishing Company)

138 page paper back III PD/E

information concerning nutrition; weight control; beginning an exercise program; flexibility, strength and endurance exercise: goals and objectives, explanation and diagram of exercises; male/female differences: body composition, hormones, conditioning; creating a more active environment
Paul Vodak
Bull Publishing Company
77 page paperback II PD
reasons for exercise; intensity, duration and frequency of exercise; determining the need for medical check-up; heart disease risk factor analysis; starting an exercise program; cardiovascular sports; discontinuous sports; references

Institute for Aerobic Research
Ideals Publishing Corporation
package of six 12 page booklets IV PD/E
(1) "The Shape You're In": determining physical fitness, what it means, why it is important; (2) "The Human Machine": how the body works, what it can do; (3) "What It takes" to get in shape: how long, how much, how hard; (4) "The Activities": which activities improve fitness, which make most sense to the individual; (5) "The Benefits of Fitness" (6) "The Final Ingredient": getting started, motivation

Health and Fitness Through Physical Activity (1978)
(American College of Sports Medicine Series)
Michael L. Pollack, Jack H. Wilmore and Samuel M. Fox
John Wiley & Sons
357 page hardcover III PD
comprehensive text on exercise, health and fitness: research findings on exercise, health maintenance and performance, medical screening and evaluation procedures, exercise prescription guidelines: preliminary considerations, cardiorespiratory fitness and weight control programs; nutrition and human performance; cardiac rehabilitation; special considerations: shoes and clothing, injury prevention, environment, age and sex, training, motivation
Additional Exercise and Fitness Program Resources

American College of Sports Medicine
Lea & Febiger

151 page paperback III PD

reference book: guidelines for evaluation of health status prior to exercise testing; graded exercise test administration, exercise prescription, types of exercise programs, exercise program administration; role of physicians in exercise programs; certification of prevention and rehabilitative exercise program personnel

*Exercise (1978)*
(Stay Well Series)
Metropolitan Life Insurance Company

5 page pamphlet II E

basic questions and answers on exercise; office exercises

DHHS (PHS) Publication No. 81-50164
National Health Information Clearinghouse

24 page booklet I PD/E

organizations and resources for fitness: bicycling, bowling, calisthenics, dance, hiking-camping-backpacking, racketball, running-jogging, skating, skiing, softball, swimming, tennis, volleyball, walking, yoga; general organizations and resources for special groups: blind, deaf, diabetic, elderly, handicapped, mentally retarded, post-coronary

*Aqua-Dynamics: Physical Conditioning Through Water Exercises (1981)*
President's Council on Physical Fitness and Sports
Superintendent of Documents, U.S. Government Printing Office

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.
water exercises: diagrams explanations

*Feel Better* (1980)
Eddie Miller
Blue Cross Association

information on exercise benefits; designed primarily for the sedentary individual not interested in exercise

*The Fitness Challenge...in the Later Years* (1981)
President's Council on Physical Fitness and Sports; and the Administration on Aging
Superintendent of Documents, U.S. Government Printing Office

information on the benefits of exercise to the aging person; programs based on current fitness level

Exercise and Fitness Resource Organizations

National:

STRESS MANAGEMENT

Stress Management Program Resources

.Some Ways of Handling Stress (1980)
Center for Consumer Health Education

7 page pamphlet  I  E

general information on why people feel stress; physiological reactions; situations that cause stress; Holmes scale of life changes; reducing stress; resources

.Stress and Your Health (1980)
Metropolitan Life Insurance Company

4 page pamphlet  II  E

definition of stress, types and degrees of stress: mental, emotional, physical; bodily reactions; treatment: discovering the causes, physical check-up, releasing tension, reducing stress

.Coping With Stress (1979)
Keyword Publications

14 page booklet  II  E

general information on stress: definition; physical and psychological stress; scale of life changes related to stress; effects of stress: alarm, resistance and adaptation, exhaustion; recognition; symptoms; reduction of stress

(A Scriptographic Booklet)
Channing L. Bete Co., Inc.

15 page booklet  II  E

general discussion of stress: causes; tension, anxiety, depression; reduction of stress; problems with self-medication; questions and answers

.How to Deal With Your Tensions
National Mental Health Association

9 page pamphlet  I  E
discussion of useful and harmful anxiety and tension; practical and constructive actions for reducing stress

Stress, Work, Health (1980)
Department of Environmental, Public and Occupational Health
American Medical Association

23 page booklet II PD

variables in occupational stress: specific tasks, occupational positions, organizational environment; major stress factors in organizations: emotional distress, cardiovascular symptoms, gastrointestinal disorders, respiratory allergies, medication use or abuse; encountering stress rather than avoiding it: personality, constitution (control over own life), social support systems; the stress of relocation: recognition and prevention; programs for dealing with emotional stresses and anxieties; references

Taking It in Stride: Positive Approaches to Stress Management
Spectrum Films

22 minute film (16mm of 3/4" video-cassette) IV E

comprehensive presentation of approaches to stress management: focus on skills for coping with stress, adapting to life situations, productively managing stress

comments: endorsed by the American Occupational Medical Association and by the American Association of Fitness Directors in Business and Industry

Stress Management Techniques

Controlling Stress and Tension: A Holistic Approach (1979)
Daniel Girdano and George Everly
Prentice-Hall, Inc.

244page paperback III PD

Managing Stress Before It Manages You (1980)
Jenny Steinmetz, Jon Blankenship, Linda Brown, Deborah Hall, Grace Miller
Bull Publishing Company

114 page paperback II PD/E

self-instructional or group oriented workshop manual: healthy and unhealthy stress; identifying the stress cycle; causes of personal stress; recognition of physical, emotional, behavioral symptoms; techniques for changing reactions to stressors: relaxation exercises, cognitive restructuring, active listening, assertion training.

John D. Curtis and Richard A. Detert
Mayfield Publishing Company

222 page paperback III PD/E

stress management in relation to the total person concept; components of stress; recognizing and controlling stressors; problems with stress, benefits of relaxation; skills for reducing/eliminating stress; several methods and techniques of stress reduction; effective communication, time management, nutrition and exercise; includes sequential relaxation exercises, practice schedules and daily logs for personal relaxation program.

Douglas A. Bernstein, Ph.D. and Thomas D. Borkovec, Ph.D.
Research Press

66 page paperback III PD
detailed step-by-step procedures for effective teaching of progressive relaxation: background of relaxation training; discovering causes of reported tensions; physical setting; rationale; basic procedures and variations; differential and conditional relaxation; possible problems and suggested solutions; record included as supplementary illustration of proper words, intonation, sequencing and timing of the relaxation procedure

Stress Management Resource Organizations

State and local:
. local mental health center
. personal physician
. local social service department
BLOOD PRESSURE CONTROL

Blood Pressure Control Program Resources

. The High Blood Pressure Story (1981)
Colman Ryan, M.D.
Patient Information Library

16 page booklet II E

general description of blood pressure, how the heart works; possible causes of high blood pressure; how controlled; health factors related to high blood pressure; importance of regular check-ups, treatments: lifestyle change, nutrition and diet, exercise, medication

. Your Blood Pressure (1977)
Sandra C. Malanga
American Medical Association

13 page pamphlet II E

explanation of high blood pressure; how measured; prevalence in Americans; causes; why harmful; essential hypertension; detection and treatment; nationwide screening

. Watch Your Blood Pressure (1981)
Public Affairs Pamphlet No. 483B
Theodore Irwin
Public Affairs Committee, Inc.

28 page booklet II E

normal blood pressure; explanation; hypertension: essential, secondary, acceleration; people most often afflicted with high blood pressure; possible underlying causes; diagnosis; blood pressure control; methods of treatment

American Heart Association

54
equipment for indirect measurement of blood pressure; determination of blood pressure: technique, effect of arm position, blood pressure in thigh, legs and forearm, basal blood pressure and home recording; blood pressure recording in special situations: arrhythmias, clinical shock, obesity; determination of blood pressure in infants and children; epidemiological methods: measurement errors, clinical implications

Pamphlets by the U. S. Department of Health, Education and Welfare

High Blood Pressure Information Center

8-11 pages I or II E

general information on who can get high blood pressure, likelihood of no symptoms, importance of continuing treatment if doctor prescribes medication

NIH Publishing No. 81-2025

basic explanation of high blood pressure; no symptoms: diagnosis, control: medication, nutrition and diet, decreased salt intake; family help and support

comments: written in Spanish and English

Questions About Weight, Salt, and High Blood Pressure (1982)
NIH Publishing No. 82-1459

questions and answers about weight and salt reductions and its effects on high blood pressure

.Black and High Blood Pressure (1980)
NIH Publication No. 81-2024

basic information about high blood pressure; prevalence in blacks, diagnosis medication, weight control, salt reduction, family help and support
Marvin Moser

explanation of blood pressure; myths and facts about high blood pressure; causes often unknown; heredity, environment, diet; effects of high blood pressure: the heart, stroke, arteriosclerosis, heart attack; medications: types, possible side effects; other risk factors in cardiovascular problems; treatments: diet, exercise, others; glossary

Pamphlets by the American Heart Association  
American Heart Association

2-9 pages I or II E

.Ten Commandments: For the Patient with High Blood Pressure

important reminders for a person with high blood pressure

.High Blood Pressure

basic definition; effects on the body, diagnosis; importance of periodically checking high blood pressure

general explanation of high blood pressure; unknown causes; genetics; diagnosis; effects of high blood pressure: treatments

.High Blood Pressure: What It is; What I Can Do; What You Can Do About It (1980)

information on blood pressure: systolic, diastolic; high blood pressure; effected by body chemistry, emotions, heredity; health and high blood pressure; treatments; general health habits; importance of checking blood pressure, remaining on medication if prescribed

.What Every Woman Should Know About High Blood Pressure

high blood pressure and oral contraceptives, pregnancy, overweight, after menopause, black women, family history; blood pressure control

description of blood pressure: systolic, diastolic; high blood pressure in children, causes, treatments; parents role: continued support, encouragement, help with diet

How You Can Help Your Doctor Treat Your High Blood Pressure (1980)

explanation of high blood pressure; essential and primary hypertension; development of high blood pressures; heart mechanics; treatments; medications and possible side effects; high-potassium/low-sodium foods

Employee Blood Pressure Control

High Blood Pressure in the Workplace Fact Sheet (1980)
High Blood Pressure Information Center

1 page fact sheet I PD/E

prevalence, risk, deaths, absenteeism and lost earnings due to high blood pressure

Blood Pressure Control at the Work Site: Manual of Procedures for Blood Pressure Control Programs in Industrial Settings
John C. Erfurt and Andrea Foote
Institute of Labor & Industrial Relations, Worker Health Program

83 page booklet III PD

comprehensive guide for devising and implementing an employee high blood pressure program: screening and referral: procedures, screening forms and pamphlets, employee education, referral to physician, record keeping; follow-up procedures: records, follow-up letters to employees and physicians, telephone contacts, filing system, evaluation of follow-up results, program evaluation forms

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.
High Blood Pressure Control in the Work Setting: Issues, Models, Resources (1976)
(Proceedings of the National Conference October 14, 1976, Washington, D.C.)
High Blood Pressure Information Center

potential of high blood pressure control in the work setting identified through presentation of four operational models and speaker presentations: confidentiality and job security, economic considerations, interdependence of occupational and private medicine, need for more trained occupational health personnel

re: High Blood Pressure Control in the Worksetting
National High Blood Pressure Education Program, National Heart, Lung and Blood Institute
High Blood Pressure Information Center

expanded issue of High Blood Pressure Control in the Worksetting (above): seven examples of workplace hypertension control programs; programs include large corporations and small companies, variety of employees, wide range of settings, approaches, resources; programs initiated by companies, public or voluntary organizations

Handbook for Improving High Blood Pressure Control in the Community (1976)
DHEW Publication No. (NIH) 77-1086
High Blood Pressure Information Center

community high blood pressure control: detection, diagnosis, therapy, essential services, critical considerations; improving community high blood pressure control: identification of needs, resources, constraints, alternate activities, implementation, monitoring, evaluation, several sample forms, questionnaires, reports

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.
NIH Publication No. 81-1088
U.S. Department of Health and Human Services
Superintendent of Documents, U.S. Government Printing Office

24 page booklet III PD

comprehensive description of elements involved in detection, evaluation and treatment of high blood pressure: detection, confirmation, referral; evaluation: history, physical examination, minimal laboratory tests, explanation of findings to the patient, classification of hypertension; therapy: benefits, goals, non-drug and drug therapy; long-term maintenance of therapy; management of special patient groups: elderly, cerebrovascular disease, coronary artery disease, renal impairment, isolated systolic hypertension in the young

Cost of Worksite Hypertension Treatment (1980)
NIH Publication No. 81-2115
U.S. Department of Health and Human Services

46 page booklet I PD

results from a 1978 cross-sectional analysis study of the cost of treating hypertensives in 11 worksite clinics in the greater New York metropolitan area: the worksite program; cost of providing hypertension treatment in community setting worksite clinic cost analysis: cost of care and blood pressure control over time, cost of treatment changes over time; discussion of lower costs and better blood pressure control compared to physician private practice of hospital out-patient setting

comments: results of one geographical area but may be helpful for implementation or evaluation of worksite hypertension programs

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.

. state and local medical society
SMOKING CESSATION

Smoking Information and Facts

.Smoking: Facts You Should Know (1977)
American Medical Association

9 page pamphlet II E

health hazards; respiratory and circulatory system; cigarettes, cigars, pipes; safety; women, pregnancy and smoking; quitting; rights of nonsmokers

.Smoking and Heart Disease (1981)
American Heart Association

6 page pamphlet I E

smoking and heart disease, circulation, atherosclerosis, peripheral vascular disease, heart attack, angina pectoris, chronic lung disease, oral contraceptives, low tar and nicotine cigarettes

.Word of Mouth (1976)
American Cancer Society

2 page pamphlet I E

brief discussion of smoking and oral cancer, importance of dental check-ups, symptoms and prevention

.Medicine for the Layman: The Lungs (1979)
NIH Publication No. 79-1802
U.S. Department of Health, Education and Welfare
U.S. Department of Health and Human Services,
National Institutes of Health

23 page booklet II PD/E

lung function, physician evaluation, industrial and non-industrial causes of lung disease, cigarette smoking, new diagnostic techniques, signs and symptoms of lung lung dysfunction precautions, questions and answers
behavior and attitudes toward smoking: adult, health professionals, teenagers, teenage girls, young women; biomedical effects of smoking: cigarette smoke, smoking effects on health, effects of changes in smoking behavior; effectiveness of public information and education; smoking cessation programs: those most likely to quit, cessation programs, evaluation; legal restrictions on smoking; the tobacco industry: cigarette sales, advertising

health benefits of quitting; decreased life expectancy of smokers, heart attacks and strokes, lung cancer, emphysema and chronic bronchitis, other cigarette-related cancers; women and smoking; filter cigarettes, tips on quitting

colored illustration and description of the normal lung and lungs with emphysema and cancer; tips for quitting smoking

parental smoking influence on children, reasons young people start smoking; health problems and deaths from cigarette-related diseases
Cigarette Smoking: The Facts About Your Lungs (1979)
American Lung Association

4 page pamphlet

American death rates due to effects of cigarette smoking; effects of smoking one cigarette; hot smoke and its harmful compounds; men, women and teenagers: influential factors of smoking, trends of smoking; pregnancy and smoking; tips on quitting; facts for non-smokers

Second-Hand Smoke (1980)
American Lung Association

5 page pamphlet

informative facts about the effects of tobacco smoke to non-smokers: open burning, sidestream and mainstream smoke, carbon monoxide, hazardous levels, effects of the gas; animal research; effects on children and asthmatics; Nonsmoker's Bill of Rights

If You Must Smoke... (1974)
DHEW Publication No. (CDC) 75-8706
U.S. Department of Health, Education, and Welfare
National Clearinghouse for Smoking and Health

5 page pamphlet

suggestions to help reduce some dangers of smoking; effects of smoking on risk factors of heart disease; prevalence and symptoms of chronic bronchitis, emphysema, lung cancer, other health risks to smokers

We Americans Have Seen the Light...And We're Putting it Out
DHEW Publication No. (PHS) 79-50070
U.S. Department of Health, Education and Welfare
Office of Cancer Communications

6 page pamphlet

report on smoking and quitting: declining trend of smokers; tips on quitting, immediate rewards, long-range benefits; important considerations of low-tar, low-nicotine cigarettes: check other constituents, amount of inhalation; woman, pregnancy and smoking
Women and Smoking

*When a Woman Smokes* (1975)
American Cancer Society

3 page pamphlet

basic information about rising trend of female smokers: rate of health problems and diseases equalling male rates; pregnancy and smoking; smoking prevalence of teenage girls; tips on quitting

*Why Start a Life Under a Cloud*
American Cancer Society

4 page pamphlet

pregnancy and smoking; reasons to quit: fetal growth, infant mortality, health of mother

*2 Things Every Woman Should Know About Smoking Cigarettes*
DHEW Publication No. (PHS) 80-50114
U.S. Department of Health and Human Services
Office on Smoking and Health

2 page pamphlet

brief, informative discussion on women and smoking: smoking effects unborn child; lung cancer is no longer a man's disease

Smoking and Weight Control

*Weight Control Guidelines in Smoking Cessation*
American Heart Association

5 page pamphlet

identification of common problems related to weight control during smoking cessation; possible solutions

*Guidelines for a Weight Control Component in a Smoking Cessation Program*
American Heart Association
comparison of excess body weight to cigarette smoking as a hazard to health: suggested ways to incorporate weight control into a smoking cessation program; common problems and possible solutions to weight control during smoking cessation

_Slim & Smokeless: A Guide to Weight Control After Quitting Cigarettes_ (1977)
DHEW Publication No. (CDC) 77-8346
U.S. Department of Health, Education and Welfare
National Clearinghouse for Smoking and Health
(or Superintendent of Documents, U.S. Government Printing Office)

emphasis on program of regular exercise with guidelines of physician; choosing correct foods, counting calories: general information on cholesterol, saturated, polyunsaturated, monosaturated fats

Smoking Cessation Programs

_How to Stop Smoking_
American Heart Association

5 week smoking withdrawal guide: consideration of personal reasons for smoking and how to change attitudes and behaviors towards smoking; behavior modification techniques: developing smoking cigarette tally: time of day, occasion for smoking, feelings, valued importance, rating of the cigarette; tips on smoking cessation, smoker's test: discussion about cigarette craving, addiction vs. habit

_How to Stop Smoking_ (1981)
(A Scriptographic Booklet)
Channing L. Bete Co., Inc.
general information on breaking the smoking habit: smoking facts: immediate, long-term effects; benefits of quitting; sources of outside help; tips for self-treatment and maintenance; basic questions and answers

American Cancer Society
22 page pamphlet

benefits of quitting; factors describing smoking habits: stimulation, handling, relaxation, crutch, craving, habit; 7 day gradual plan to stop smoking: smoking record, exercise, list of reasons for quitting, tips on quitting, tips to help in maintenance of non-smoking; facts on smoking

NIH Publication No. 81-1647
U.S. Department of Health and Human Services
Office of Cancer Communications
37 page booklet

variety of tips and methods for smoking cessation: examples: tips to involve someone's else, switch brands, cut down number of cigarettes, use incentives and rewards, avoid temptation, find new habits, recording progress; tips on avoiding weight gain; sample four-week program, formal program resources

."Helping Smokers Quit" Kit (1981)
U.S. Department of Health and Human Services, National Cancer Institute
Office of Cancer Communications

.I.E

NIH Publication No. 81-1822
5 page booklet
questionnaire and explanation of results

.Calling It Quits (1980)
NIH Publication No. 80-1824-A
37 page booklet
same contents as Clearing the Air (above): designed
for smoker to develop best way to quit based on self-test results

. What Happens After You Quit?  
NIH Publication No. 81-1823  
4 page follow-up booklet: maintenance tips; immediate rewards; long-range health benefits; recovery symptoms; development of new habits to counter fatigue and weight gain

5 page booklet  
reasons people smoke; introducing quitting approaches: explanation and guidelines for the Helping Smokers Quit Kit; typical patient reasoning for smoking, explanatory feedback

. Kicking the Smoking Habit (in print)  
Morton L. Arkava, Ph.D.  
Department of Social Work, University of Montana  
79 page draft copy

facts on smoking and health; reasons people smoke; ten-step behavioral approach to stop smoking; behavior modification: avoiding signals to smoke, planning alternatives; reducing stress; relaxation; aversive methods of smoking cessation; behavioral contracting; other methods; references groups and programs for help

Joyce D. Nash, Ph.D.  
Bull Publishing Company  
175 page paperback

for group use; six learning units: analyzing habits, preparing for quitting, the act of quitting using four options ranging from cold turkey to aversive rapid smoking; managing urges to smoke: altering signals, imagery, meditation, managing outcomes; coping with failure: irrational beliefs, restructuring thinking; how to be a non-smoker; weight management: nutrition and food choices; leaders guide provides step-by-step instruction; organization, running the program

Reproduced with permission of the copyright owner. Further reproduction prohibited without permission.
two program approaches:

(1) self-help program; two workbook manuals:

. Freedom From Smoking in 20 Days
64 page manual with supplementary materials

comprehensive self-help approach to smoking cessation; gradual withdrawal program; record keeping; awareness; deepbreathing relaxation techniques; alternatives to smoking; avoiding smoking; coping techniques; physical exercise; weight control; rewards; cigarette withdrawal symptoms; several behavior modification techniques; non-smoker contract

.A Lifetime of Freedom From Smoking
28 page manual with supplementary materials

pocket reminder: personal reasons for quitting; awareness of signals to smoke; coping and avoiding techniques; establishing physical fitness program; relaxation exercises; rewards, coping with urges, tension, feelings, social situations; social help and support; self image; weight control

(2) seven-session, seven-week group clinic program

.Freedom From Smoking Guide for Clinic Leaders (large notebook including clinic leader training manual)

similar to self-help approach; major concepts; rating and recording smoking information, triggers and coping; plan of action; panel of ex-smokers; contracts and rewards; deep breathing and other relaxation exercises; physical exercise; maintenance and "A Lifetime of Freedom From Smoking" (group participants receive the second maintenance manual)

The United States Forest Service (Equipment Development Center of Missoula, Montana) has asked the University of Montana's Human Performance Laboratory to research and assemble a guide to health related resource materials. Areas to be included in this guide are:

- health & wellness; health risk analysis
- nutrition and diet
- weight control
- exercise and fitness
- stress management
- smoking abstinence

This informational brochure will list resources such as:

- books
- audio-visual aids
- pamphlets
- computer programs
- resource organizations and individuals
- exercise equipment

Criteria used for including resource materials in this brochure will include technical soundness, cost effectiveness, and availability. A panel of experts will review the items submitted. We would appreciate the opportunity to review materials you feel would be appropriate.

The Forest Service is a decentralized agency with regional offices in large cities, forest offices in smaller cities and many rural or remote ranger districts. The resource guide is intended to help units of the agency implement a health and fitness program suitable for their size and location. Since project costs are limited we cannot purchase each item reviewed. We will be happy to return audio-visual and other more expensive items following the review process.

We look forward to the opportunity to review materials you submit. The deadline for receipt of materials is June 15, 1982. Incidentally, the published resource guide will be available to the public.

Sincerely yours,

Sandra Butler
Research Assistant
Department of HPE
University of Montana
